### Vineyard Tours

We have carefully selected an assortment of Vineyards for wine tasting and tours. Each of these vineyards are unique in the experiences that they offer. And we have paired them nearby each other so to limit travel as much as possible.

Below are a list of each of the Vineyards, the days we will be touring them and the cost of each tour.

## FRIDAY, OCTOBER 11

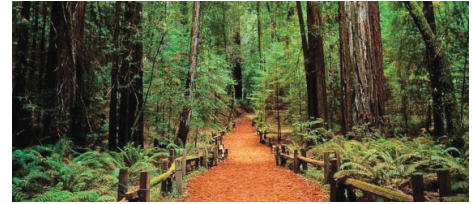

### Hartford Family Winery

### Korbel Winery

### Armstrong Woods

**WINE TOUR**  
Includes:  
Hartford Family Winery  
and Korbel Winery  
**\$89 p.p.**

**FRIDAY TOURS**  
Includes  
Your Choice:  
Wine Tour  
OR Alternate  
Hiking Tour

**HIKING TOUR**  
Includes:  
Hiking Armstrong Woods  
and Korbel Winery  
**\$74 p.p.**

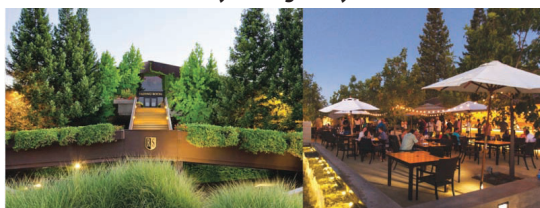

**Armstrong Woods:** The serene, majestic beauty of this Grove is a living reminder of the magnificent primeval redwood forest that covered much of this area before logging operations began during the 19th century. Armstrong Redwoods preserves stately and magnificent Sequoia sempervirens, commonly known as the coast redwood. These trees stand together as a testament to the wonders of the natural world. The grove offers solace from the hustle and bustle of daily life, offering the onlooker great inspiration and a place for quiet reflection. The reserve includes a visitor center, large outdoor amphitheater, self-guided nature trails, and a variety of picnic facilities. While you can drive into the park, the best way to experience the dramatic effect of the towering redwoods, is to park in the lot at the park entrance and walk in for free. Donations are accepted at the Visitor Center and at the kiosk entrance. All of the main park features can be found along the Pioneer Nature Trail. This trail is a mile and a half long round trip, is ADA accessible and is mostly flat and level.

## SATURDAY, OCTOBER 12

### J. Vineyards

### Rodney Strong Vineyards

### Francis Ford Coppola Winery

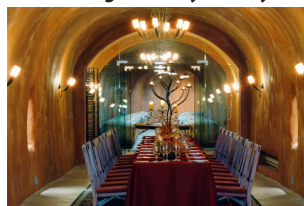

**SATURDAY WINE TOUR**  
Includes:  
J. Vineyards • Rodney Strong Vineyards • Francis Ford Coppola Winery • Dinner **\$175 p.p.**

# FEATURED SPEAKERS

## Dr. Karl Ulrich Volz

Founder President of the ISMI — International Society of Metal-Free Implantology, and founder of the dental clinics Bodensee Zahnklinik and Tagesklinik Konstanz. In 2001, he developed the first market-ready ceramic implant and was also the one who developed all of SDS Swiss Dental Solutions' implant designs for a wide range of indications. He went on to become the dentist to install the most ceramic implants in the world. Thanks to this pioneering achievement, he is arguably the most experienced and well-known biological dentist in Europe, and has developed unique treatment methods and surgery concepts which only became possible through the concurrent use of biological and immunological enhancement and accompaniment protocols. His treatment successes, publications, and international talks have sparked a new trend in dentistry and led to the fact that a large percentage of his patients are themselves dentists, doctors, and non-medical practitioners. He currently leads the biological dentistry department in the SWISS BIOHEALTH CLINIC in Kreuzlingen, Switzerland.

