

## What is COBIT® 5 Foundation?

This COBIT Foundation course is a three day, PEOPLECERT-accredited course, which looks at the drivers for this latest version of COBIT. The five basic principles on which COBIT 5 is founded and the enablers for governance and management of enterprise IT which support the integration between the goals, objectives, controls and processes of the business and IT. The course includes an introduction to COBIT 5 implementation and the concepts relating to the Process Assessment Model.

This COBIT Foundation course comprises lectures, group discussion, assignments, a sample examination paper and other guidance to prepare attendees for the PEOPLECERT-accredited examination. The COBIT Foundation course activities are reinforced through the trainer's proven implementation track record. The course content is based on COBIT 5, including the framework and other supporting documentation.

## Target Audience

The course is suitable for business managers, chief executives, IT/IS auditors, internal auditors, information security and IT practitioners, consultants and IT/IS managers requiring an insight into the enterprise governance of IT and who may also be requiring certification as a COBIT 5 implementer or assessor.

## Course Objectives
