High Frequency Mixer and Selectable VHF LP/BP Filter Preliminary Data Sheet

Description

The MSMXVHF Mixer with selectable high frequency lowpass/bandpass filter IC is a CMOS chip that has an independent mixer for IF functions. The output of the mixer can be tied to either a lowpass or a band-pass filter. The lowpass response can be a 6 pole Butterworth, Elliptic or Bessel filter. The band pass response can be a six pole full, 1/3 or 1/6 octave bandpass filter. The device uses switched-capacitor filters and no external components (except for decoupling capacitors) are required, Two external clocks are needed for the mixer and filter functions. Lower current, and lower frequencies are pin selected.

An external selectable gain setting pin, along with a power down and clock to corner ratio select pin are included in the 16 pin version.

Absolute Maximum Ratings

Power Supply Voltage	+3.5V
Storage Temperature Range	-60° to +150° C
Operating Temperature Range	-40° to +85° C

FSEL

Features

- Low Voltage: 3.0 VDC
- Ultrahigh Frequency Mixer (UHF)
- Six Filter Types In One Package
- No External Components
- Switched-Capacitor Filters
- High Frequency Filter Operation
- Selectable Gain 0, 10 or 20 dB
- Small Package Size
- On Chip Power Save Pin
- ANSI Compatible Bandpass

Applications

- Spectrum Analyzers
- General Purpose Systems
- Portable Systems
- Anti-Alias Filters
- Telecommunications
- Tracking Filters
- Harmonic Analysis
- Noise Analysis
- Data Communication
- Wireless Applications

Filter Selection _____

The filter type is selected using the two filter select pins, TYPE and FSEL, FSEL is a CMOS level pin that selects lowpass or bandpass response (lowpass = 0, bandpass = 2). TYPE is a tertiary control pin that selects the filter response. State 0 is VSS, state 1 is AGND and state 2 is VDD.

TYPE	Lowpass	Bandpass
0	Butterworth	Full Octave
1	Bessel	Third Octave
2	Elliptic	Sixth Octave

Pin Description _____

- 1. TYPE Filter Response Select Pin.
- 2. FCLK Filter Clock Input
- 3. G Gain Select Pin
- 4. PWR Power Select Pin; CMOS level High= Regular Power; Low=Low Power
- 5. VDD Positive Power Supply,Typically +1.5 Volts for Split Supply, +3.0 Volts for Single Supply
- 6. PDown Power Down Pin, CMOS level, Hi = Power Down
- 7. VSS Negative Power Supply,Typically -1.5 Volts for Split Supply, 0 Volts for Single Supply
- 8. MCLK Mixer Clock: CMOS Levels
- 9. FO Clock to Corner Select Pin
- 10. MO Mixer Output
- 11. AGND GND Pin, OV for Split Supplies +1.5 Volts Typical for Single Supply
- 12. FIN Filter Input
- 13. MIX2 Mixer Input 2
- 14. MIX1 Mixer Input 1
- 15. FSEL Filter Select

2 = Banpass; 0= Lowpass
Filter Output

16. FOUT

Gain and Frequency Selection _____

The Gain select pin G is a tertiary control pin where state 0 is VSS, state 1 is AGND level and state 2 is VDD.

G	Gain
0	0dB
1	10dB
2	20dB

The clock to corner select pin FO is a CMOS level pin where HIGH is clock to corner of 12.5 to 1 (25 to 1 for Bessel) and LOW is clock to corner of 6.25 to 1 (12.5 to 1 for Bessel). The sample rate ratio is twice the clock to corner ratio (double sampling).

Pin Configuration _____

 STANDARD PRODUCTS

MSGEQ5A	Five Band Graphic Equalizer Display Filter
MSGEQ7	Seven Band Graphic Equalizer Display Filter
MSHFS1-6	Selectable High Frequency LP/BP Filter
MSFS1-6	Selectable Lowpass/Bandpass Filter
MSCAHF	Selectable High Frequency Active Lowpass/Bandpass Filter
MSU1F1-4, MSU2F1	Resistor Programmable Universal Active Filter
MSU1HF1-4, MSU2HF1	High Frequency Resistor Programmable Universal Active Filter
MSELP	Switched Capacitor Elliptic Lowpass Filter with Op Amps
MSNBLP	Switched Capacitor Butterworth Lowpass Filter
MSLE/B/C5L/M	Switched Capacitor General Purpose Lowpass Filter
MS2LFS	Dual Selectable Low Voltage Lowpass/Bandpass Filter
MSLFS	Selectable Low Voltage Lowpass/Bandpass Filter
MSHN1-6	Selectable High Pass/Notch Filter
MSRAAF	Resistor Programmable Active Audio Filter
MSRAHF	Resistor Programmable Active High Frequency Filter
MSDET	Tone Detector
MSEPAF	Electrically Programmable Active Filter
MSCBT	Communications Baseband Transceiver
MSVL14	14 MHz Video Lowpass Filter
MSSPSI	Smart Programmable Sensor Interface
MSCPSI	Computer Programmable Sensor Interface
MSLOSC	15 Hz to 64 kHz All Silicon Sine Source
MSTHDA	Total Harmonic Distortion Analyzer
MSSCSA	Single Chip Spectrum Analyzer
MSFIPS	FIP-140 Level 4+ Security Supervisor
MSLSA	Low Power Single Chip Spectrum Analyzer
MSRFIF	Radio Frequency Interface Front-End
MSVHFS1-6	Selectable Very High Frequency LP/BP Filter
MSMXVHF	High Frequency Mixer and Selectable VHF LP/BP Filter
