
GPS High Gain Puck Antenna

- High Efficiency
- Dual LNA
- High Gain GPS Antenna
- Outdoor use
- Magnetic/Tape Mount

ADA-A720-S is designed for GPS navigational applications, where outside mounting is preferred. The antenna has a small foot print and can withstand high winds and wet environment.

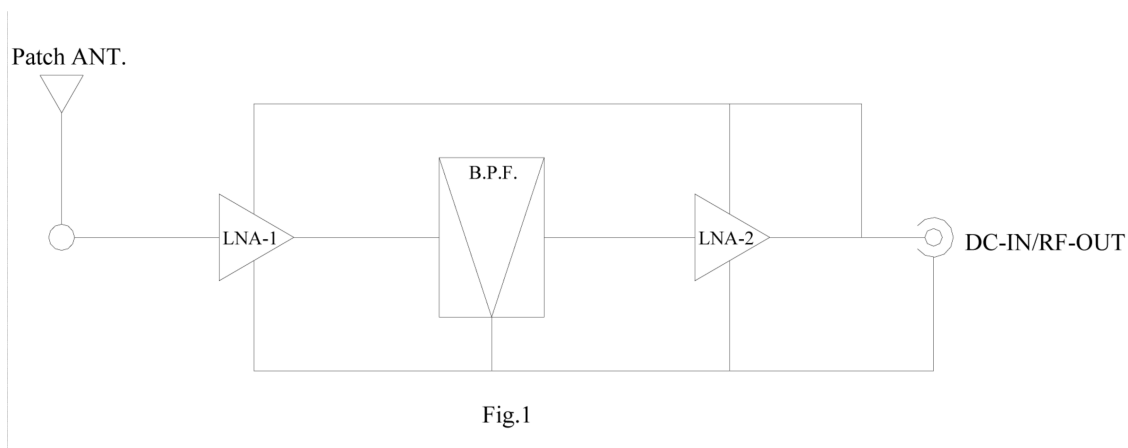

RoHS

Optimal position for automobile applications is on the roof top of the vehicles. If the GPS antenna unit is to be placed inside the car, be certain to avoid coverage by metal objects or behind heated windshield, for optimal performance.
