

Annual Report
Article 18.4 of Council Regulation (EC) No 1099/2009

This report should not include killing taking place in slaughterhouses (for disease control purposes or other reasons).
This report should be limited to the following consolidated information per Member States.

Reporting Country

Year in which depopulation operations were carried out

United Kingdom

2017

No data to report

I agree that the Commission may publish the consolidated version of this report without prior agreement. However, individual reports of depopulation operations may not be published without prior authorisation from the competent authorities concerned. No private data shall be published.

yes

How to use the form:

- 1) Click the 'Add a depopulation operation' button to add a case.
- 2) For each depopulation operation added select the reason for the depopulation operation
- 3) Use the 'Add species' button to add detail for as many species as required.

If supplying data, there must be at least one depopulation operation, and each depopulation operation must have at least one species.

Add a Depopulation Operation *(select case type after adding)* **+**

Depopulation Operation details (Animal Health)

Please select a depopulation operation reason:

- **Animal health** reasons relate to the killing of animals primarily to prevent spreading the disease to other animals.
- **Public health** reasons relate to the killing of animals primarily to prevent microbiological or chemical contamination to human beings.
- **Other** reasons relate to the killing of animals for animal welfare or environmental reasons.

Reason for depopulation:

yes

Additional Information (description of the difficulties encountered, and where appropriate, solutions found to alleviate or minimise the suffering of the animals concerned) If using the derogation Article 18(3) explaining why and how the derogation was given.

During the depopulation it was noted that some birds regained consciousness after being gassed in the containerized gassing unit. Gas usage records were checked and instructions were updated to ensure that all birds had 3 minutes of continuous expose to <5% oxygen levels. No further issues were noted once this had been addressed
