

# Module: Climate Neutrality

📍 Lake Iseo (Italy)

## About the module

The transition to Climate neutrality is the greatest challenge and opportunity for Europe to create a future-ready economy and societal well-being. The module aims to raise awareness of the European long-term strategy to be climate-neutral by 2050.

Participants focus on the concept and definition of climate neutrality, exploring perspectives, methodologies, and challenges related to its achievement.

It focuses on the concept and definition of climate neutrality, exploring perspectives, methodologies, and challenges related to its achievement. During the 3-day work session, was organized a public conference about the climate change, its economic impact and the importance of civic participation in sharing concrete data, aimed at raising awareness on the topic. Participants shared personal experiences and local best practices already implemented.

COMMUNAUTÉ DE COMMUNES DU  
LAC D'AIGUEZELETTE

## Location

The Lake is named after Iseo, medieval town of 9.200 inhabitants on the south-eastern shore, and is the fourth largest lake in Lombardy, Italy, fed by the Oglio river. Lake Iseo has been attracting writers and artists, thinkers and curious tourists from all over the world for a long time. It is an enchanting and romantic lake surrounded by olive and chestnut trees, set like a jewel among the mountains and embraced by hills that gently and gradually slope down towards Franciacorta, an area of extraordinary wines.

## The event

The event involved 41 citizens including project partners from Spain, France, Greece and Finland. Location / Dates: The event took place in Iseo, Italy from 23/05/2022 to 27/05/2022.

2

day work session

41

citizens

The aim of the event was to gather citizens around Lake Iseo to discuss the transition to Climate neutrality that is the greatest challenge and opportunity for Europe to create a future-ready economy and societal well-being.
