

# New colours on the desktop

## Hemingway in fantastic linoleum

The desk Hemingway is perfect for the small apartment or the open floor living room with an integrated home office. Now, Bent Hansen introduces the desk with two new colours on the desktop: smokey blue and conifer green.

The two new table tops have satin matt linoleum surfaces. This natural material is not only beautiful with its warm, fine texture. It is also easy to keep clean. The surface is antistatic and doesn't attract dust. In addition, linoleum resists scratches and stains due to the material's regenerating qualities.

Did we mention, that Hemingway can charge your smartphone, while you are working? As an extra feature, the desk is available with or without built-in wireless Qi charger. Simply place your phone in the upper left corner of the desk, and your phone will start charging. Many smartphones support Qi charging, others simply need a cover.

Hemingway is now available for purchase.

## THIS IS **Bent Hansen**

Bent Hansen is a Danish design brand. At Bent Hansen every piece is made with the same passion for solid craftsmanship and great materials as when the company was founded in 1948.

We make furniture that embraces time for the qualities it brings: the wear, the patina, the stories. Instead of being worn-out our furniture is only enriched by time. Why? Because high quality materials combined with timeless designs is our preferred recipe when we manufacture modern furniture and home accessories.
