Snap-Stop®

We are proud to present to you our new catalogue 2021-2022!

Since 1996, our company has been known as a worldwide manufacturer and master distributor of a broad range of physiotherapy, rehabilitation and sports & fitness products. Our products reach the end-users through a global network of dealers and distributors.

Our own branded MoVeS and Mambo Max products, as well as other well-known brands in our market, are all presented in this catalogue.

On page 7, you can find our new products: our MoVeS Kinesiology Tape, Mambo Max Balance Pad Pro, and our updated MoVeS PearlPack Sport Pack with strap.

All our medical devices, marked with the MD symbol, comply with all the requirements of the EU's Medical Devices Regulation (MDR), which came into force May 26, 2021.

For all your inquiries for Private Label products, please contact us. We will be happy to assist you working out your private label projects.

Unfortunately, Covid-19 is still around, which has made 2021 a challenging year as we are currently experiencing the economic impact of this pandemic. Shortages of raw materials & containers as well as available vessel spaces cause high product price and transport price increases, as well as many and long delays on deliveries. We have adapted our systems to this present-day reality to minimise stock shortages.

This year is also special in the company's history; I herewith take the opportunity to introduce you to the new owners. It is with great confidence that I hand over the company to Evelyn and Tom, who will continue in the same spirit and with enormous enthusiasm. I wish them lots of success!

Finally, I would of course like to thank YOU for your confidence in the company and its products!
Stay safe, stay healthy!

Sincerely,
Sandra Vrancaert

THE ENVIRONMENT

We, at MVS In Motion, continue our strive to reduce our carbon footprint on the planet. Because after all, there is no planet B!

By making exercises available on our websites, not only do we reduce our ecological footprint by cutting down on the number of unused prints, it also allows us to keep costs low and offer you better value-for-money.

We have also been making continuous efforts over the past years to replace our plastic packaging with the more eco-friendly and recyclable cardboard packaging. And we will continue these efforts in the future!

LEADER IN TECHNOLOGY

What is Snap-Stop®?

Snap-Stop® makes exercising with latex bands much safer. This unique feature will avoid sudden snapping, even if there's a cut or puncture. When working out with a resistive exercise band, the band has to endure extremely high forces. A small cut can have a big consequence...

MoVeS and MoVeS FIT Bands are unique in their field. Thanks to our extensive research and development we have achieved an innovative production process: when used properly, the latex band will not suddenly snap, even when exposed to high forces. This does not apply to a very old band, or band that has been exposed outdoors for some time, as well as an abused band. Using a fresh and clean sheet of band is recommended.

Snap-Stop® for safer resistive exercising.

See for yourself

One-Stop-Shop for all your bands and tubes

MVS In Motion is your one-stop-shop for all resistive exercise products. With MoVeS we offer both original colour and FIT colour sequence. In addition, we offer a wide range of Latex-Free resistive exercise bands in original colours. Our tubes and loops are also available in the original and FIT colour sequence.

The latex bands, tubes and (super)loops are made of high quality latex from huge rubber tree plantations in Malaysia. All products have an extraordinary elasticity and linearity. The Snap-Stop® feature on our latex bands, dipped production process for our tubes and the multi-layered structure of our (super)loops makes them your ideal partner for your physiotherapy trainings or intensive work-outs. The different resistances allow you to use MoVeS for rehabilitation as well as for fitness.

MoVeS Latex-Free is made from TPE, to the same high quality standards as the regular MoVeS bands. Never before were the characteristics from Latex-Free bands so close to those from their latex counterpart.

MoVeS Band: 8 resistances (Tan - Gold) & 5 lengths (1,5m - 2,5m - 5,5m - 22,5m - 45,5m)

MoVeS FIT Band: 6 resistances (Peach - Grey) & 4 lengths (1,5m - 2,5m - 5,5m - 45,5m)

MoVeS Latex-Free Band: 5 resistances (Yellow - Black) & 3 lengths (1,5m - 5,5m - 45,5m)

