

# TRANSFORMATIVE LIFTING TECHNOLOGY

Intebloc provides transformative crane and lifting technology, improving safety and efficiency across the construction, marine and energy markets. Our suite of products allows customers to make decisions with confidence, knowing they are in safe hands with us.

We deliver:

- > Increased **operational efficiency**
- > **Enhanced safety** performance
- > Improved **data management**
- > Faster and **clearer communications**
- > **Lower operational costs**
- > **Innovative solutions**

# Rig-Ware™

INTELLIGENT SOFTWARE PACKAGE

*'the smart way  
to manage  
all lifting  
equipment.'*

## TRANSFORMATIVE TECHNOLOGY DESIGNED WITH LIFTING IN MIND

**Dropped objects and mismanaged tools are the most common safety critical issues today; costing owners and operators' significant time and money.**

Rig-Ware is a software management tracking system designed to track, monitor and assist with control and inspection of all lifting equipment. Its intelligent software enables the user to identify quickly where and when equipment was signed out and helps control the verification of the lifting equipment certification. It is the smart way to manage all lifting equipment.

Rig-Ware, intelligent management tracking software that:

- > Increases productivity and reduces unnecessary downtime
- > Reduces the risks of dropped objects
- > Constantly tracks and monitors the location of lifting equipment
- > Controls verification of lifting equipment
- > Comes with a Non Atex or Atex Zone 1 tablet
