

MORGAN Paintwork Repairs

Here at Techniques we regularly carry out accident repairs and rebuild work to Morgans, which of course includes paint work to new and older panels.

Over time we have fine tuned our skills to help reduce the reoccurring problems with corrosion and pride ourselves on the first class finish

that is achieved by traditional 'flat & polishing' of the paintwork. This helps us to achieve a finish that your Morgan deserves.

As an Appointed Morgan Service Dealer we have access to Genuine Morgan panels, including wings, valances and radiator cowls, of which many we keep in stock.

You can be certain that at Techniques the body and paint repairs to your Morgan will be carried out by very experienced skilled tradesmen, to the highest standard.

Please call or email us with your requirements for a free, no obligation quotation.