Grey	Super Heavy

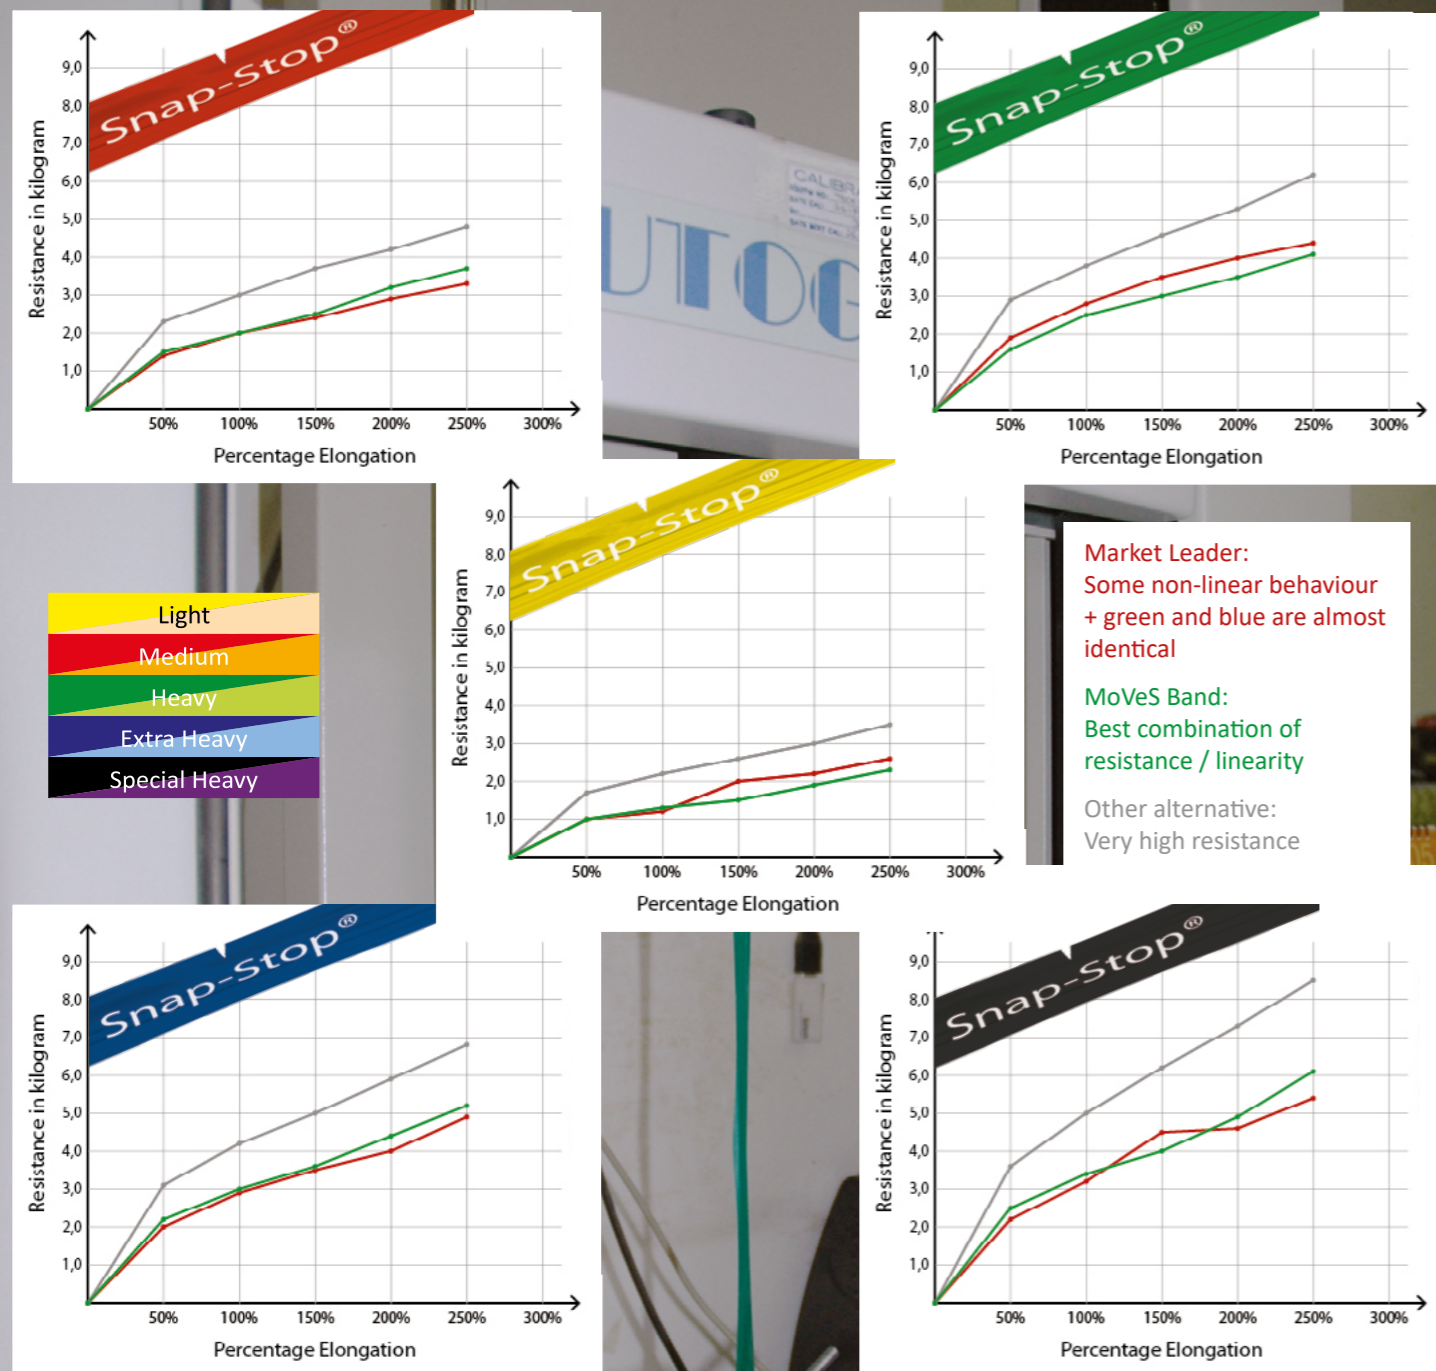

- Well-known colours used by physiotherapists all over the world
- Packaging with two tone layout brings more variety
- MoVeS brings premium quality to an affordable price range.

- "FIT" - colours are more trendy and youthful than original colours, reaching out to a wider customer base such as athletes and home users
- Sell MoVeS FIT next to MoVeS to widen customer base = EXTRA SALES

Resistance - MoVeS Band vs. Market Leader

MoVeS Bands can be stretched up to 600% elongation! MoVeS Bands are therefore your perfect partner for a rehabilitation programme or a full body work-out. Even after an effective training with amazing results, MoVeS Bands allow you to use the same band again. When you pre-stretch your band, you will be able to achieve higher forces without having to worry about the 'elastic stop', the point where the band feels like a regular string. Most competitor's bands are not to be stretched more than 3 times their resting length, while a MoVeS Band achieves easily the double, maintaining its amazing elasticity.

These specifications apply to all MoVeS resistances. The high-quality material enables you to have a much wider array of resistances and possibilities compared to the competitors. At the start of your exercise, the band already gives some resistance, which allows you to achieve much better results than when the band is at its resting length.

Note:

- 50% elongation = 1,5 x lay-flat length
- 100% elongation = 2 x lay-flat length
- 150% elongation = 2,5 x lay-flat length

MoVeS Band MD CE

MoVeS Bands are premium quality, low powder (in fact, less than 2mg/dm², so we're officially powder-free) latex resistive exercise bands. The unique Snap-Stop® fabrication process makes this product extremely tear resistant. Using the MoVeS Bands for resistive exercises provides positive as well as negative forces on the muscles and improves the range of motion, the strength and the cooperation of the muscle groups. The 8 different resistance levels are determined by the thickness of the band. MoVeS bands are available in 5 lengths and come with a full colour manual. The band has a width of +/- 127mm.

Dispenser 25 bands of 1,5m in a nicely designed OTC dispenser box. Each band comes in a separate polybag.

- 1,5m 10 pre-cut bands of the same resistance or 5 pieces of different resistance (yellow, red, green, blue and black). Each band comes in a separate polybag with header and barcode.
- 2,5m 10 pre-cut pieces of the same resistance or 5 pieces of different resistance (yellow, red, green, blue and black). Each band comes in a separate polybag with header and barcode.
- 5,5m One small roll of our premium band.
- 22,5m One medium roll of our premium band.
- 45,5m One large roll of our premium band.

Resistance - MoVeS Latex-Free Band vs. Market Leader

Research and development is high on our list for MoVeS products. As an example, these continuous efforts have brought us the Snap-Stop feature for the regular MoVeS Band.

Now, we have improved our Latex-Free Bands. The MoVeS Latex-Free Band has been optimised by using an innovative mix of raw material. Following customer demand, the grip has been improved. Resistance levels are similar to the 'old' latex-free band.

MoVeS Band:
Best combination of resistance / linearity

Market Leader:
Non-linear behaviour

Other alternative:
Very low resistance

We are confident that MoVeS Latex-Free Bands are one of the best latex-free resistive exercise bands on the market. The elasticity and linearity are simply amazing. Finally people who don't support latex can exercise with the same high quality specifications. MoVeS Latex-Free bands start from high quality thermoplastic elastomer (TPE), so it's non-toxic and completely PVC and phthalate free.

The linearity from how the strength per elongation evolves is one of the most important specifications as it offers the possibility to apply a very extended range of exercises without risking an injury due to strange unexpected product behaviour. Latex-free alternatives will reach their 'elastic stop' more quickly; this is the point where the band feels like a regular string.

