Windscreen Repairs

Morgan Bodywork Repairs

SSL Front and Rear Suspension

Race Car Development

Techniques has over 35 years experience looking after Morgans and our skilled technicians can carry out a variety of work to your Morgan, from routine maintenance and upgrades to accident repairs and race preparation.

2023 Techniques Trophy and Cup

After a close dice at the front between a number of four cylinder Morgans, the Techniques Trophy was eventually won by the ever-present James Sumner, with the runner up trophy going to the very talented Jim Mountain in his 4/4.

The winner of the Techniques Cup (first push rod engined Morgan) was Tom Andrew, who drove superbly and Peter Cole was a very worthy runner up, driving his historic 'Cupie Doll' Morgan +4.

John Emberson, just pipping one of our own (Brian), drove very neatly to pick up the driver of the day award.

Congratulations to the winners and a big thank you to everyone who entered our race, keeping this event firmly on the map and thank you to everyone who joined us for the racing, the presentation and the celebration afterwards despite the changeable weather conditions.

2023 MSCC Speed Championship

Sponsored by Techniques

More than 20 competitors in the 2023 SpeedMog Championship have taken part in 15 events across the country and, with the popular events at Shelsley Walsh, Blyton Park and Prescott still to come, there is still much to play for.