## Swiss BioHealth Concept and Ceramic Implants 2.0

### Course Description:

The "SWISS BIOHEALTH CONCEPT" that is redefining biological dentistry – all treatment steps have been carefully developed by users for users and are being put to use and optimized further on a daily basis at Dr. Volz's SWISS BIOHEALTH Clinic.

### WE HAVE LEARNED TO THINK IN CERAMICS

With the surgical "ALL-IN-ONE" concept we restore patients in 2-3 treatment sessions - always with the aim to improve the health of our patients. Sure, the dental work has to be state of the art regarding aesthetics and function, too, But with this way of Biological dentistry with ceramic implants which has been continuously improved the last 20 years and with the experience of more than 20.000 personal placed ceramic implants we have additional value of regular treatment protocols that A) we reduce the treatment time and B) improve in addition the patients' health.

### Learning Objectives:

- Today we are able to place more than 85% of SDS implants immediately (immediate implantation an immediate restoration with long-lasting temporary restorations). This requires a special protocol.
- CERAMICS IS EASIER – BUT DIFFERENT: learn and understand the differences regarding titanium implants.
- The immune system is one of the most important success factors of ceramic implants – the SWISS BIOHEALTH CONCEPTS offers a proved concepts to build up the immune system

## Dr. Giles B. Horrocks DDS, MS

Dr. Horrocks is a graduate of the University of Oklahoma, College of Dentistry. He completed his specialty training in Periodontology in the Department of Medicine and Surgery at the Veterans Administration Medical Center in Milwaukee, Wisconsin. Dr. Horrocks received a Masters of Science degree from Marquette University School of Dentistry. He is an Assistant Clinical Professor at the School of Dental Medicine at the University of Colorado and is a Diplomate of the American Board of Periodontology. He has spoken nationally and internationally on Advanced Piezosurgery and Controlled Assisted Ridge Expansion (CARE). He has written a chapter on "Piezo-Assisted Ridge Expansion" in a textbook on advanced piezosurgery and has a recent publication in the International Journal of Periodontics and Restorative Dentistry on the CARE approach to Ridge Expansion. He has just recently published a chapter on periodontal and peri-implant soft tissue surgery in the Wiley textbook Minimally Invasive Surgery for Dental Implants. He limits his practice to Periodontics with a focus on dental implant related surgery.

## The Essentials in Piezosurgery® Course

### Course Description:

The Essentials in Piezosurgery® course is designed for new users of the technology, those who purchased a device in years past and would like a refresher, and those who have not invested in the technology but are interested in learning more. Combining case presentations, lecture, and hands-on opportunities throughout the day, attendees will have the opportunity to discover the many surgical applications that are enhanced and perfected in utilizing our patented technology. Moreover, the attendees will have the opportunity to ask questions that will be answered by a clinician who has been successful utilizing Piezosurgery® in their own practice. This is a unique experience, as attendees from all experience levels can learn, grow, and enhance what they already know about the techniques and challenges solved with Piezosurgery®. All Essentials in Piezosurgery® courses are unlimited and complimentary for Piezosurgery® customers! Interested Doctors who do not currently own a Piezosurgery® device may attend for a nominal fee of \$295. This fee may be utilized as a credit toward any Piezosurgery® device purchase made on-site at the course Six (6) hours of CE credit will be given.

### Learning Objectives:

- Attendees will learn how Piezosurgery® by Mectron was researched, developed, and introduced to market as the FIRST in piezoelectric bone cutting.
- Learn why Piezosurgery® is a better alternative than traditional instrumentation for osseous surgeries, as well as how your treatment outcomes are improved by use of this device.
- Understand the many applications where Piezosurgery® may be utilized in providing a better patient experience, as well as reducing the stress on the practitioner when working closely to delicate structures.
- Learn the protocols and suggested insert tips for the applications you may not be familiar with.
- Find out about the new insert tips that are now available and how they may change your perspective on certain procedures.
- Enjoy a learning environment where YOU are the most important person in the room. The Piezosurgery® team is there to ensure that you are taken care of and that you enjoy this day of learning as comfortably as possible.

