your company's future

THE CHALLENGE

Healthcare systems across Europe have been heading towards digital transformation for the last decade but it has been a slow process.

Can connected DIHs help?

OUR ANSWER – CONNECTING THE DOTS 1/2

They have a “political” endorsement and technical competences to mind the gap between demand and supply side.

We strongly believe that **if they act as a connected system**, they can accelerate the identification of **answers** to unmet needs.

OUR ANSWER – CONNECTING THE DOTS 2/2

They are an ideal partner of the smart healthcare ecosystem because they provide

- **Access to Infrastructure**
- **Support in analyzing Investments, the business models & sustasinability**
 - **Empowerment (of the demand and supply side)**
 - **Data focused services**
 - **Outreach to ecosystems**

STATE OF THE ART

1 Topic:
Digital Health & Technologies

24 DIHs

1 Coordinator

THE MODEL

The network is

- Based on the voluntary commitment of its stakeholders
 - Not legally established
- Coordinated by Nerosubianco (and other coordinators will come, hopefully)

The network will

- Focus on identifying the most effective cooperation mechanisms
 - Work to expand its geographical outreach to all EU27 MS

THE ACTION PLAN

TOPICS

- Silver generation focused solutions & assistive technologies
- Digital empowerment & health literacy
- Artificial Intelligence
- Data Driven Decision Support
- Smart Medical Devices
- Use and Reuse of Health Data

ROLL OUT

- 3 HE focused Working Groups
- Dedicated unit to establish corridors among participating DIHs
- Test before invest trials
- Connections with running projects («living links» to SMEs & start ups)

GOALS TO BE REACHED BY END OF 2021

- Launch 2 thematic focused initiatives
 - Establish 4 DIH Corridors
- Formally connect to the institutional EU platforms that are focusing on digital health and complementary topics
- Finalize a Business Plan & legal structure for 2022-2023 and attract resources to manage the network in a sustainable way
