

JOB DESCRIPTION**Health Outcomes Researcher**

Organisation name: Capita

Job title: Health Outcomes Researcher

Reports to: Senior Research Partner

Role responsibility

Capita is a long-term strategic partner of the NHS with over 20 years of experience in making a tangible difference. We have a commitment to making everyday a better day in healthcare. This position plays a key role in reviewing current standards in the healthcare practice specifically looking at public health programmes to identify the benefit impact. You will have a keen interest in progressing your strategic and project management skills in a consultancy setting. You will also expand your skills in health outcomes research to drive excellence and meet our client's needs.

Role duties

- Deliver high-quality literature reviews of clinical, health economic and real-world evidence, often to inform regulations, documents or health technology assessment materials.
- Collect and analyse data to identify the value of new health technologies related to quality of life.
- Analyse community health data, population data, programme/outcome data and fiscal expenditures.
- Consult with healthcare professionals and institutions to optimise the impact of practice and programmes including contributing to proposal writing and consulting.
- Review the structure and implementation of healthcare practices and interventions.
- Evaluate the efficiency, efficacy, and productivity of current public health provision.
- Present findings at national and international scientific conferences that offer solutions for better outcomes.
- Record data for evaluation of future trends and changes.
- Any other ad hoc related activities (as required) to deliver in post.

Qualifications and skills

- Higher degree (PhD or MSc) in a methodological discipline (e.g., research or health & psychological sciences).
- Able to clearly communicate complex technical issues in an easily digestible way.
- Ability to cope with fast-paced and pressured work where priorities can change rapidly.
- Excellent qualitative and quantitative analysis skills with an ability to notice patterns and trends within data.
- Ability to work independently but also as part of a multi-disciplinary team with various stakeholders and partners.
- Excellent Microsoft programmes Word, Outlook, PowerPoint and Excel skills.

This job description is a case study only. It should not be considered as an accurate description of a live role within the named organisation.
