Regulation of the Department of Agriculture
on
Checking of Documents Required for Registration of Hazardous Substance
under Responsible of the Department of Agriculture
B.E. 2553 (2010)
……

the Department of Agriculture is an agency responsible for controlling, supervising, overseeing and checking of data and documents required for registration, issuance of registration certificate and extension of registration certificate for hazardous substance, and details, criteria and procedure for registration, issuance of registration certificate and extension of registration certificate for hazardous substance, therefore, in order to facilitate checking of data and documents required for registration according to the Notification of the Ministry of Agriculture and Co-operatives entitled registration, issuance of registration certificate and extension of registration certificate for hazardous substance under responsible of the Department of Agriculture B.E.2551 (2008) and Notification of the Department of Agriculture entitled Determining Details, Criteria and Procedure for Registration, Issuance of Registration Certificate and Extension of Registration Certificate for Hazardous Substance under Responsible of the Department of Agriculture B.E.2552 (2009); to be correct, fast and efficient, the Director-General of the Department of Agriculture issued regulation as follows:

No. 1 This Regulation is called “Regulation of the Department of Agriculture on Checking of Documents Required for Registration of Hazardous Substance under Responsible of the Department of Agriculture B.E. 2553 (2010).”

No. 2 This Regulation shall be effective since the date issued.

No. 3 Upon receiving an application for registration of hazardous substance as well as supplementary documents and evidence, the officer shall check the documents in accordance with this regulation.

No. 4 Data relating to toxicity of technical grade materials and finished products generated from the accredited GLP (Good Laboratory Practice) laboratory according to OECD standards shall have the following details:

4.1 Shall be signed by authorized person which can be checked from www.oecd.org or from competent agency.

4.2 Shall be accompanied with laboratory certificate issued by authorized agency of OECD.

No. 5 Registration or manufacturing license certificate in the manufacturing country**.**

The applicant shall furnish original copy of a registration or manufacturing license certificate for hazardous substance as supplementary documents for registration. In case of submitting photocopies of such documents, such photocopies shall be certified by the officer or a person designated by the law relating to registration of hazardous substance in the manufacturing country as a person entitled to certify such documents.

No. 6Documents under Clause 4 and 5 above and other documents prepared in foreign country shall be legalized and signed by competent officer of the Thai embassy or consular in such country not exceeding 6 months prior to the date of submission of the application.

No. 7 In case of doubt, the officer shall coordinate with competent agency in that country to verify such data.

No. 8 The Director-General of the Department of Agriculture shall be in charge of this Regulation.

Issued on this 21st day of January 2010
