

Digital Learning through Music Technology

Expressive Arts

An essential course for all pupils interested in Sound Engineering.

You will learn about all aspects of sound engineering including studio recording, live sound, music for gaming and music for radio and film.

N4 Music Technology unit - Music Technology in Context

Learning Intentions & Success Criteria

Learning Intentions

I will:

- learn how to set up the correct equipment for a live band/artist.
- learn how to recognise the functions on a mixing desk.
- learn how to use the main function of Reaper and Protools sound recording software.
- learn how Sound Engineers link and interact with other people in the music industry including performers, agencies, venues.

Success Criteria

I can:

- choose the correct equipment to amplify or record a sound source and set it up safely.
- use a mixing desk correctly to improve the quality of sounds being mixed.
- correctly set up a complete sound path through a PC, record a sound source and apply suitable processors and effects to improve the quality of the recording.

Senior Phase Progression

N5 Music Technology
