

# Reliable & Smart Dental Practice Telephone Systems

## Connect your Practice's Phones with Your Clinical System

Integrate your practice's phone system with your computer for instant access to patient management software (CRM). With patient files appearing automatically when they call, you can save time on every interaction while delivering a more professional and personalised experience.

Enjoy automatic patient record retrieval, click-to-call functionality, and seamless appointment reminders, reducing missed appointments and improving overall patient satisfaction.

# The Benefits at a Glance:

**Patient Record Integration** - Instantly access patient details when they call, saving time and improving service.

**Automated Appointment Reminders** - Reduce no-shows with SMS and voice reminders.

**Custom Call Routing** - Direct calls to the right team members for better patient support.

**VoIP & Cloud-Based Solutions** - Reliable, cost-effective, and scalable phone systems.
