

Numeracy through Maths Challenge

Mathematics & Computing

Put your problem solving & team work to the test!

You will learn the techniques used to solve mathematical problems involving reasoning and logic by completing a series of group or team tasks and puzzles.

Skills Focus

Recognition of Achievement

UKMT Junior Challenge / Maths wi' nae borders / Various other competitions

Learning Intentions & Success Criteria

Learning Intentions

I will:

- learn to create a mathematical model to help aid our problem solving.
- work effectively in small teams to collaborate, think logically and produce mathematically correct solutions.

Success Criteria

I can:

- work effectively in a small team, contributing my ideas.
- use effective strategies to problem solve and find a solution to a mathematical problem.
- think logically to determine a series of steps to find a solution to a problem.
- approach problems with an open mind to develop my resilience.
