

JOB DESCRIPTION

Aviation Engineer

BAE SYSTEMS

Organisation name: BAE Systems
Job title: Aviation Engineer
Reports to: Group Quality Manager

Role responsibility

We are a world leader in the aerospace industry, designing, developing and producing leading aircraft such as the Eurofighter Typhoon. Through continual innovation and the latest technology, we support customers wherever, whenever and whatever their challenges may be.

Are you a keen and aspiring engineer who is passionate about new product innovation? After a comprehensive training and induction process, you will help design, test and maintain a range of military and training aircraft.

Role duties

- Support the design, test and production stages of different projects.
- Identify solutions and recommend improvements to increase uptime, productivity and efficiency.
- Install and commission new equipment, including operating training and capability tests.
- Understand and apply quality management controls.
- Create and update status documents, inspection plans and work instructions.
- Build relationships with our quality and engineering teams to ensure effective collaboration.
- Maintain regular communication with our clients and deliver outstanding customer service.
- Learn and adapt to new technologies, ideas and practices.
- Put safety and sustainability first.

Qualifications and skills

- On track to receive a 2:2 or above in a relevant degree.
- Great eye for detail and design, helping to identify inconsistencies.
- Demonstrates a continuous improvement mindset.
- Outstanding interpersonal skills, working with a variety of stakeholders to deliver objectives.
- Proven experience of meeting deadlines and working under pressure.
- Analytically minded with excellent problem-solving skills.
- Willing to work in a diverse team across different sites.
