

Travel Vaccinations

Messages for patients:

- Please book an appt at least 8 weeks before you're due to travel as some vaccines need to be given well in advance in order for your body to develop immunity and our clinics are very busy
- Some vaccines require more than 1 dose spread over several weeks or months
- You can find out which vaccinations are needed for the areas you're travelling to on websites such as 'Travel Health Pro' and 'NHS Fit for Travel'
- Some countries require proof of vaccinations which must be documented on an International Certificate of Vaccination or Prophylaxis.
- Even if an ICVP is not required, it's still a good idea to take a record of your vaccinations with you

Travel Vaccinations

- Contact us well in advance to book an appointment
- If you don't leave enough time to book in, we may not be able to offer you an appt that coincides with your travel plans
- If so, you may wish to consider contacting a vaccination clinic or pharmacy which offers travel healthcare
- Not all travel vaccinations are free on the NHS and we may charge for non-NHS travel vaccines.
- Vaccinations for travel that are available on the NHS include:
 - Polio
 - Typhoid
 - Hepatitis A
 - Cholera
- Remember to check the Gov.UK website for up-to-date Covid travel advice
