

# Knowledge Transfer Partnerships

## Understanding the KTP process

Contact us with your business query to see how KTPs can drive development, innovation or the adoption of new technologies within your business.

KTPs have avenues of funding that we can help to match to your project and assist with developing a funding application.

Projects run for a duration of one to three years and are supported by the KTP team throughout. We'll help you to schedule regular review meetings with Innovate UK, your academic and your senior business contact to ensure the success of your project.

Meet with our team to discuss research and match expertise to your project.

We will help you to recruit a high-calibre graduate or post-graduate who will be based at your business and will be your KTP associate responsible for managing the KTP project.

Rest assured you will be fully supported throughout your KTP. On completion we will help you explore further opportunities to get the most from your efforts.
