

SWWGL use of online systems

The League uses online electronic systems as much as possible in particular our [Clubs](#) & [Players](#) Databases and our [League Website](#) plus from 2019-20 the [FAW COMET system](#) to run it's operations. It is important that all of this information is kept updated by the relevant League and Club users for everyone's benefit.

The Clubs and Players databases have contained all the master information for the League but this is moving to the FAW COMET system over time. For 2021-22 players need to be confirmed on FAW COMET then ensure their photos are updated (if not done last season), for your electronic team sheets for use in friendly matches and from U7 through to U13 where matches are off COMET.

In 2021-22 COMET and the Cymru Football app will handle all our competitive fixtures from U12 through to Women. In 2022-23 COMET will also cover our non-competitive fixtures in the Minis section. The League website contains all the relevant News items for the season along with documents for rules and guides.

As any updates become available about use of the FAW COMET system we will add them here and you can refer to the [help guides here](#).
