<b>Notes</b>	<p>The medians for residents of foreign birth are generally less than one is due to the clustering of such immigrants into neighbourhoods.</p> <p>Country of birth is the country in which a person was born. The country of birth question on the 2011 Census included six tick box responses - one for each of the four parts of the UK, one for the Republic of Ireland, and one for 'Elsewhere'. Where a person ticked 'Elsewhere', they were asked to write in the current name of the country in which they were born. Responses are assigned codes based on the National Statistics Country Classification.</p> <p>The grouping of countries within the classification is broadly regional, but takes into account the grouping of European Union (EU) countries. Countries in the EU are grouped into those that were EU members in March 2001, and those that became members (Accession countries) between April 2001 and March 2011 as part of the EU enlargement process.</p>
