

RTK Subscription and MOS3 Important Information

Hitechniques Ltd. © All Rights Reserved

The following is important information regarding how we apply charges for the supplied services. Please take your time to read it carefully. Should you have any questions please do not hesitate to contact us.

Please check your initial invoice to find out which of the following services apply to you.

RTK Corrections Subscription

In order to get the precise position with your GNSS rover you need real time corrections from a GNSS base. These corrections reduce the error of the GNSS positioning and bring the accuracy of your rover down to centimeters level.

Corrections can be taken from a single base (you need additional receiver working as a base) or can be supplied by Continuously Operating Reference Stations

(CORS) network operators.

Hitechniques supplies RTK corrections from network of CORS set up around the island of Ireland as an annual subscription in few different options:

- VRSNow Network RTK Subscription 100 hours 1 Year

- VRSNow Network RTK Subscription 600h 1 Year
- VRSNow Network RTK Subscription Unlimited 1 Year
- RTK.IE RTK Subscription 100 hours 1 Year
- RTK.IE RTK Subscription 600 hours 1 Year
- RTK.IE RTK Subscription Unlimited 1 Year
- SmartNET RTK Subscription Unlimited 1Y Ireland
- SmartNET RTK Subscription Unlimited 2Y Ireland
- SmartNET RTK Subscription 60 hours 1Y Ireland
- SmartNET RTK Subscription 480 hours 1Y Ireland

Corrections for other parts of the world are available as well as unlimited annual subscription. Send us a request if you need more information about availability of other options.

Annual RTK corrections subscription is paid in advance once per year. It is not renewed automatically, however we send a reminder before expiration date so you can decide if you want to renew it or change your subscription for another option.

RTK Corrections Subscription Credentials

YOUR RTK SUBSCRIPTION CREDENTIALS PERMIT ACCESS TO THE CORRECTIONS SERVICE AND ARE SAVED IN THE SOFTWARE SETUP. YOU SHOULD KEEP THIS INFORMATION PRIVATE AS BAD ACTORS CAN USE YOUR CREDENTIALS ON OTHER INSTRUMENTS. CUSTOMER WHO ABUSED THE SUBSCRIPTION SERVICE BY USING ANOTHERS' CREDENTIALS WILL LOSE ACCESS TO THE SUBSCRIPTION SERVICE AND MAY FACE OTHER SANCTIONS.

MOS3 Service

Multi-Operator SIM for Mobile Internet is an industrial grade SIM card in your GNSS Rover which gives much better GSM coverage.

- It picks up the signal from O2/Three, Meteor/Eir and Vodafone simultaneously and has eliminated almost entirely black spots
- It eliminates outages due to expired credits
- It does not require topping up

- We have found that using the MOS3 customers have had a much less outages and considerably better connection to get corrections.

Because MOS3 does not require topping up it is supplied as a bill pay SIM, and we will invoice on a monthly basis.

If you want to cease your contract you have to do that before the start of the next invoicing period.

There are two options offered:

- 500MB - recommended for the SIM cards inserted to a GNSS rover
- 5000MB (5GB) - recommended for the SIM cards inserted to a tablet

Both services are fully supported by our technical support engineers.

In case of any questions please do not hesitate to contact us on 01 2572323 or support@hitechniques.ie
