Bowers Connect

Designed to streamline your inspection process

BOWERS CONNECT

BOWERS GROUP

Bluetooth Software & Functionality

Features

- Connect up to 500 instruments in 'On the Fly' mode
- USB, Bluetooth, and M-BUS compatibility
- Pass/Fail display with live tolerance monitoring
- Upload part drawings with dimensional references
- Step-by-step inspection workflows for operators
- Multi-gauge & sequence modes for complex inspections
- User management for secure, role-based access
- Live monitoring of calibration and battery levels
- Easy data export to Excel or SPC systems
- Minimize downtime and reduce scrap
- Supports up to 128 wired or 40 Bluetooth instruments
- Compatible with Windows 7, 8.1, 10 (64-bit)

Why Choose Bowers Connect?

- Full Traceability – Accurate, timestamped data for audit-ready reporting
- Error-Free Entry – Automatic data capture means fewer mistakes
- Staff Support – Simple user interface and guided inspections reduce training time
- Data Freedom – Export how and where you need, instantly
- Cost-Effective – A smart alternative to full-scale QMS solutions

Bluetooth Software & Functionality

Bowers Connect is the powerful new **software solution** from Bowers Group. Designed to **streamline your inspection process**, Bowers Connect allows you to easily collect, monitor, and manage measurement data from a wide range of instruments via USB, Bluetooth, or M-BUS.

Whether you're looking to increase traceability, reduce errors, or improve productivity, Bowers Connect delivers real-time insights and complete control over your quality data.

Bowers Connect software brings simplicity, speed, and precision to your quality assurance processes. It enables live data capture directly from your instruments and helps your team make better, faster decisions.

Upload drawings, define tolerances, and let the software guide operators through inspections step by step, ensuring accuracy and compliance every time. With real-time monitoring and full export flexibility, you can instantly act on deviations and keep your production on track.

Say goodbye to manual data entry and disconnected tools. Bowers Connect centralises your inspection data, so you can focus on improving your production, not chasing paperwork!
