

More Metrics now available on

We are pleased to advise that More Metrics data is now available through The **Snowflake Partner Network**. This unlocks the potential of the Data Cloud with a broad array of tools and partners. Certified partnerships and integrations enable customers to leverage Snowflake's flexibility, performance, and ease of use to deliver more meaningful data insights

Snowflake offers a secure, easy to access option for downloading and sharing data through the **Snowflake Marketplace** and will give new and existing customers even more options to access our **high performing non-PII, 100% coverage** data sets.

More Metrics data is provided at small geographical areas down to postcode. Sample data is **free to download** and test. We are making available a range of our popular data sets:

GeoIndex	Great for marketers, our easy-to-use indices of our leading data sets, including money, health and attitudinal data
GeoMoney	Income and debt data to assist with planning, selection and evaluation
GeoSociety	Insights into what people really care about and think on key issues
GeoHealth	Mortality, morbidity and other key health information
GeoPredictors	The extensive range of our most powerful modelling data
Postcode lookups	Statistical look ups for residential and business postcodes

Find our data on **Snowflake** at:

https://www.snowflake.com/snowflake-marketplace/?sf_s=more%20metrics

More Metrics is a specialist provider of powerful data sets on finance, health and attitudinal issues. All our products are based on open source, non-personal data making them GDPR friendly and ready to use. Full details of what More Metrics can offer can be found at www.moremetrics.co.uk.
