the MSS difference

MSS Environmental is one of the fastest growing asbestos removal contractors in the UK. We have achieved this by successfully focusing on delivering major contracts safely, on time and to budget. We take small details seriously and pay attention to all the aspects of a project lifecycle.

your peace of mind

When commissioning an asbestos project, you need confidence that the people you choose can meet your expectations. MSS operates accredited systems and processes which enable us to control all aspects of a project from inception to completion. We are experts at managing risk, and will establish controls in collaboration with all stakeholders.

our approach

Maintaining an open and honest dialogue with our clients has been one of the keys to our success. We offer a personalised and reliable service to suit your needs. MSS processes are designed to be accessible to both our teams and yours, making it easy for you to deal with us. We are proactive in communicating with building users and other contractors who may be impacted by our planned works. We will wherever possible design our work areas to accommodate other activities.

project management

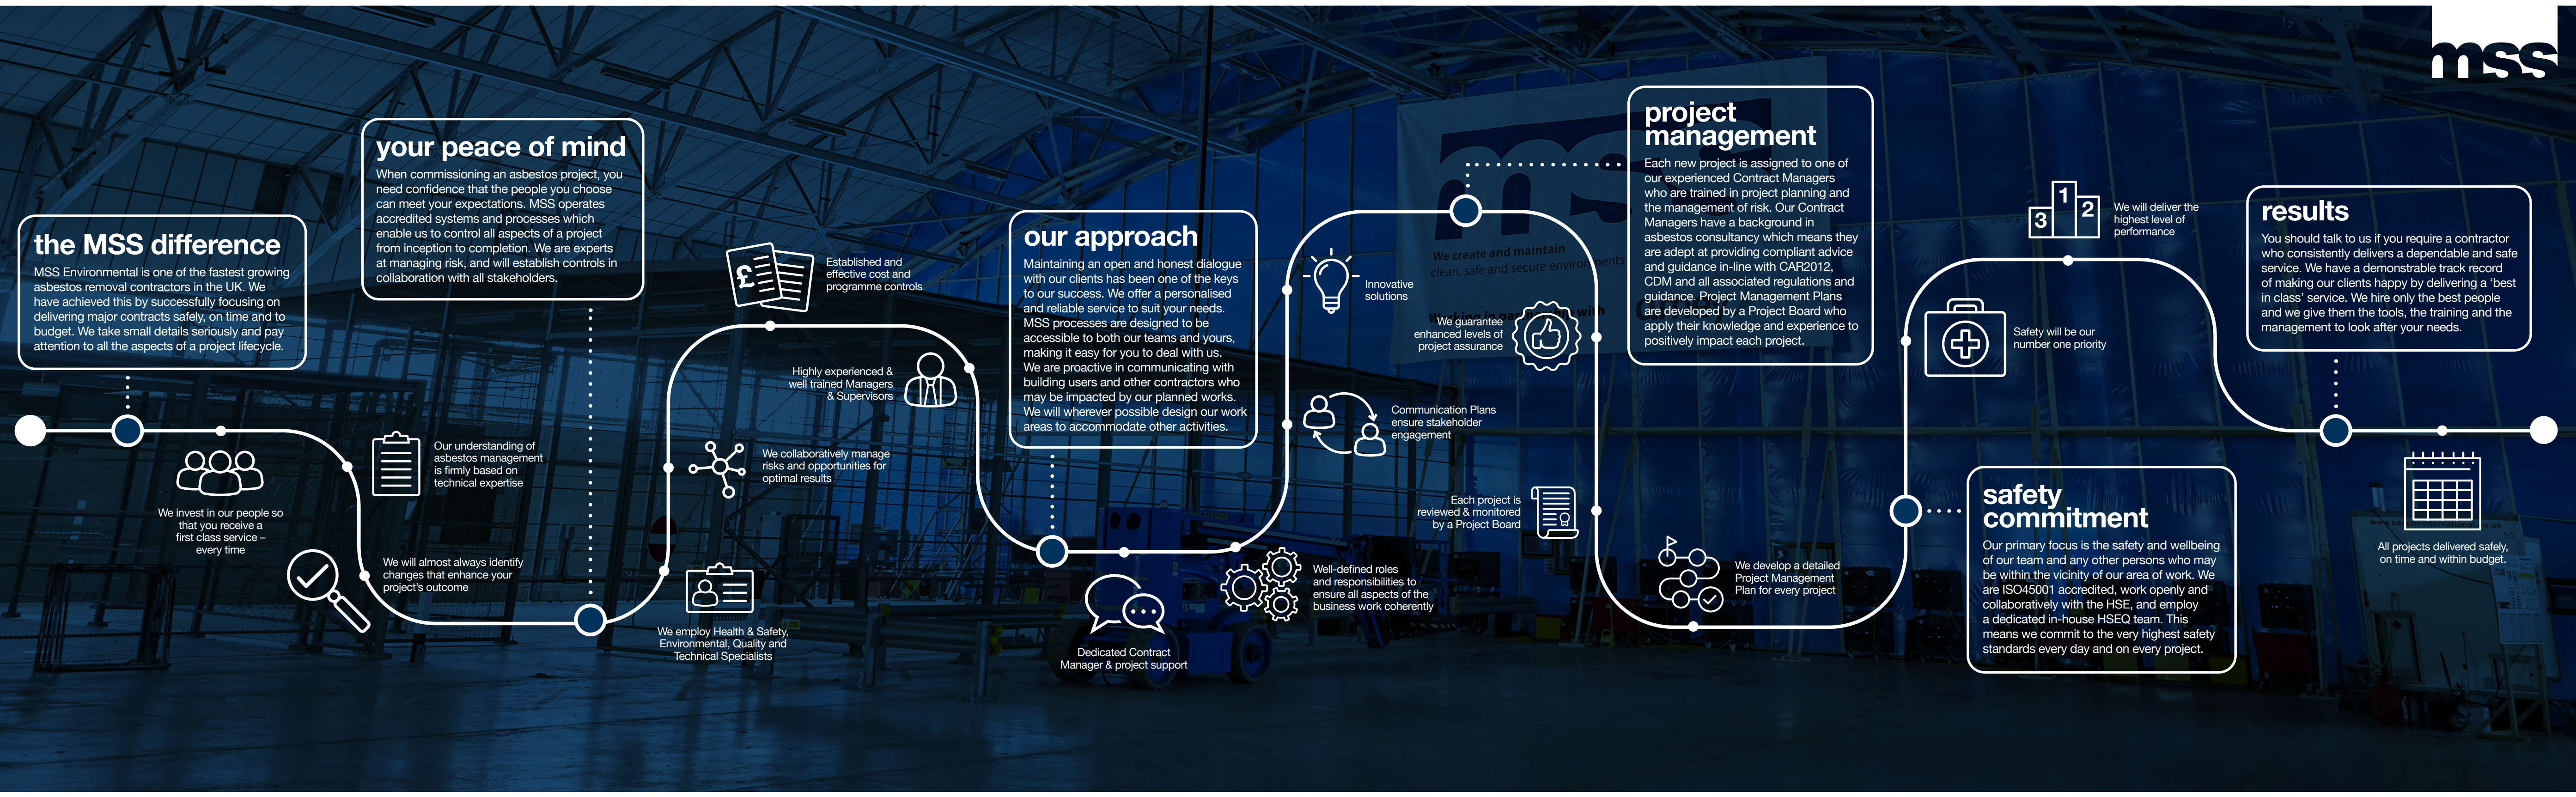

Each new project is assigned to one of our experienced Contract Managers who are trained in project planning and the management of risk. Our Contract Managers have a background in asbestos consultancy which means they are adept at providing compliant advice and guidance in-line with CAR2012, CDM and all associated regulations and guidance. Project Management Plans are developed by a Project Board who apply their knowledge and experience to positively impact each project.

results

You should talk to us if you require a contractor who consistently delivers a dependable and safe service. We have a demonstrable track record of making our clients happy by delivering a 'best in class' service. We hire only the best people and we give them the tools, the training and the management to look after your needs.

safety commitment

Our primary focus is the safety and wellbeing of our team and any other persons who may be within the vicinity of our area of work. We are ISO45001 accredited, work openly and collaboratively with the HSE, and employ a dedicated in-house HSEQ team. This means we commit to the very highest safety standards every day and on every project.

MSS Group

MSS was launched in 2005 with the aim of taking a fresh look at how Environmental Compliance and Facilities Services were delivered. Today we are a major service provider employing over 500 people and working with some of the UK's best known companies and organisations. We are a progressive, technology driven group of companies always looking for new and innovative ways to address our clients' evolving needs.

“

“In short, MSS have provided Laing O’Rourke with an exceptional service, both in facilitating a methodology and adhering to their procedures on site. MSS have excellent capability and support within to deliver complex asbestos removal projects for their clients.”

Gavin Waters
Project Manager, Laing O’Rourke
