Overview of Arterial Drainage Maintenance

Arterial Drainage Maintenance

Following the passing of the Arterial Drainage Act, 1945, the Office of Public Works (OPW) began investigations to determine where catchment wide Arterial Drainage Schemes would be expedient and economically viable. The implementation of the Schemes began in the late-1940s. The amendment to the Arterial Drainage Act in 1995 has changed the OPW focus from carrying out large-scale catchment wide schemes for agricultural purposes to works on a more localised basis for the protection of property. The OPW has a statutory duty to maintain the schemes that have been completed in proper repair and effective condition.

The OPW's arterial drainage maintenance programme comprises 11,500km of river channel and approximately 800km of embankments. This provides drainage for 260,000 hectares of agricultural lands, as well as a level of protection from flooding to infrastructure, including in excess of 21,000 properties, 2,400 kilometres of roads and 77 towns and villages. While drainage schemes were originally developed to provide drainage of agricultural land, they have significantly reduced the risk of flooding to the extent that many areas which historically had high risk of river flooding now have a low level of risk. Embankment schemes also protect significant numbers of properties located at or below sea level.

Information about the Arterial Drainage Schemes maintained by OPW is available on the OPW official website here. The network of watercourses and embankments maintained by the OPW is displayed on the Drainage Map here.

Maintenance Activities

In the years following the construction of an arterial drainage scheme the channel capacity reduces due to the deposition of bed materials, the accumulation of silt and the growth of in-channel and riparian vegetation. The resultant arterial drainage maintenance activities aim to continuously restore the scheme's design i.e. the designed datum to provide outfall for drainage of the benefiting lands and the channel's design cross section capacity to convey floods. Arterial drainage maintenance is an ongoing programme of works of a cyclical nature, typically every four to six years. Drainage maintenance activities include a range of activities that can be categorised into three types:

- Channel Maintenance: including silt and vegetation management, aquatic vegetation cutting, bush trimming/cutting and tree trimming/cutting.
- Embankment Maintenance: including mowing, mulching, bush trimming/cutting, tree trimming/cutting and strengthening works.
- Structures Maintenance: including bridge maintenance/replacement, sluice maintenance/replacement and bank protection works.

Note that for weirs and other historical structures on arterially drained channels, their ownership typically resides with the original owners and the responsibility for maintenance of these structures lies with their respective owners.

Drainage maintenance is carried out by OPW's direct labour workforce of approximately 300 trained personnel supported by OPW's transport and excavator fleet and other specialised equipment. This maintenance work is organised on a regional basis, with headquarters in Limerick, Headford, Co. Galway and Trim, Co. Meath.

Annual Maintenance Programme

Arterial drainage channels and embankments are normally maintained on a fixed schedule with a recurrence between one and ten years. Annually, an average of 2,100km of channels are maintained i.e. 18% of the 11,500km of channel nationally.

Each year, the OPW prepares an annual arterial drainage maintenance programme for each region, primarily for internal operational management use, that identifies the proposed maintenance locations within each arterial drainage scheme catchment area. The annual programme is informed by data gathered from a variety of sources including maintenance records and engineers/technicians/supervisors observations from previous inspections.

Each regional office sets out the annual programme in a document comprising a set of maps showing the scheme locations where maintenance activities are planned for the coming year along with high-level overview data. This programme is provided to Inland Fisheries Ireland (IFI), National Parks & Wildlife Service (NPWS) and Local Authority Waters Programme (LAWPRO) in PDF maps and consultations with these environmental stakeholders continue at regional level to assist with programme delivery through catchment meetings, joint site visits and ongoing local communications. The OPW is currently reviewing a system to make mapped information available on the OPWs website.

Information about programmed activities is available at our regional offices where local staff can assist members of the public with any queries.

The programme documents prepared by the regions reflect the maintenance as planned for at the start of the year. In carrying out the programme, the OPW needs to be flexible to address emerging priorities during the year as the scheduling of maintenance is dependent on a several variables such as weather and flood conditions, land use constraints and environmental windows. In addition to these complexities, the delivery of maintenance is dependent on other less predictable factors, including but not limited to, access issues (crops, livestock, permissions), plant and machinery (servicing, repairs, fuelling), human resources, health and safety (training, traffic management plans),etc. Therefore, the day to day scheduling of activity is managed at a local level on an ongoing basis.

Environment requirements

Arterial drainage maintenance works are carried out in accordance with relevant legislation, through a range of environmental assessments, including Strategic Environmental Assessments, Appropriate Assessments and Ecological Assessments, supported by widespread stakeholder consultation. Information on environmental activities and associated environmental assessments and studies are available on the OPW website through the Environmental Management page.

