

Product Description

The Abi 800 glove represents the highest level of heat resistance and protection available on the market. It has been tested and rated against the EN407 standard, achieving excellent results on all six tests. Designed to withstand temperatures up to around 800°C, it provides protection against radiant heat, open flames and molten metals. The glove is also fire-resistant and has been constructed with a high cut resistance level, achieving a cut resistance level F on the EN388 test. The glove is also 45cm long, providing extra protection to the user's arms and helping to prevent burns and other injuries.

Product Specification

Coating:	Uncoated
Liner:	Glass fabric, Twaron felt, Silicone fibres
Gauge:	N/A
Sizes Available:	One Size
Bag/Case Quantity:	1 Pair Per Bag
Colour:	Yellow

Industries & Applications

- Foundry
- Holding hot plates
- Handling molten metal
- Metal extrusion and casting.
- Metal heat treatment