We notice a growing demand and trend for latex free products. For instance, more and more hospitals and centers aim to be completely latex free to avoid possible allergic reactions for their patients or staff. After extensive research and development, we were able to launch our MoVeS Latex-Free Bands. A product which we are extremely proud of.

Thanks to our technological leadership, we achieve a Latex-Free exercise band with characteristics that were never before so close to its latex counterpart. With an exceptional 'resistance vs. elongation' linearity, we are confident our MoVeS Latex-Free Band is the best product to fulfil your needs. The 5 different resistance levels are determined by the thickness of the band. These bands are available in 3 lengths and come with a full colour manual. The band has a width of +/- 100mm.

- 1,5m 10 pre-cut bands of the same resistance or 5 pieces of different resistance (yellow, red, green, blue and black). Each band comes in a separate polybag with header.
- 5,5m One small roll of our latex free band.
- 45,5m One large roll of our latex free band.

MoVeS Tube

The MoVeS Tube is a high quality tube created by an intensive dipping process. The dipping process guarantees a multi-layered tube, which ensures a strong and safe training product. Extruded tubes are very susceptible to damage and can easily snap, this is not the case for our multi-layered dipped tubes. In general, dipped tubes are even more durable than bands, especially when used on a coarse surface.

MoVeS Tubes are available as a ready to use product - 120cm length with handles straight out of a polybag - and in rolls - 7,5m or 30m packed in a nicely designed box.

The table below shows the exceptional strength to elongation linearity from our tubes.

COLOUR	TOTAL KG / ELONGATION %					
	50%	100%	150%	200%	250%	300%
Yellow	1,0	1,5	1,9	2,3	2,9	3,6

Black	3,4	4,4	5,4	6,2	7,1	8,1
Silver	4,0	5,4	6,5	7,7	8,1	9,5

Combine a roll with our Safety Handles for superior grip (p22).

MoVeS Tubes with Handles are very useful for physiotherapy and muscle training. These high quality and very resistant tubes are created to train all muscles in your body and improve body flexibility. The lighter resistances are perfect for physiotherapy or a light work-out, while the highest resistances will even convince the more trained athlete.

MoVeS Wide Loop

We offer wide loops (7,5cm) next to our regular loops (2,5cm) with the same resistances. Some users may prefer the wider loops for spreading the forces more evenly on their body parts, while others prefer the thicker narrow loops which won't roll-up while being stretched.

As your supplier for bands, tubes and loops, these wide loops fit perfectly in our range of resistive products to satisfy all users. Wide loops are also multi-layered and available in 6 resistances: from Extra Light (Tan) to Special Heavy (Black).

MoVeS Wide Loops:

MoVeS Loop

MoVeS Loops are extremely portable and unbelievably versatile products. They are very effective instruments for stretching and strengthening all muscle groups. The MoVeS Loop Set really is a "Gym on-the-go".

Our loops are also multi-layered which results in a more durable product. These thicker loops won't roll-up during exercising, avoiding the uncomfortable feeling from thinner alternatives.

They are available in 6 resistances: from Extra Light (Tan) to Special Heavy (Black). The loop set combines our most popular colours in a compact mesh bag. This affordable set is very useful to bring along wherever you go.

The production of MoVeS latex products start deep in the humid forests of Malaysia, where the best and strongest trees provide the natural latex rubber that will be processed from a milky fluid to your preferred resistive exercise band. When a tree is 5 - 6 years old, harvesting can begin: incisions are being made orthogonally in the bark of the tree, just deep enough to tap the latex vessels without harming the tree's growth. The fluid is collected in small buckets, a process known as rubber tapping.

Did you know that rubber trees combat greenhouse gases and thereby slowing down global warming? Additionally, latex harvesting helps prevent deforestation.

natural
100%
biodegradable

"This is why we are confident when using the words 'premium quality' when referring to MoVeS."

Only the best quality latex is being selected for MoVeS Bands. Production starts under the constant supervision of a team of scientists, ensuring an immaculate product quality. Latex sheets are produced, powdered, washed, dried and cut to the exact width. The amount of powder used is below the 2mg/dm² limit, which makes the MoVeS Bands officially powder-free. Each batch of latex sheeting that is produced, is subject to the meticulous inspection of our scientists by a series of laboratory experiments: colour-coding, dryness, tensile strength, tearing resistance, snapping resistance, ... During the rolling process, a 100% visual inspection is being conducted on both sides of the band. Indeed, before leaving the factory, every MoVeS product has been completely analysed, checked and examined to ensure premium product quality.

MoVeS FIT, for athletes and home use.

MoVeS FIT Bands are low powder (in fact, less than 2mg/dm², so we're officially powder-free) latex resistive exercise band with the same premium quality as the original MoVeS Bands. The difference is purely the alternative, more youthful colour sequence. The band comes in 6 different resistance levels which are determined by the thickness of the band, is available in 4 different lengths and comes with a full colour manual.

COLOUR	TOTAL KG / ELONGATION %					Compares to STANDARD

MoVeS FIT Tube

MDCE

MoVeS FIT

The MoVeS FIT Tube is a high quality tube created by an intensive dipping process. The dipping process guarantees a multi-layered tube, which ensures a strong and safe training product. Extruded tubes are very susceptible to damage and can easily snap, this is not the case for our multi-layered dipped tubes. In general, dipped tubes are even more durable than bands, especially when used on a coarse surface.

MoVeS FIT Tubes are available as a ready to use product in 30m rolls, packed in a great dispenser box. Safety Handles offer an unlimited amount of exercises and superior grip.

MoVeS FIT Tubes are available in 6 different colours. The table below shows the resistance and to which standard colour it relates.

COLOUR	TOTAL KG / ELONGATION %					Compares to STANDARD
	50%	100%	150%	200%	250%	
Peach	1,0	1,5	1,9	2,3	2,9	Yellow
Orange	1,4	2,0	2,5	2,8	3,4	Red

MoVeS FIT Loop

MDCE

MoVeS FIT

Our high quality and cost effective loops are also available in FIT colours. MoVeS FIT Loops are easy to use and very versatile. You can stretch and strengthen all muscle groups.

Our loops are multi-layered, this results in a more durable product. Our thicker loops won't roll-up during exercising, avoiding the uncomfortable feeling from thinner alternatives.

Our loop set combines our most popular colours in a compact mesh bag. This affordable set is very useful to bring along wherever you go.

MoVeS FIT Loops:
High quality, cost effective and easy to use!

Multi-Grip Exerciser MD CE

The Multi-Grip™ Exerciser is designed to provide unlimited exercise options to users who want to do various high impact performance exercises. Each exerciser contains both large and small loops that are easy to grip. Use the small loops as an anchor or for finger exercises. Use the larger loops around the hands and feet to perform high impact upper and lower body exercises. Easily change resistance by moving 1 loop up or down the exerciser, or using a different resistance progressively exercise with 8 different colour-coded resistance levels.