Appropriate Assessments (AA) have been conducted in accordance with S.I. No. 477/2011 - European Communities (Birds and Natural Habitats) Regulations 2011, as amended, for all these maintenance works and these assessments are reviewed and updated every five years for each scheme. Where the works are screened-in for Stage 2 AA, a Natura Impact Statement (NIS) is prepared in accordance with the Regulations. The AA documentation for each scheme for the current five year cycle is published on the OPW website. Additional appropriate assessments are carried out for certain site-specific works within a scheme.

Works are carried out in compliance with measures specified in the OPW's published mitigation standard 'Environmental Guidance: Drainage Maintenance and Construction' (Available online here).

* Indicates channel that is maintained annually

** Indicates channel that is maintained bi-annually

Appendix 2 - Structures Program (including Embankment Refurbishment)

Ballyteigue Kilmore

C2	Pump Station - PH1	Security fencing and gate
C2	Grid	Boat access structure at Cull
E12	Sluice - SL9	Sluice repair and wall pointing
E13	Sluice - SL10	Sluice repairs
C2/2	Bridge - B36	Bridge repairs
E5	Embankment	Refurbishment @ 0-200m
E22	Embankment	Flood wall repairs @ 800-1100m
C1	Bridge - B5	Bridge replacement
E19	Embankment	Flood wall repairs @150-250m

Boyne

C1/36/6/2/9	Channel	Bank protection
C1/44/12	Grid - Grid 12	Bridge repairs
C1/14	Bridge - B977	Bridge repairs
C1/8/5/5	Grid	New grid
C1/37/4/6	Bridge - B@33/50	Bridge replacement
C1/14/8	Bridge - B1062	Bridge repairs
C1/36/38	Bridge - B@ 31/50	Bridge repairs
C1/8/17	Bridge - B661	Bridge replacement
C1/37	Bridge - B2346	Bridge replacement
C1/8/9/3	Bridge - B363	Bridge replacement
C1/64	Bridge - B3240	Bridge replacement
C1/8/9/3	Bridge - B362	Bridge replacement
C1/8/28	Bridge - BX2	Bridge replacement
C1/36/19/1	Grid	New grid
C1/21	Channel	Placement of spawning gravels as part of maintenance
C1/46/4	Bridge - B3076	Bridge replacement
C1/21	Channel	Bank protection
C1/12	Channel	Placement of spawning gravels as part of maintenance
C1/12	Channel	Placement of spawning gravels as part of maintenance
C1	Channel	Placement of spawning gravels as part of maintenance
C1/36/41	Bridge - B2309	Bridge replacement
C1/14/1/1	Bridge - B991	Bridge replacement
C1/8	Channel	Bank protection
C1/64/3/2	Bridge - BX1	Bridge repairs

Broadmeadow and Ward

C1/6	Bridge - B81	Bridge replacement
C1	Channel	Removal of gravels and channel reprofile
C1	Channel	Bank stabilisation / gravel/channel reprofile
C1/5	Bridge - B49	Bridge replacement

Brosna

C2(1)	Bridge - B201	Bridge repairs
C2(1)	Bridge - B204	Bridge repairs
C2(1)	Bridge - B205	Bridge repairs
C43(1)	Bridge - B824	Bridge repairs
C3(13A)	Bridge - B501	Bridge repairs
C29(1)	Bridge - B773	Bridge replacement
C8(18)	Bridge - B630	Bridge replacement
C8(11A)	Bridge - B602	Bridge replacement

Duleek (Nanny)

C1	Bridge - N2	Railing repairs

Glyde and Dee

C19(1)	Channel	Bank protection - channel scouring and undermining laneway
	Ardee Depot	Upgrades
C43(3)	Bridge - B781	Bridge replacement
C2(17B1)	Grid - G8	Replacement of existing grid
C2(1)	Channel	Bank protection, right bank @ 1,100m to 1,250m
E2	Embankment	Embankment refurbishment
C2(28H)	Bridge - B1056	Bridge replacement

