

Above ground combination pump stations

To enable us to assist with your requirements please contact us providing the following information:

- Actual storage capacity required.
- Connection type and sizes required.
- Size of the booster set being utilised.
- Details of any access restrictions to enable positioning of the unit.

- A single piece self contained pump station combining the tank compartment for water storage with the dry compartment which houses the pump set and or any other equipment.
- All pipework connections between the tank compartment and pump are set within the unit.
- Requires only inlet, outlet and overflow and the electrical supply connecting to and from the unit, ensuring "plug and play" easy site installation.
- Large lockable access door for increased security.
- Optional heavy duty galvanised steel skid to allow external positioning.
- Most units can be positioned using fork lift trucks, larger units may require crane lift.
- Available with AB air gap option.
- Available with actual storage capacity options of 1000, 2000, 3000, 4000, 5000, or 7000 litres.
- Also available our compact range with various options, please see our "Above ground combination units compact range" table for sizes.

Optional items available:

- Equilibrium float valves.
- Aylesbury keraflo delayed action float valve.
- Frost protection.
- Bulk head lighting.
- Electrical consumer unit fitted with breakers, RCD.

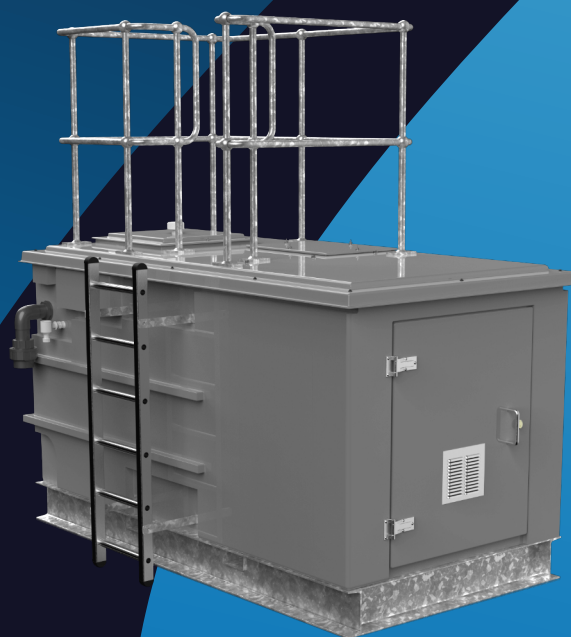

Above ground combination units Standard range

Product	Nominal Capacity	External dimensions	Wet compartment	Pump compartment
CU1.1000AG	1620 litres	2200 x 2000 x 2250mm high	500 x 1800 x 1800mm high	1500 x 1800 x 1800mm high
CU1.1000AB	1620 litres	2200 x 2000 x 2250mm high	500 x 1800 x 1800mm high	1500 x 1800 x 1800mm high
CU2.2000AG	3240 litres	2700 x 2000 x 2250mm high	1000 x 1800 x 1800mm high	1500 x 1800 x 1800mm high
CU2.2000AB	3240 litres	2700 x 2000 x 2250mm high	1000 x 1800 x 1800mm high	1500 x 1800 x 1800mm high
CU2.3000AG	4200 litres	2700 x 2000 x 2250mm high	1300 x 1800 x 1800mm high	1200 x 1800 x 1800mm high

CU4.7000AG	10044 litres	4500 x 2000 x 2250mm high	3100 x 1800 x 1800mm high	1200 x 1800 x 1800mm high
CU4.7000AB	10044 litres	4500 x 2000 x 2250mm high	3100 x 1800 x 1800mm high	1200 x 1800 x 1800mm high

Please note...

All units are fitted with the following:

- Lockable access man-way fitted to the roof of the wet compartment.
- A fully encapsulated ply base.
- Rubber mats in the dry compartments.

Units do not include electrical components, wiring, pump sets, control equipment of any kind or internal pipe work.
Units not fitted with a galvanised steel skid are suitable for positioning onto a structural pad only which should be flat, level and continuous and be +/- 2mm over the surface area.
Units not fitted with galvanised steel skid have an external height 200mm less than stated in the overall dimensions column of this page. Pricing & specification may change. Please check for up to date information.