## Jodi Deming, RDH

Jodi started practice as a dental hygienist in 1988. In the early 1990's frustrated with the understanding of the etiology of periodontal disease became involved with biofilm research. At that time the term was rarely used in dentistry except in the context of dental unit waterlines. As a clinical research associate Jodi was involved with biofilm growth and therapeutic product development evaluating the effect on dental biofilms. Understanding biofilms, she developed a passion about non-surgical therapy, root morphology, and the results of thorough periodontal debridement. Jodi has worked 28 years mastering non-surgical periodontal therapy techniques and procedures. She currently works in both periodontic and prosthodontic practices.

Jodi is a national and international educator, clinician, and lecturer. She has pre-sented over a 150 lectures and workshops on advanced integration of ultrasonic and hand instrumentation

Jodi has served as adjunct faculty at the University of Southern California, School of Dentistry, Department of Dental Hygiene and at Spear Education. She is a Friends of Hu-Friedy Thought Leader valued for her involvement with biofilm research, instrument development and training. She is nationally recognized as an expert in endoscope and ultrasonic instrumentation.

## Improve Your Quality of Hygiene Care

### Course Description:

Learn how to do what you have thought was impossible. Gain time in your hygiene appointment without compromising but even improving your quality of care.

- Utilization of air polishing and piezoelectric scaling equipment
- Application of supra and subgingival air polishing techniques
- Characteristics and application for various air polishing powders
- Implementation of air polishing therapy into your treatment protocol

Participants will have a sense of assurance and confidence in their approach to subgingival biofilm control being effective, efficient and safe.

### Learning Objectives:

- Understand biofilm and it's management.
- Understanding the new disease model.
- Polymicrobial Symbiotic and Dysbiosis- Beyond the red complex

## Dean Ahmad, DDS

Dr. Dean N. Ahmad was born in Birmingham, England (UK) and was raised in Miami, Florida. He currently maintains a private practice specializing in the treatment of Periodontal Diseases, Periodontal Plastic Surgical Therapies, and Implant Dentistry in Northern California. Dr. Ahmad received both his graduate certificate in Periodontics and his Doctorate in Dental Surgery from the University of Michigan. He is a Board Certified, Diplomate, Periodontist from the American Board of Periodontology. He has also obtained Fellowship from both the International Congress of Oral Implantologists and from the Pierre Fauchard Honorary Academy. Throughout his training, he has completed internships in Oral and Maxillofacial Surgery from both Northwestern University and the University of Miami. He has also lectured both domestically (CDA Scientific Sessions/ SDDS...) and internationally. Dr. Ahmad has participated in multiple research projects and published numerous scientific articles. Dr. Ahmad has also attained Clinical Assistant Professorship in Periodontology and Orofacial Sciences from the University of California, San Francisco.

Dr. Ahmad is the current president of the Western Society of Periodontology. He is also the past-president of Dental APPNA. Dr. Ahmad is considered an "Expert in the Field in Periodontics and Implant Dentistry" for the Dental Board of California. He is an Examiner in Intravenous Conscious Sedation for the Dental Board of California and is also on the Executive Advisory Board for Carrington College, School of Dental Hygiene. Dr. Ahmad and his team have played a major role in applying innovative medical and technological advances to current Periodontics and Implant Dentistry.

## Implants 101: Managing Your Dental Implant Patients with Confidence

### Course Description:

Maximizing the restorative outcome requires precision implant planning, placement, as well as meticulous understanding and development of the gingival environment. Building a sound knowledge-base will allow you to develop proper implant treatment planning sequences utilizing a digital workflow, understanding implant complications and mastery of periodontal implant maintenance techniques to increase precision, decrease morbidity, and improve esthetic outcomes.

### Learning Objectives:

- Understanding the biology of the peri-implant mucosa and osseointegration
- Treatment planning for success
- Ridge preservation techniques for site development
- Implant surgical and prosthetic complications
- Implant maintenance techniques
