

- Stainless steel conveyor belt
- Low brine circulation volume
- Variable needle bearing keeps breakage and wear and tear to a minimum
- Large filter surface so that ice brine flows freely under high pressure
- Stainless steel pump for a hygienic flow over the complete pressure range
- The curing area can be opened for easy cleaning
- Little space needed and mobile
- 60 injections per minute means high throughput in a short time

Height	1400mm
Length	1270mm
Width	500mm
Wattage	1.1kW
Weight	145kg
Performance kg/h max	1000
Speed per stroke	25mm
Belt width	270mm
Rows of needles	2
Feed inlet height	180mm
