Learning Disability and Neurodiversity

This one day course will go into the difference between learning disabilities and learning difficulties, it will look into stages of development, legislation that protects people with learning disabilities, what neurodiversity is and what it means for someone who may be neurodiverse, the course will also look into stimming, labelling, transitions as well as people with learning disabilities having relationships with others.

This course is suitable for Service Managers, Senior Practitioners/ Team Leaders and Support Workers who support service users with a learning disability or a neurodiverse condition