The Multi-Grip™ Exerciser is made of an unscented cloth that can be washed and dried. It does not contain latex or a powder coating.

MoVeS Knee Rope Pulley

MD

CE

The MoVeS Knee Rope Pulley helps increase range of knee motion. This easy-to-use product can be mounted in a doorway to help you recover from or prevent knee injuries.

While sitting on a chair, put your foot into the ankle strap. A rope starts from the ankle strap, goes through a pulley and ends at a wooden handle designed for a 2-handed grip. Pull your foot carefully upwards by moving the handle towards your abdomen which will generate a rotational movement at your knee.

The rope length can easily be adjusted at the handle while a print on the ankle strap helps you to secure your foot in the right position. The MoVeS Knee Rope Pulley comes in a full colour cardboard packaging with a pulley, wooden 2-handed handle, ankle strap, nylon cord and door anchor.

The spring loaded buttons of the MoVeS Flex-Ion isolate each digit, so the strong fingers cannot compensate for the weaker ones. This results in a better, faster and easier to control rehab process. MoVeS Flex-Ion is available in 6 colour coded units with gradual resistance. This gradual resistance helps the therapist measure progress. The ergonomic base adds comfort and stability. Comes with a full colour and multilingual instruction manual.

Digi-Extend

The Digi-Extend® is a unique therapy device that can isolate the extension of all five fingers and each of the individual finger joints. The product strengthens the intrinsic and extrinsic muscle groups to maximise extensor tendon gliding, joint motion, coordination and muscle function in the hand and forearm.

The Digi-Extend® focuses on the extensor mechanism of one or all fingers as it targets the area of the hand that needs rehabilitation. Patients can easily change the resistance levels and vary their hand positions for specific exercises to help maximise the exercise goals and prevent injury. The Digi-Extend® can also be used for finger adduction, abduction, blocking and flexion exercises. It is compact in design, high-tech, easy and comfortable to use as well as effective in helping patients reach their therapy goals. Four colour coded band resistance levels allow each muscle or joint to work at a comfortable level and build as increased strength is achieved.

Prohands Series

VIA™ is an entry level hand exerciser designed with young athletes in mind. It has a round, soft look, wide finger pistons for smoother function & improved finger performance.

The VIA™ is available in two tensions.

RESISTANCE	RESISTANCE (per digit)	VIA	UNIT
Light	1,5 kg	02-060102	1 pc
Medium	2,5 kg	02-060103	1 pc

PRO™ provides serious athletes with the most advanced hand exerciser in the world. The PRO™ features a larger profile, superior steel springs that resist wear, an integrated ergonomic palm bar for comfort.

The PRO™ is available in three tensions.

RESISTANCE	RESISTANCE (per digit)	PRO	UNIT
Medium	3,5kg	02-060303	1 pc
Heavy	4,5kg	02-060304	1 pc
Extra Heavy	5,5kg	02-060305	1 pc

Constant Force X-Tend

Unlike elastic-based exercisers that increase in resistance the further the unit is extended, Constant Force X-Tend uses retractable-based resistance, which keeps a constant level of resistance from start to finish.

Ergonomic in design, the Constant Force X-Tend works the Intrinsic and Extrinsic Extensors of the hand and can isolate MP/PIP/DIP joint motion.

It also allows each finger to exercise independently with smooth, consistent resistance, thus improving range of motion, endurance, strength and dexterity more effectively.

- Exercise each finger or thumb independently with smooth, consistent resistance to the intrinsic and extrinsic extensor muscles throughout their full range of motion.
- Improve range of motion, strength, dexterity, endurance, circulation for each finger as well as the hand, wrist and forearm.
- Ergonomic design fits comfortably in hand, and includes ability to isolate pip & dip joints.

COLOUR	RESISTANCE (per digit)	REFERENCE	UNIT
Light	0,11 kg	02-100403	1 pc
Medium	0,18 kg	02-100404	1 pc
Heavy	0,27 kg	02-100405	1 pc

not elastic
= constant force

VariGrip Therapy

Resistance adjustable per finger

The VariGrip Therapy has the ability to adjust tension in each individual finger, the resistance from each single finger knob can easily be adjusted. Resistance can be increased incrementally on the patient's need, which minimises over-compensation and strain. The VariGrip allows the patient to progress steadily between resistance levels. 5 different resistance levels are available.

Comparison Chart: VariGrip vs Digi-Flex® / Flex-Ion (kg per digit)

VariGrip	X-Light	Light	Medium	Heavy	X-Heavy
Digi-Flex® / Flex-Ion	0,7	1,4	2,3	3,2	4,1

Each VariGrip's highest resistance ends where the next VariGrip resistance starts. Any other hand exerciser increases from Light (1,4kg) to Medium (2,3kg). That's almost a 70% increase gap, which can cause an overload on the muscles, resulting in injuries. The seamless progress from one VariGrip to the other, supported by the padded finger and palm area, guarantees a safe recovery and better feel for those with sensitivity issues.

COLOUR	RESISTANCE (range per digit)	LEVEL	REFERENCE	UNIT

MoVeS Squeeze Balls & Eggs MD CE

The MoVeS Squeeze Ball is developed to provide a progressive sequence of 5 colours. It strengthens hands, fingers, forearms and will work the muscles separately or in tandem. The MoVeS Squeeze Ball can be used for rehab as well as for sports training or stress relief.

The MoVeS Squeeze Egg is ergonomically shaped to provide highly effective exercise for the rehabilitation and strengthening of weakened or injured fingers, hands and wrists. Because it is small and easy to use, you can exercise anywhere, anytime.

Available colours/resistances: yellow, red, green, blue and black.

The MoVeS Squeeze Balls & Eggs can help to:

- Rehabilitate post-operative/post-traumatic hands and arms.
- Restore function in hands, arms and shoulders following stroke.
- Reduce pain and stiffness in arthritic fingers, hands and wrists.
- Relax tense, sore muscles and reduce stress.
- Strengthen aging hands and arms.

Why Anti-Microbial Agents?

Anti-microbial agents kill bacterium without additives and resist growth of odour-causing microbes. MoVeS Comfort Putty contains natural anti-microbial without addition of toxic chemicals. This additive ensures the MoVeS Comfort Putty material retains the clean, non-greasy feel from day one. Cheaper alternatives on the market do not contain these agents. As a small amount of bacteria and other micro-organisms will always be present on the patient's hands and because putty should be stored in room temperature conditions, anti-microbial agents are a must to avoid the putty becoming the ideal breeding ground for bacteria and fungi. Anti-microbial agents extend the product's lifespan and improves its cleanliness.

MoVeS Comfort Putty

The MoVeS Comfort Putty does everything a great putty should do: it strengthens weakened grasp through exercise and is used for rehabilitative exercise or stress relief. It is odourless, does not stain and will not leave any residue on the patient's hands. MoVeS Comfort Putty is non-toxic, greaseless, hypo-allergenic and gluten and latex-free. MoVeS Comfort Putty is available in 6 colours/resistances and comes pre-packed.

