

PLASSON Mining Solutions

Solutions For Connecting PE Pipe Strength & Quality Over 40 Years Of Experience

You need a name you can count on to supply your pipe fittings.

When miners say 'pass me a PLASSON', they're asking for a range of fittings which have been used continuously since PE pipe was first introduced into mines 40 years ago.

You'll be pleased to know that PLASSON still has the safest, and the most reliable fittings on the market – and the only ones listed with a Standardsmark license to PN16 for sizes up to 125mm.

Fast and simple installation.

Mine conditions are never perfect. That's why PLASSON solutions are the BEST. They designed to ensure that the joints can be made in the worst conditions, including overhead assembly, ovality and bad alignment. Even better, PLASSON fittings can be disassembled and reuse, and the pipe does not need chamfering or pipe preparation.

High performance.

PLASSON fittings comply for the highest security demands and are suitable for water applications and compressed air applications.

Global Presence – Local commitment.

You can find PLASSON solutions in Australia, South Africa, Ecuador, Brazil, Peru, Argentina, Chile and Mexico. PLASSON solutions are used in Underground mining and in Open pit mining.
