

136,000 young people

approached their council as **homeless** last year.

That's **372 a day**, a new young person
every 4 minutes !

Their future, being exposed to the harm of homelessness.

We're fighting for these young people.

We're fighting for a strategy to end youth homelessness.

Petition

Create a national strategy to end youth homelessness

In 2021-22, 129,000 young people experiencing homelessness approached their council for help. Yet no one is talking about this and there is no national plan to end this ahead of the General Election.

This has to change. We have the power to help so many young people, and absolutely should.