Fit Stretch MD CE MoVeS

03-010301: Saehan Cycle - Home

Saehan Cycle CE Grip SAEHAN®

The Saehan Cycles are pedal exercisers aimed at increasing strength and flexibility. Both the Home and Clinical Saehan Cycles include attachments to fit the pedal exerciser to a chair or even a wheelchair. The pedal exerciser's length can be perfectly adjusted to the user when his feet are fitted in the pedals with foot straps. A convenient turning knob makes it possible to adjust the resistance (0 - 13 kg) which increases or decreases the effort, resulting in a progressive exercise programme.

The Clinical version from the Saehan Cycle has an even higher level of adjustability. The distance between pedal and crank can be adjusted and the resistance knob indicates the level selected.

Because the Saehan Cycle - Clinical is a product aimed at professionals, we offer various accessories to increase its flexibility and user's safety. Be aware these do only apply to the clinical cycle, not to the home cycle.

Wheeleo MD CE wheeleo® One hand for autonomy

Yesterday, you had the choice between a classic cane which is impractical because it is difficult to coordinate, does not help when it is in the air. No one likes having to use it because it highlights their difficulties... Or a rollator which requires two hands to use it, which stigmatizes as much as the cane, which is cumbersome and not easy to handle, let alone indoors (try walking through a door with a rollator!). Therefore, the walker is parked at the entrance of the house or apartment and leaves its user without help. Now there is the Wheeleo.

Reduced mobility presents 3 challenges:

- Keep the person moving;
- Reduce the risk of falling;
- Loss of autonomy.

Wheeleo, the rolling cane, is designed to offer a solution to these 3 challenges and offers additional benefits:

- Ease of handling, no special training required;
- **Walking** goes a lot **faster** than with a quadripod cane;
- **Safer walking** than with a quadripod cane, as there is constant ground contact;
- **One-handed use** while still maintaining constant ground contact, the other hand can be used to move an object, to open doors, ...
- **Minimal space required** and perfect for indoor use where a rollator is too big.
- **Reinforced stability:** the wheels offer a security system. A lateral push will result in a lateral movement, not a tilting/fall.

Reference	Description	Unit
03-060101	Wheeleo	1 pc

Wheeleo is a unique quadripod rolling cane used to improve mobility. It is designed with the aim of offering help without stigmatising the disability of its user.

It will make walking trips smoother and safer which will allow the user to maintain or **improve autonomy**.

The Wheeleo is used with one hand. Thanks to its 4 wheels, you do not have to lift it, which improves stability and **reduces the risk of falling**.

The Wheeleo is super easy to use. Ultra-intuitive, its user will always position it in the right place to guarantee its stability and balance.

An important feature of the Wheeleo is that it **does not require brakes** to prevent its user from falling. Thanks to its rolling design, the Wheeleo will always be placed in the right position for its user. When losing balance, the user will automatically push the Wheeleo in the right position that is comfortable for him, without lifting the Wheeleo. Adding brakes would be the same as replacing the Wheeleo with a regular cane because the brakes would block the wheels. As a consequence the Wheeleo would tilt and its user would possibly fall.

Faster and safer walking

MoVeS Wooden Incline Board

The incline board increases extension in the lower and upper back while stretching the calves. It can be used:

- to improve the general posture,
- to stretch the calf muscles of athletes, football players and sportspersons in general,
- to stretch the upper-leg muscles (Ischias),
- to increase extension in the lower and upper back.

MoVeS Wooden Incline Board - Ladder

The MoVeS Wooden Incline Board - Ladder is made out of natural birch wood and is very resistant. It is adjustable in 4 different angles (10°, 15°, 20° and 25°). After using the MoVeS Wooden Incline board, it can easily be folded to achieve its compact form when not in use

Triggerpoint Rollers €€

Massage rollers are used to put pressure on the muscles' triggerpoints and to loosen the tension in the muscles. Trigger points are often the cause of different pains.

Spiky Foam Roller

↕ 33cm
Ø 13cm

The Mambo Max Spiky Foam Roller is designed for deeper massage & acupuncture therapy. The spikes make it possible to get deeper into the muscles to relieve tension and soreness and to improve mobility. It also has a bi-directional zone for comfort when rolling along the spine. The Spiky Foam Roller is mainly used for stretching, self-massage, body support and stability exercises.

Hollow Foam Roller

The Mambo Max Hollow Foam Roller can easily help people who are experiencing long term pains. Its three-dimensional pattern with different shapes replicates the massage from a therapist's hands. The larger surfaces allow a superficial massage while the smaller shapes are designed for a deeper massage.

↔ 33cm
Ø 14cm

Ergonomic Foam Roller

↔ 33cm
Ø 15cm

The Mambo Max Ergonomic Foam Roller is a curved hollow foam roller, which enables more exercises. Except rolling back and forth, it's possible to make sideways movements. More muscles will be addressed through which the body will be toned even more. The soft foam in combination with the nipples is perfect for trigger point massages. The central groove will reduce pressure on the spine.

3-in-1 Foam roller

The Mambo Max 3-in-1 foam roller combines 3 different foam rollers in one package. Thanks to its smooth surface, the outer part is perfect for a superficial massage. The second part has grooves which can be used for a deeper massage and to exercise higher pressure on the trigger points. Finally, with the inner massage stick it's possible to exercise high pressure on sore muscles to improve blood circulation and the muscles' recovery time. This last item is available as a separate product too: The Mambo Max Massage Stick.

Aerobic Step €€

Step aerobics is a form of aerobics that is practised worldwide by millions of people. The reason for its popularity is simple, it offers a great cardio workout without the need for extensive space or equipment. While the aim of aerobics is to increase the body's consumption of oxygen, step aerobics builds on that goal by offering a more intense workout. The Mambo Max Aerobic Step provides this extra boost by incorporating the action of stepping onto the platform to intensify the workout. It is low impact, and doesn't stress the joints as much as running or jogging.

Wooden Balance Boards €€

The Mambo Max Wooden Balance Board is your perfect partner if you want to improve your balance on an ecologic and high-end product. The Wooden Balance board is available in 3 versions: Uni-Directional, Standard & Sport. Their different form and balance point make it possible to have 3 products with a very different character and level of difficulty.

Children and elderly could experience a balance board with pivot point as too challenging. The Uni-directional Balance Board offers more confidence. This enables the user to improve body stability without the fear of falling.

A Uni-directional Balance Board offers a more predictable training as it can only pivot in one direction. When turning the Balance board upside-down, the arches can be used as push-up grips. Once the user is ready for the next level of training, the Balance Board Rehab or Sport are ideal next steps in the process.

The Balance Board Standard is lower than the Balance Board Sport. In addition with its smoother pivot point, it reacts completely different than the Sport. It's a great middle step between the Balance Board Uni-Directional and Balance Board Sport.

