

Mobile and Strategic Clinical Solutions

National Framework Agreement Launched November 2014

The first of its kind, this Framework Agreement offers access to managed services (including staff) offering a fully bespoke clinical solution, within the imaging or theatre environment.

- **You** choose the service provision
- **You** choose the length of the contract
- **You** choose the supplier.

We provide the procurement solution and contract management support.

What do we offer?

A range of services, from tactical short term services to strategic longer term flexible solutions.

- Mobile services - Imaging
- Mobile services - Operating theatres
- Strategic clinical solutions - Imaging
- Strategic clinical solutions - Operating theatres
- Ultrasound services.

All solutions will provide **one member of staff** as a minimum, through to a fully staffed strategic service.

Framework Agreement Compliance

All suppliers awarded to this framework agreement are;

- Care Quality Commission registered - meet essential standards (to the relevant sections dependant on service provision)
- Hold a Monitor provider licence (if relevant)
- Provide Disclosure and Barring Service (DBS) checked staff
- Insurance of a minimum of £5 million.

All solutions will provide one member of staff as a minimum, through to a fully staffed strategic service.

Key benefits to the Framework Agreement

- Guaranteed compliance with EU Public Procurement Regulations when procuring via NHS Supply Chain.
- No need to undertake your own OJEU tender and contract processes, saving you time and money.
- Bespoke template contracts and terms and conditions developed for and by NHS Supply Chain specifically for this Framework.
- Close governance of an open book contract for transparency.
- Supplier management.
- Free of charge support throughout the process from business case, to contract signature, and beyond.
- Dedicated team focussed solely on the Mobile and Strategic Clinical Solutions market as part of a wider Services Team.

When would the service be used?

- Cover the gap between old equipment being de-commissioned and new equipment being installed.
- To continue patient services during an emergency situation, where a fixed site becomes inoperable.
- Meet key service related targets i.e. mobile theatres to meet the 18 week guidelines.
- Enable the general practice community to commission locally delivered services, such as ultrasound.
