

# TRANSFORMATIVE LIFTING TECHNOLOGY

Intebloc provides transformative crane and lifting technology, improving safety and efficiency across the construction, marine and energy markets. Our suite of products allows customers to make decisions with confidence, knowing they are in safe hands with us.

We deliver:

- > Increased **operational efficiency**
- > **Enhanced safety** performance
- > Improved **data management**
- > Faster and **clearer communications**
- > **Lower operational costs**
- > **Innovative solutions**

# Lift-Ware™

INTELLIGENT SOFTWARE PACKAGE

*'the smart way  
to manage  
all lifting  
equipment.'*

## TRANSFORMATIVE LIFTING TECHNOLOGY DESIGNED FOR THE CONSTRUCTION, MARINE AND RENEWABLES INDUSTRIES

**Lift-Ware, the industry leading lifting equipment tracking and management system delivers substantial improvements in productivity and safety. Designed by users for users, Lift-Ware will deliver significant year on year costs savings.**

Lift-Ware is a software data management system designed to track, monitor and assist with control of all lifting equipment. Its intelligent software enables the user to identify quickly where and when equipment is used and helps control the verification of the lifting equipment certification. It is the smart way to manage all lifting equipment. The system is available with a ruggedized tablet and can also be accessed via a secure cloud database.

Lift-Ware, intelligent management tracking software that:

- > Increases productivity and reduces unnecessary downtime
- > Supports digitalisation of lifting operations
- > Constantly tracks and monitors the location of lifting equipment
- > Controls verification of lifting equipment
- > Minimises equipment costs