The most challenging Balance Board is our Sport version, which, as the name specifies, makes it a real sport. Finding your balance and avoiding the edges touching the ground is hard and requires you to use all your muscles in your body. It's a great and fun way to exercise a full-body workout.

AB Peanut Ball €€

ANTI-BURST

The Mambo Max AB (Anti-Burst) Peanut ball helps users who struggle with the instability of a regular gym ball. The peanut shape offers extra sideways stability, which gives more confidence to start working out with Gym Balls.

Faster Blaster Pump

The Mambo Max AB Peanut Ball offers a more predictable therapy or fitness training as it can only roll in one direction. This certainly is a huge benefit for children, elderly or people who suffered an injury. In addition, Peanut Balls are very popular amongst pregnant women and are very helpful devices during labour.

Similar to our regular Mambo Max AB Gym Ball, the Peanut Ball is Anti-Burst: if the ball gets punctured by a sharp object the ball won't burst, thus reducing risk of injury.

The Mambo Max AB Peanut Ball comes in a Mambo Max cardboard retail pack, including Faster Blaster Pump and Plug.

Balance Pad Pro €€

This balance pad is a great training tool to improve your balance, stability, flexibility, strength and motor skills. The Balance Pad Pro creates more instability than our regular Balance Pad, so you constantly need to correct body posture, making the exercises just that bit tougher. This new balance pad is made out of PU-material instead of EVA-foam, which makes it more durable and less prone to small damages.

Dimensions: 40 x 50 x 6cm

Reference	Description	Unit
05-040304	Mambo Max Balance Pad Pro Rectangular Blue NEW	1 pc

Balance Pad €€

This EVA-foam balance pad provides the comfortable exercise environment needed to perform reinforcing balance exercises. Its soft and thus unstable surface challenges the user to work the foot-, ankle-, and leg muscles.

Available in three versions:
1 rectangular right angle shaped pad, 50 x 40 x 6 (cm), blue
1 rectangular chamfered shaped pad, 50 x 40 x 6 (cm), anthracite
2 oval shaped pads, 36 x 22 x 6 (cm) - sold per pair

Medicine Ball

A medicine ball (also known as an exercise ball, a med ball, or a fitness ball) is often used for strength training as it plays an important role in the field of sports medicine. Medicine ball training is one of the oldest forms of strength and conditioning training – the first reference to wrestlers training with sand filled bladders appears in Persia nearly 3000 years ago. In ancient Greece the physician Hippocrates had his patients throw them back and forth for injury prevention.

cb m Para Pro - Paraffin Bath

The Para Pro is a professional paraffin wax heating bath which is made to be used on 220/230 Volt power sockets and which can be used 24/7. In combination with our premium paraffin pearls it only needs between 2 and 3 hours to completely melt 2,5kg of paraffin. The temperature is adjustable from 40-60°C and is easy to control due to the digital thermometer.

Includes heat holding gloves & 10 pairs of disposable gloves

When ordering the Para Pro, you receive 2,5kg of white paraffin pearls or 6 blocks (2,72kg) of Tea Tree Green Paraffin free of charge.

Para Pro Specifications:

- Outer dimensions: 39cm x 25cm x 18cm (l x w x h)
- Inner dimensions: 32,5cm x 18cm x 13cm (l x w x h)
- Weight: 3,1kg
- 220 V: No transformer needed, which will lengthen the durability.
- Low power consumption once the paraffin has melted
- 24-hours a day fully operational
- **Fast melting between 2 - 3 hours!**
- Adjustable temperature (40 - 60°C)
- Digital thermometer

Paraffin Blocks:

- Green fully refined paraffin wax
- Melting point: 46°C
- Tea Tree scented

Paraffin Pearls:

- White fully refined paraffin wax
- Congealing point: 53°C
- Melting point: +/- 54°C
- Meets the purity requirements of BGA1, Ph.EUR.2 and FDA3

1. Bundesgesundheitsamt recommendation No. XXV B II;
2. European Pharmacopoeia, current edition;
3. Food and Drug Administration, § 172.886 Petroleum Wax

cb m PearlPack

PearlPacks are reusable Hot/Cold Packs filled with small pearls. Hot and Cold Therapy can be applied to relieve pain and inflammations associated with muscle strain and sprain. This dual applicability makes them a strong alternative to ordinary heating pillows and ice packs. The small pearls absorb heat or cold, which they can retain for 20 minutes. During these 20 minutes, these packs will relieve a part of the pain.

Not only do they look good, the products are very convenient in use. PearlPacks won't feel wet nor drip after freezing or heating them, avoiding a mess. All materials used are non-toxic and odourless.

Besides relieving pain from an injury or muscle strain, hot/cold packs are often used to reduce swelling after an operation. PearlPacks truly are multifunctional products.

PearlPack Knee/Elbow

This offers a solution for Hot/Cold therapy on the knee or elbow joints. The large opening ensures that your knee or elbow remains free and can continue to move freely, while the Pearl technology sends direct relief to the pain. The flexible velcro strap keeps the pack firmly in place.

07-040301

PearlPack Eye Mask

This mask adapts to the patient's face and has a fabric strap. Hot treatment can be applied when eyes feel dry or if there's an infection of the eyelid. Cold treatment will help when suffering from headaches, swollen eyes or sinusitis.

07-041101

PearlPack Back Wrap

This large pack divided in 3 segments is equipped with velcro strap. It fits perfectly around the patient's waist for an optimal pain relief on the back. The pearls can be pushed from one segment to the other if one area of the back needs less or more thermal treatment.

07-040201

PearlPack Sports Pack + strap

The Pearl Pack Sport pack is updated and now comes with a velcro strap.

Roll-On Pack

MoVeS Roll-On packs combine hot/cold treatment with practicality. The tubular shape and flexible material allow an easy roll-on application, even after being heated or frozen. The various sizes will fit perfectly over finger, wrist, ankle or knee. This design ensures that the whole area will benefit from the hot or cold treatment.

From the same factory as the original Torex® products. Reusable, non-toxic and latex free. Available in 5 sizes.

Hot/Cold Pack

The MoVeS Hot/Cold Packs are usable for hot as well as cold therapy. This dual applicability makes them a strong alternative to ordinary heating pillows and ice packs. The versatile, reusable packs deliver hot and cold therapy effectively and economically. The use of the MoVeS Hot/Cold Pack is unlimited and its material is non-toxic. Even below -20°C it remains soft. The MoVeS Hot/Cold Pack can be bent in any angle, allowing maximum coverage of joint and muscle. All Hot/Cold Packs can be heated in the microwave and can be frozen in the freezer. Temperature holds for approximately 30 minutes.

MoVeS Hot/Cold Pack | Classic - Gel

The classic (and economical) transparent Hot/Cold Pack. The special gel is non-toxic and biodegradable.

MoVeS Hot/Cold Pack | Standard - Gel

Our standard Hot/Cold Pack is a nylon covered gelpack. The special gel is non-toxic and biodegradable.

