# Introduction to Dermoscopy with Prof Christian Aldridge

**Tuesday 4th August - 17:00 GMT**

**Delivered via Zoom**

Join Professor Christian Aldridge as he discusses the basics of dermoscopy in '**The Introduction to Dermoscopy Webinar**'. This is ideal for healthcare professionals who are new to the technique and may encounter pigmented lesions in their practice.

The webinar is aimed at GPs, Trainees, Clinical Nurse Specialists, Plastic Surgeons and Maxillo-Facial Surgeons. It is not designed for experienced users - you will find this too simple!

The webinar will last between **60 and 90 minutes** and allow for a **Q&A session** with Prof Christian Aldridge at the end. We also encourage you to include any questions you would like to ask in the registration form, as this will give you a better chance of having them answered.

The webinar will also account for **one hour of CPD** and all in attendance will be rewarded with a certificate after the event.
