- ✓ Zip Ties
- ✓ Cable Ties

Available in the following colours:

Installation Guide

Strap Installation:

Step A – Insert prongs into aperture and “click” secure. The strap will “stay in place” for future jobs! – No need to remove!

Step B - Wrap strap around tube, locate ‘T’ aperture over lug and secure.

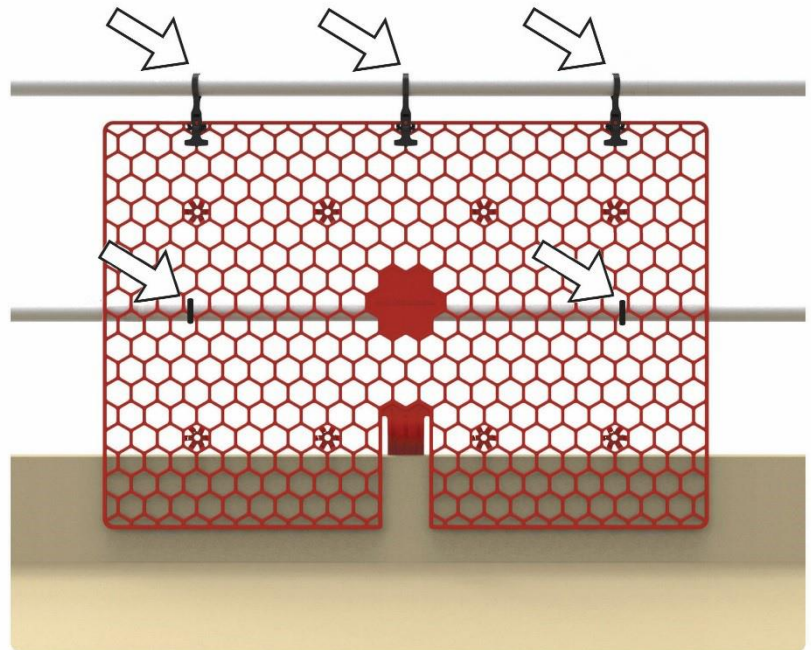

To Release:

Step C - Pull down on “T bar” to release.

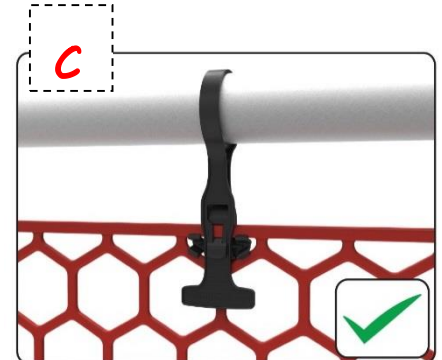

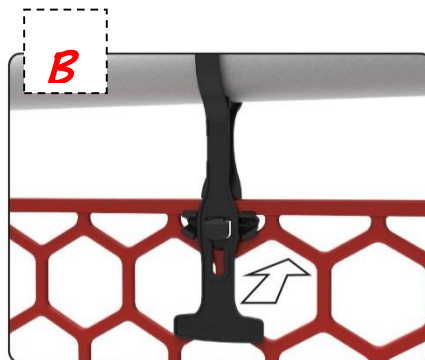

Recommended Safety Advice:

- ✓ We recommend that Hexguard is attached using three straps or cable ties on the top rail and two cable ties on the middle rail, as shown opposite.
- ✓ Always release straps or ties from rails before removing the Hexguard panel.
- ✓ We recommend stacking Hexguard in bundles of 25 panels. Hexguard should only be strapped using synthetic cord strap. Do not use steel banding.
- ✓ Never drop Hexguard off scaffolding as this may harm people below.

*Our unique installation system ensures that securing Hexguard© is as simple as **A, B, C!***

Example of recommended installation