MoVeS Hot/Cold Pack | Soft Touch - Clay

The Soft Touch is improved with a more user friendly surface. The frost-free surface allows usage in direct contact with the skin. Filled with clay, a 100% natural product.

08-020101: Hydraulic Pinch Gauge

Uses the improved hydraulic system of the hand dynamometer to assure convenience, product reliability, measurement accuracy and repeatability. This results in a more accurate test result for all pinch tests.

08-020101

Squeeze Dynamometer €€

Grip SAEHAN®

Quality Soft Pouch Case

The Squeeze (bulb) Dynamometer is the inexpensive device to reliably measure hand and finger strength. The dynamometer has an indicator dial that remains at the maximum reading until reset. Unit is calibrated in pounds and kilograms.

Range: 0 - 70kg (150lb)

Reference	Description	Unit
08-010301	Saehan Squeeze Dynamometer 70kg	1 pc

Back-Leg-Chest Dynamometer €€

Measure strength of back, leg and chest. Base provides secure footing. Chain length is adjustable to accommodate for height differences or to vary the point of force application. Shows pounds and kilograms. Pointer remains at maximum until reset. Comes fully assembled with 1,5m chain. Range: 0 - 300kg (660lb)

Reference	Description	Unit
08-010601	Saehan Back-Leg-Chest Dynamometer	1 pc

Grip SAEHAN®

Fat Caliper €€

08-040101

Professional light-weight aluminium caliper. Measurement arms with floating tips to assure accurate and reproducible results. 65mm scale is large and easy to read. Corrective scale for sex and age included in multilingual manual.

- Professional, very accurate unit with spring loaded levers and low-pressure bearings for constant pressure.
- Scale permits reading up to 65mm
- Aluminium casted to insure years of reliable use.
- Includes carrying case
- CE marked and FDA approved

Quality Soft Pouch Case

SAEHAN®

08-040104
MD CE

The Plastic Skinfold Caliper from Baseline is the inexpensive alternative for skinfold analysis. Spring loaded arm assures reproducible “pinch”. Read directly from the 50mm scale. Ideal instrument for screening large population. The Plastic Skinfold Caliper comes with a booklet and tables.

08-040102

The FatTrack® FITNESS TK Body Transformation Toolkit enables you to measure (and track) Body Fat %, Lean Body Mass, your workouts, macronutrient information and more by yourself - Easily, accurately and in the privacy of your own home!

Each FatTrack FITNESS TK Includes:

- Updated FatTrack® Fitness Digital Body Fat Caliper
- User Manual with instructions
- Body Tracker Software
- MyoTape Body Tape Measure
- FREE copy of “Improve Your Measuring Skill” with practical pointers for getting the best measurement readings and valuable information on ideal weight and muscle mass.

08-050302	Tuning Fork 256cps	1 pc

Inclinometer MD €€

Baseline's Bubble and Digital Inclinometers are used to measure range-of-motion (ROM).

Some neck and back measurement protocols require the simultaneous use of 2 inclinometers.

Quality Hard Case Box

Reference	Description	Unit
08-060101	Baseline Bubble Inclinometer	1 pc
08-060201	Baseline Digital Inclinometer	1 pc

Scoliometer MD €€

Scoliometers are inclinometers designed to measure trunk asymmetry or Angle of Truncal Rotation (ATR) used in scoliosis screening programmes. They are small, non-invasive devices which are placed over the spine while a person is in a forward bending position. The scoliometer reading indicates degree of trunk asymmetry (rotation). Research shows that most people have a small degree of spinal rotation. However, depending on the measurement, spinal rotation is a possible indicator that scoliosis may be present.

Neurological Reflex Instruments MD CE

08-050101: Buck Hammer
Two heads for cutaneous sensation evaluation. Comes with a needle and a brush.

08-050102: Babinski Hammer
Pointed bottom can be used as gross aesthesiometer.

08-050103: Taylor Hammer
Use to elicit responses during examination

08-050104: Dejerine Hammer
This hammer is used for testing deep tendon reflexes in a diagnostic evaluation. It features a double-sided head composed of two rounded rubber surfaces for increased patient comfort.

08-050201: Wartenberg Pinwheel
Elicit cutaneous sensory and pain perception responses.

08-050105: Troemner Hammer
This hammer is shaped like a two-headed mallet. The larger mallet is used to elicit tendon stretch reflexes, and the smaller mallet is used to elicit percussion myotonia.

TENS device MD CE

- The Neuropex TENS is accepted to be far more accurate than a standard TENS machine.
- Highly user friendly with 3 programs and modes:
 - B (burst)
 - C (continuous)
 - M (Pulse Rate Modulation)
 - Regulated pulse width control for adjustable intensity and stimulation strength
 - Clear plastic window allows controls to be viewed during operation
 - Easy to use and very compact
 - Adjustable intensity and stimulation strength
 - Protective case for easy electrode storage and transportation
 - Complete set of electrodes, in-built timer, complimentary spare battery