Inny

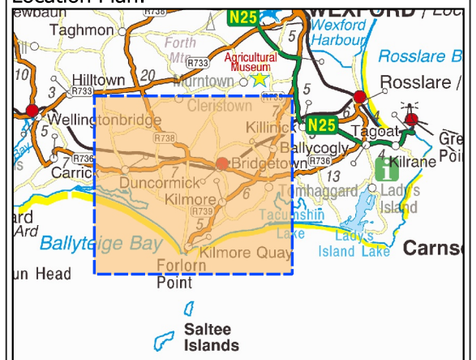

C26	Bridge - BX4	Parapet repairs
C2	Bridge - BX5	Parapet repairs
C29/1	Bridge - B1	Bridge replacement
C2	Bridge - B1A	Bridge repairs
C8/9A	Bridge - BX1	Bridge replacement
C35	Mill	Channel reprofile
C35	Channel	Channel reprofile
C35	Bridge - BX4	Bridge replacement
C8/10/1	Bridge - BX1	Bridge repairs
C8/10/1	Bridge - BX2	Bridge repairs
C8/10/1	Bridge - BX3	Bridge repairs

Monaghan Blackwater

C1	Channel	Bank protection, right bank @10,300m to10,330m
C1	Channel	Bank reinstatement @2,600m to 3,000m

Appendices

Appendix 1 – Structural Works

Asset Ref. Key: E = Embankment, SL = Sluiced Outfall, B = Bridge/culvert, D = Drain, C = Channel

SCHEMES LISTED IN ALPHABETICAL ORDER

OPW Drainage Scheme	OPW Asset Reference (see key above)	Work Proposed
Ballinaclough		
Bandon River (Dunmanway)		
Bunratty Rineanna		
Coonagh		
Creegh		
Deel	B89 on C8/4	Replace existing culvert
	B88 on C8/4	Replace existing bridge
	C23 @ Ch. 50 Tulligmacthomas	Replace existing culvert access to Weir WX2, UB30
Feale	SL89 on C1	Replace existing sluice and reinforce river bank with rock armour.
	E7 Ch50 to 250	Rock Armour
	E7 Ch800 to 1050	Rock Armour
Fergus	E13 Embankment	Berm/Embankment Erosion Protection & Haul Road Construction
Groody	B59 C1	Railing to be added to bridge
Killimor	B124 on C1/14	Replace existing culvert
	B236 on C1/20/5/1/1	Replace existing culvert
	B506 on C1/33/2	Replace existing culvert
	B510 on C1/33/2/3	Replace existing culvert
	B527 on C1/35	Replace existing culvert
	B530 on C1/35/2	Replace existing culvert
	B543 on C1/37/1	Replace existing culvert
	B574 on C2/2	Replace existing bridge
	B577 on C2/2	Replace existing bridge
	B588 on C2/2/2	Replace existing culvert
	BX1 on ED Brackery	Replace existing culvert
	C1 32,200-32,600	Rock armour bank erosion
	C2/5 Abbey	Underpin existing wall
Maigue (upper)	BX C1/25/8/3/2	Bridge Removal
	B1 C1/25/8/3/2	Pipe Bridge Extension
	C1/34/11 CH 900	Rock Armour

Maigue Outfall & Lower Maigue	B3 on C1/17/11/2	Replace existing culvert
	SL7 on E10 Dunraven	Sluice outfall replacement
	SL15 on E31	Sluice apron repairs
	SL15A on E41	Sluice apron repairs
	B4 on D16	Replace existing culvert
Maine	E2 Ch5000 - 6150	Haul Road
	E2B Ch 0 - 710	Haul Road
	E7 Ch 1050 - 1823	Embankment Refurbishment
	E16 Ch 0 - 750	Embankment Refurbishment
	Sl25 on C1	Sluice Replacement
	Sl27 on C1	Sluice Replacement
	E1 Ch 5600 – 5770	Rock Armour
Mulkear-Ballymackeogh	E3 Ch 6300 – 6250 (C1/1)	Embankment Erosion Protection works
	E6 Ch800 – 845	Embankment Erosion Protection works
	E7 Ch 15-30 (C1/1/2)	Embankment Erosion Protection works
	E3 Ch 4625 – 4675 (C1/1)	Embankment Erosion Protection works
	B8 C1/1/1	Removal of excess gravels
	B4 C1/1	Removal of excess gravels
Nenagh & Clareen	C1 @ Ch21,000	Rock armour bank erosion
	B1 on C1/9/6	Replace existing culvert
	B3 on C1/9/6	Replace existing culvert
	B4 on C1/9/6	Replace existing culvert
	B1 on C1/9/6/1	Replace existing culvert
	B2 on C3 Clareen	Replace existing bridge
Mulkear-Cappamore	B17 C1/3	Re-establish the channel edge.
	B1 C1	Removal of excess gravels
Ouvane		
Owengarney	E14 Embankment	Berm/embankment erosion protection
Polefield		
Ringmoylan Foynes	B1 on C1 (Ballysteen Section)	Replace existing culvert
Sixmilebridge
