

LMC Update Email  
1 April 2021

Dear Colleagues

### **GMS/PMS regulations - pandemic amendments (England)**

NHSE/I has confirmed that the temporary changes to the GP contract under the [pandemic regulations](#) which were due to lapse at the end of March have now been extended until 30 June 2021.

As with previously, this means a continued suspension of the Friends and Family Test requirement; a continued suspension of the requirement for individual patient consent for electronic repeat dispensing (eRD); and a continuation of the amendment to NHS 111 direct booking with sufficient slots available for NHS 111 to refer into a triage list; for most practices offering 1 per 3000 as per the pre-pandemic arrangement is likely to be sufficient but this can increase to 1 per 500 if demand requires.

Read more about what services practices should be providing, and what should be prioritised during the pandemic, in our [COVID-19 toolkit for GP practices](#).

### **SFE and global sum calculation (England)**

An official consolidated version of the [SFE](#) (Statement of Financial Entitlements) has been published for 2021. This updates the SFE from the last fully consolidated version from 2013 and includes the amendments made up to the current 2021/22 contract year. The global sum figure has now been finalised for 2021/22 (£96.78) and amended from early figures we shared as it now takes in to account the full impact of the final MPIG correction factor recycling. The global sum out-of-hours deduction will be 4.75% (£4.59).

### **DES directions and flu immunisations (England)**

The [DES \(Directed Enhanced Service\) Directions](#) have also been published today. NHSE/I has decided not to include the revised Influenza Immunisation Scheme in this set of DES directions. This is due to the possibility of a COVID-19 booster programme running alongside the flu programme, and the need to look at potential operational considerations for providers. NHSE/I has made a commitment to discuss delivery of COVID-19 boosters and the impact on the flu campaign with GPC England once further information is available.

Note that practices should continue to plan to deliver the 2021/22 flu programme as per the [letter from NHSE/I Medical Director Professor Steve Powis](#).

### **Network Contract DES 2021/22 and improving general practice appointment data (England)**

NHSE/I has published a suite of documents to support the updated [Network Contract DES 2021/22](#) from 1 April. These documents implement the changes set out in the NHSE/I letter of [21 January 2021, and include a cover not outlining the key changes, the](#) updated Network Contract DES specification and guidance, and other supporting guidance, including a set of FAQs.

They have also published [guidance for practices on standard national general practice appointment categories](#) to support the mapping of local appointment slots to these new categories. This follows

joint NHSE/I and GPC England guidance published in August 2020, which introduced an agreed definition of general practice appointment.

There is also new guidance on PCNs implementing the [Investment and Impact Fund](#) for their practices as per the requirements set out in the Network Contract DES.

Access all the guidance [here](#)

### **COVID-19 vaccination programme (England)**

Vaccination sites are encouraged to continue their efforts in maximising uptake in cohorts 1-9 during April, focusing on those in the lower cohorts first, which are yet to be vaccinated.

The [JCVI is recommending that adults who are over 16 and living with adults who have weakened immune systems](#), such as those with blood cancer, HIV or those on immunosuppressive treatment including chemotherapy should be prioritised for the COVID-19 vaccine. NHSE/I has [written](#) to practices [about the](#) next steps, including a template letter practices can use to inform patients that their adult household contacts are eligible to have the COVID-19 vaccination, and also published [operational guidance](#) to vaccinate this cohort.

There will be very limited vaccine available for first doses in April and vaccination sites should now preferentially use spare vaccine from second dose clinics to give to other patients due a second dose, although they retain the clinical discretion to give it to others as a first dose, particularly those living with immunocompromised patients as set out in the [letter from NHSE/I](#).

We are expecting a statement from JCVI shortly on details relating to the next phase of vaccination for groups 10-12.

### Maximising vaccine uptake in underserved communities

NHSE/I has published a problem-solving [framework to help maximise vaccine uptake in underserved communities](#), setting out best practice and practical guidance for implementing a range of interventions to ensure equitable access to COVID-19 vaccination and drive uptake.

### Pinnacle now features reporting functionality

Pinnacle has now released reporting functionality in their platform. This move comes after lobbying from both GPC England and the Joint GP IT Committee, calling for a solution to support PCN-led vaccination sites with reporting. To support users with their service delivery Pinnacle have introduced several service reports that can now be accessed from the "Reports" tab. Only users with the "Site administrator – user management" permission will be able to see this tab. Please follow instructions sent out in LVS email. All requests for access to PID extracts will be subject to an approval from Pinnacle on behalf of NHS England. For further queries please contact the National Service Desk: Telephone: 0300 200 1000; Email: [vaccineservicedesk@england.nhs.uk](mailto:vaccineservicedesk@england.nhs.uk)

### Vaccine dose data

Nearly [31 million people in the UK](#) have now received their first dose of the COVID-19 vaccine, and the latest [data report](#) shows that as of 31 March, nearly 29.5 million doses of the COVID-19 vaccine have been given in England.

Read more about the latest changes, including the delivery of second doses, added funding, and what practices need to do and the support available in our updated [guidance page about the COVID-19 vaccination programme](#).

### **Shielding for clinically extremely vulnerable to end (England)**

As of yesterday, 1 April, [clinically extremely vulnerable \(CEV\) people in England no longer need to shield](#). CEV patients are still advised to continue to take extra precautions to keep themselves safe, even after receiving both doses of the COVID-19 vaccine. Read the government guidance [here](#)

Practices are reminded to continue to add and remove patients, as appropriate, from the Shielded Patient List, as it may be necessary to identify this cohort in the future. Information on how to do so is available on the [NHS Digital website](#).

Read our [guidance for practices](#) about arrangements for patients at high-risk of coronavirus.