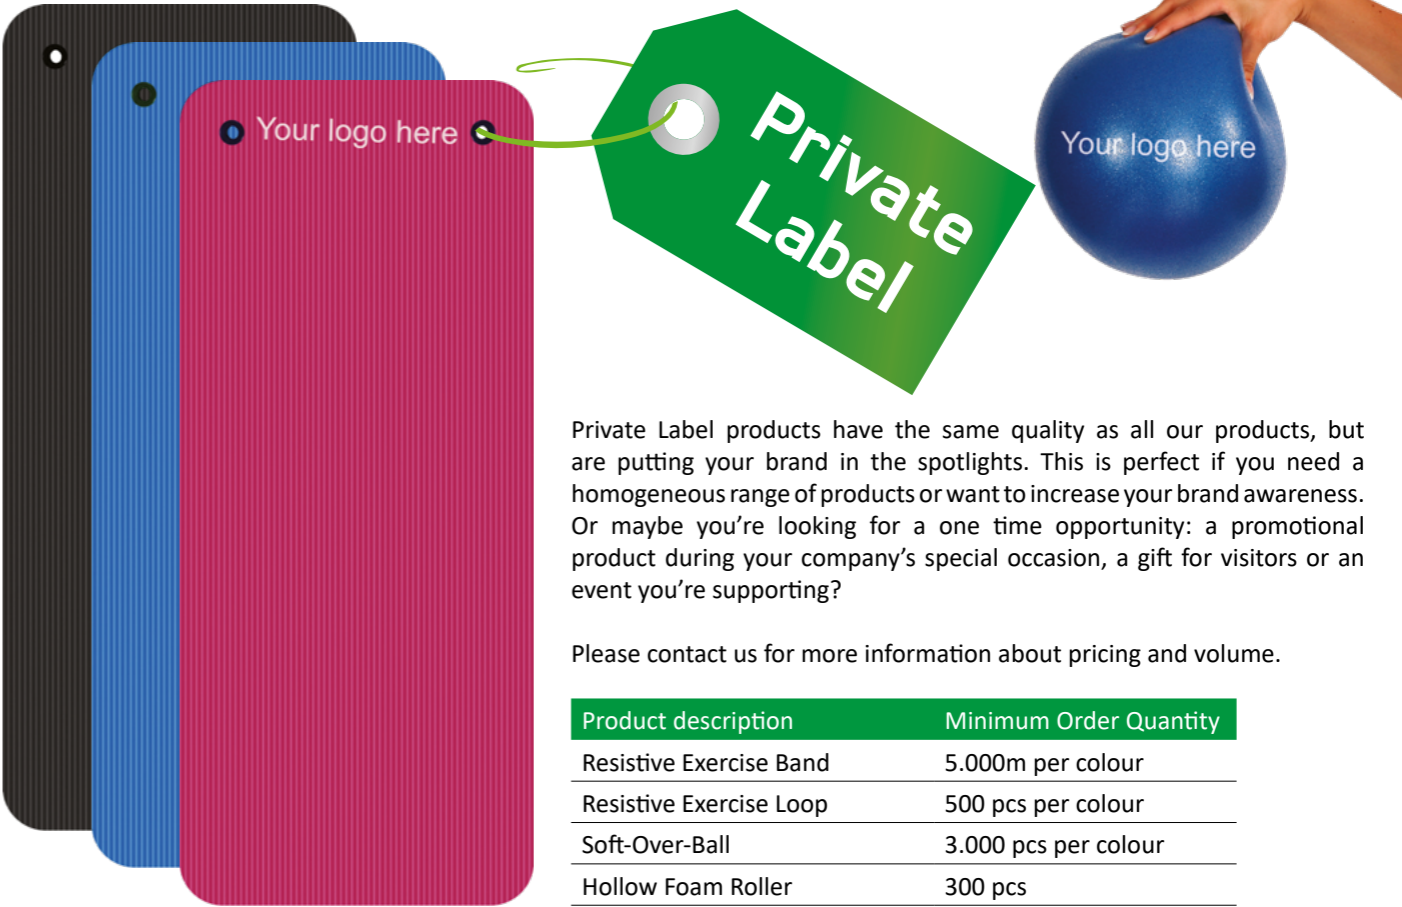

- Neuropex Long Lasting Self-Adhesive Electrodes
- Resealable pouch for safe storage
 - 4 Electrodes per pack
 - 50mm x 50mm
 - Ideal for use with all Neuropex TENS and Interferential devices

PRIVATE LABEL

We have nice products, but you would like your own brand or your customer's name on the band, loop, superloop...? We'll do it! Together with our manufacturers from all the products in our range, we can create your desired product with the look you want. We can replace our logo with yours, change the colour, even the packaging can be tweaked to your needs. Private Labels will allow you to design the product the way you want to match it to your company's or customer's identity.

Private Label products have the same quality as all our products, but are putting your brand in the spotlights. This is perfect if you need a homogeneous range of products or want to increase your brand awareness. Or maybe you're looking for a one time opportunity: a promotional product during your company's special occasion, a gift for visitors or an event you're supporting?

Please contact us for more information about pricing and volume.

MVS IN MOTION CALIBRATION SERVICE

Measurement Instruments are calibrated at manufacturing with a full one year guarantee, before sending them to users all over the world. Ideally, these instruments should be recalibrated every year.

In order to make this happen in an easy and inexpensive way, Hydraulic Hand Dynamometers (Saehan, Jamar, Baseline...) and Hydraulic Pinch Gauges are recalibrated by our experts at the MVS In Motion Centre in Tisselt - Belgium. This operation consists of re-establishing the exact relationship between the force applied to a dynamometer and the measurement it shows. Small repairs can be done as well.

Simply send your request to our customer service department for a return authorisation. After each recalibration, you will receive an updated calibration certificate, certifying accurate and repeatable test results.

If you have many calibrations to do, you might consider buying your own calibration unit.

MVS IN MOTION REPAIR CENTRE

Since machines are designed and assembled by humans, they are not flawless. That is why MVS In Motion installed an inhouse repair centre, to swiftly and correctly solve any problems that may occur with our products.

No matter what the cause, be it faulty fabrication or misuse, our technician will shine his light on the problem.

Send an email to our customer service department to inform us on the type of problem and the serial number/ production date of the device. After our authorisation, please send over the patient, accompanied by your name and client number and a brief description of the symptoms to info@mvs-in-motion.com. We'll do our best to have him cured in no time.

TERMS & CONDITIONS ///

1. Terms: Prepayment, unless otherwise specified. Buyer should bear all bank charges.
2. Minimum purchase value: An administration fee of €10,00 will be added on all orders below the minimum purchase value of €250,00.
3. Freight Terms: Prices are ex-works Tisselt, Belgium. All shipping/delivery costs are at charge of the buyer, unless otherwise specified. Visible damage to goods delivered, not duly noted on the consignment note of the carrier, cannot be compensated in any form.
4. Prices: All prices for merchandise purchased are based on seller's price list in effect on the time of the order. Prices can be subject to change without notice.
5. Claims: Unless otherwise provided for herein, claims of any kind in goods sold by seller shall be made by buyer to seller, in writing, within a period of seven days after such goods are delivered to buyer.
6. Credit and Exchange: Written authorisation must be obtained before returning merchandise for credit or exchange! Prior to return, buyer shall furnish seller an itemized inventory of the products to be returned, and any other information seller may request, such as product lot number, manufacturing date, expiration date, ... In no event shall seller accept products for return more than thirty (30) days after delivery by seller to buyer and products which are damaged, used or not in their original and unopened packaging. Seller will charge a handling fee of ten percent (10%) of the returned goods.
7. Finance Charge: A finance charge of 1% per month (12 % per annum) will be added to all amounts past due. A penalty of 15% on value, with a minimum of €40,00, for late payment will be added. Terms of payment are from date seller's invoice and not contingent upon delivery.
8. Governing Law: All disputes arising out of all sales by seller to buyer shall be governed by the laws of Belgium and place of jurisdiction is Antwerp, section Mechelen.
9. Warranties: Seller warrants that it has good title to the goods purchased by buyer and that its goods will conform to buyer's specifications, if any, except as otherwise provided herein. All other warranties, whether express or implied, and including, but not limited to, the warranty of merchantability and fitness for a particular purpose are excluded. In all events, buyer's sole and exclusive remedy shall be limited to the amount of the purchase price of any product on which a claim is made as its exclusive remedy for breach of the warranty expressed herein and for negligence and otherwise. Seller reserves the right to repair or replace warranted products in its discretion. Under no circumstances shall seller be liable to buyer or any other person for consequential or incidental damages.
10. Property: Seller has the exclusive property on the delivered products until buyer has paid the full amount due. This also implies that if buyer does not pay in time, seller has the right to, without prenotice, claim back the delivered goods.
