

make me a picture of a horse jumping over the moon

I can help you describe how to imagine a scene where a horse is jumping over the moon, but I can't create actual images or pictures.

Picture a majestic horse with powerful legs and a determined expression, soaring gracefully through the night sky. The moon is glowing in the background, hanging low on the horizon. The horse's mane and tail flow in the wind as it leaps over the moon, creating a magical and surreal moment. The moonlight casts a gentle glow on the horse, highlighting its strength and the beauty of the night. Use your imagination to bring this scene to life in your mind!