The BMA also has guidance for [doctors isolating and those in vulnerable groups](#)

### **NHS Standard Contract 2021/22 – New “interface” provision (England)**

Following reports from GPs regarding inconsistent implementation of NHS Standard Contract requirements on secondary care providers relating to the interface with local primary care teams, the BMA has worked with NHS England on the introduction of a new provision in the contract to improve collaboration between clinical teams.

The new provision published in the [contract](#), requires that secondary care providers work with their local commissioners to assess by the end of September, and annually thereafter, their compliance to the interface requirements of the contract.

The commissioners and providers will also have to agree an action plan to address any deficiencies identified by their assessment and ensure that this action plan is informed by discussion with and feedback from the relevant LMCs.

Providers and commissioners will finally have to ensure that the action plan is adopted in public by their Governing bodies, and that progress on its implementation is shared with the relevant LMCs.

### **BMA summary: NHS Planning Guidance 2021/22 and NHS Mandate 2021/22 (England)**

The BMA has produced the attached member summary of NHS England’s latest Planning Guidance for 2021/22, which sets out its expectations for NHS commissioners and providers in England over the coming year and for the recovery from Covid-19.

We have also responded to the publication of the planning guidance publicly [here](#), and have welcomed the focus on staff wellbeing, recruitment and retention in the guidance, which echoes some of the priorities we set out in our recent paper [Rest, recover, restore: Getting UK health services back on track](#).

The BMA has also called for a realistic approach to tackling the growing backlog of care given the scale of the challenge facing the NHS. Although it is positive that the planning guidance sets out relatively cautious timescales for increasing non-COVID care in the NHS over the coming six months,

we've warned that offering financial incentives to raise activity levels could be counterproductive if this leads to healthcare workers being put under pressure to ramp up services too quickly.

### **Community pharmacy pandemic delivery service**

You may be aware of the recent addition to the community pharmacy [pandemic delivery service](#) which allows pharmacy contractors and dispensing doctors to support the delivery of prescriptions to people who have been told to self-isolate by NHS Test and Trace.

Pharmacy contractors have reported that some people told to self-isolate, particularly the household contacts of COVID-19 positive patients, do not seem to be following the guidance and consequently are still presenting in pharmacies.

It is suggested all primary care providers flag the option to have prescriptions delivered when prescribing for COVID-19 positive patients, to try to ensure they stay away from all primary care premises.

### **BMA moral distress survey (UK)**

The BMA has launched a [survey on moral distress](#), open to all UK doctors, including retired doctors, although it is not aimed at medical students. The survey will remain open until *Sunday 11 April*.

The survey asks about your understanding of moral distress and moral injury, whether you have come across these terms before or have experienced them. The impact of COVID-19 and potential solutions are also considered. The findings will be used to make recommendations and allow the BMA to help mitigate this problem throughout the UK's medical workforce.

Take the survey, and read more about moral distress and how it impacts doctors, [here](#).

### **GPC UK regional elections**

The voting period for seat to the General Practitioners Committee UK in the *Durham and Cleveland region* has reopened. To submit your vote please visit <https://elections.bma.org.uk/>

If you live or work in the Durham and Cleveland region and do not have access to the voting, please contact [elections@bma.org.uk](mailto:elections@bma.org.uk) and the team will be able to assist.

#### If you do not have a BMA web account?

To vote in this election you must have a BMA web account, if you do not have one please click [here](#) to create one. Please follow the link to 'request a temporary non-member account' and email your temporary membership number to [elections@bma.org.uk](mailto:elections@bma.org.uk) to get access to vote in this election.

The deadline for voting is **12pm, 19 April**.

If you have any queries regarding the election process, please contact [elections@bma.org.uk](mailto:elections@bma.org.uk).

### **Media**

I was today interviewed on the [BBC Radio 2 Jeremy Vine Programme](#) (1.31m) on how vaccination sites use spare doses of vaccination at the end of a session.

I spoke to BBC Radio Leeds yesterday on the ending of the shielding arrangements in England and explained that throughout the pandemic, calls about mental health have increased. Listen [here at 07:05](#).

GPs are working an average of 11 hours a day according to a workload survey by [Pulse](#), which we was also covered by [Mail Online](#), Daily Express and multiple regional outlets. In response to this I said: “As we move beyond the crisis stage of this winter wave, GPs will continue to face intense pressures and we must ensure all in the general practice workforce are given time to rest and re-charge before we get into the autumn which is already predicted to see increases in workload pressures. Not only will there be the annual flu programme alongside any further Covid vaccination boosters if they are thought to be necessary, we will also need to address the huge backlog of care while there is the potential for further spikes in coronavirus infections.”

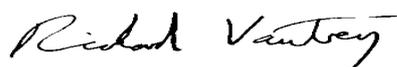

Rob Barnett, GPC England member, was interviewed on [BBC Radio Merseyside](#) about how hard it's been for people shielding during the pandemic and their mental health might have been affected. Some of his patients have been 'stuck in flats' for a year, and people have been following the guidance to the letter. He stressed that it's really important that people maintain social-distancing and that, even though they are coming out of shielding, they must still comply with the current guidance.

Speaking to [BBC News Online](#), Alan Stout, NIGPC chair, said he was concerned that the uptake of the Covid-19 vaccine will diminish as the roll out moves to the younger age groups. Dr Stout said that young men were the 'hardest to get for any health intervention'. He also appeared on Good Morning Ulster, allaying fears that the vaccine had any impact on fertility, saying that it was 'scientifically implausible' and urging people to have their vaccination, adding it was 'vital we get everyone vaccinated.'

Read the latest GP bulletin [here](#)

Best wishes

Richard
