by **Arcluce**

THETA

High-performance ceiling-mounted or suspended luminaire with low glare (**UGR<19** / **UGR<16**), ideal for comfortable and professional lighting in schools, offices, and indoor environments.

TORY [Series]

Series of **HIGH-POWER** modular floodlights, offering an advanced solution for lighting large areas and sports facilities.

Arcluce

Arcluce S.p.A. is an Italian company specialised in the design and manufacture of lighting solutions for both **indoor and outdoor applications**. Founded in 1989, it collaborates with architects, designers, and design studios worldwide, promoting a culture of quality and creativity that has always distinguished its products.

Over the years, the company has experienced steady growth, driven by its **continuous commitment to research** and development and **meticulous control** over the entire production process. From design to realisation, every stage is managed at its headquarters in San Zenone al Lambro, near Milan.

This blend of specialised expertise, innovation, and attention to detail translates into elegant and functional design products, capable of meeting the technical and aesthetic requirements of any project. All Arcluce products are crafted using state-of-the-art technologies and components of the highest quality, ensuring long-lasting **reliability and efficiency**.

CERTIFIED QUALITY

All Arcluce products undergo rigorous testing to ensure compliance with current regulations and adherence to the highest quality standards.

KNOW-HOW

All Arcluce products undergo rigorous testing to ensure compliance with current regulations and adherence to the highest quality standards.

INNOVATION

With more than 35 years of experience, Arcluce has demonstrated its ability to evolve and innovate in response to technological advancements in the sector and the ever-changing demands of the market, creating new concepts and products.

SHOWROOM

Specifically designed for industry professionals, the Arcluce showroom offers an interactive experience, enabling visitors to take a guided tour using a tablet. Products can be individually illuminated and dimmed, allowing for a full evaluation of their technical and structural characteristics.

CONSULTANCY

Arcluce provides comprehensive lighting consultancy, supporting designers, planners, and architects in identifying the most suitable solutions for the functional and environmental requirements of any project.

Its technicians use advanced software to create professional lighting designs and oversee every stage of the process, from the initial concept to installation.

Aerial view of the Arcluce facility in **San Zenone al Lambro (MI)**.

Design & Development

Arcluce designs, develops and engineering its own products within the Research & Innovation Office Development sited in San Zenone al Lambro (Milan, Italy). Investing in research, increasing own technical know-how in synergy with internal production departments, allows for rapid development to the ideas and ensure a complete product quality control final. Careful selection of subjects prime (such as aluminium and glass), the finishes (powder coating double layer), the components of level and numerous product tests final are essential requirements ensure that the quality standards.

Laboratory and testing

IP TESTS

IP testing characterizes the resistance of the equipment to penetration of liquids and solids. This parameter is fundamental in the assess the suitability of a device to the context of the installation: in internal environment rather than outside, in a swimming pool rather than in a supermarket. The reference standard is EN 60529 (integrated with EN 60598).

HEAT TESTS

The reference standard, EN 60598, provides for several tests of durability and heating for the appliances. For this purpose, ARCLUCE has own one-chamber laboratories temperature controlled where they are perform the tests.

Design software and tools DIALux

The software for lighting calculation. Modern computers with the help of special software allow ex-ante verification of all the necessary technical parameters. Arcluce supports the lighting calculation program **DIALux** and provides main design tools. Download the **DIALux plugin**, complete with the entire range of Arcluce devices for internal and external, directly on **arcluce.it**

Sustainable for future applications

Allows integration, at cost virtually no functions advanced such as diagnostics, self-dimming o support for further Electronic boards to extend the functionality of the equipment.

LED lighting

The LED (Light Emitting Diode) is a light source working on the principle of electroluminescence: an electric current passing through a material composite, generates a roughly monochromatic light, generally blue.

The conversion into white light, which is given by the superposition of all colors, it is carried out by means of yellow phosphors, deposited above the LED. The type and characteristics of phosphors define the properties of the emitted light.

ELECTRONIC

- The latest generation of LEDs with top of the category;
- Drivers of the best suppliers with particular attention to durability, protection against overvoltages and harmonic distortions;
- Future-proof solutions to ensure high sustainability of the project.

The benefits of LEDs

In its lighting application, the LED has many advantages over traditional sources:

- **Much more efficient:** an order of the size of the water sources in incandescence, about twice the to fluorescents. Reduction of the number of appliances installed while obtaining the same illuminance;
- **It is four times longer** than a fluorescent source. Reduction of expensive replacement operations lamp;
- **Is flexible in intensity control light.** The LED does not need preheating and is able to deliver instantly its maximum power. In addition, its principle of operation allows very fast ON/OFF cycles which, properly modulated, can be provide the visual perception of a more or less intense light to the pleasure of the user;

IK TESTS

The resistance to shocks, characterized by from degree IK, is a parameter discrimination for eligibility to certain installation categories: for example in land-based rather than for a projector. The legislation reference is EN 62262.

RILIEVI FOTOMETRICI

To support lighting designers, Arcluce provides the photometric data of all its fixtures, produced under controlled conditions in its own laboratory according to the EN 13032 standard.

Glare UGR

The glare, which can be either direct or by reflection, is evaluated by the index UGR (Unified Glare Rating).

This index, which is not to the appliance itself but rather to the apparatus in the context of a installation, it is produced by a formula mathematics that takes into account photometry and body dimensions illuminants in conjunction with reflectance of the surrounding environment. For more details, see the EN12464.

• It is versatile in creating the light.

The conversion into white light by using phosphors to generate a wide choice of white light optimizing the parameters from time to time more relevant. By way of example we may indicate colour temperature, the colour rendering index, gamut or the saturation of particular colours in function of the subject to be illuminated. In the phosphorous process in particular, in contrast to fluorescent or discharge sources, continuous

spectra can be obtained more similar to natural light and to return with fidelity a greater color range (Table: Source to comparison).

• **It is not harmful to illuminated subjects.** The limited spectrum of light generated by a LED is less aggressive, in fact it is at its UV radiation end, which may be harmful to humans and some materials, and infrared radiation that by heating the illuminated objects could degrade them. It is important to note that these spectrum components are not directly involved in the process vision (Table: LED spectrum).

Efficiency and lifespan of main light sources

Light Source	Efficiency lighting technology (lm/W)	service life (hours)
Glowing	15-20	1000
Halogen tungsten	12-23	from 2000 to 4000
Steam lamps mercury	40-60	12000
Compact fluorescent lamp	40-70	from 6000 to 12000
Fluorescent lamp	50-100	from 10000 to 16000
Induction lamp	60-80	from 60000 to 100000
High pressure sodium	80-100	from 12000 to 16000
LED	80-160	from 50000 to 100000

Energy optimization of low power LED drivers in indoor lighting - O. F. Farsakoglu, H. Y. Hasirci - JOURNAL OF OPTOELECTRONICS AND ADVANCED MATERIALS - Vol. 17, No. 5-6, May - June 2015, p. 816 - 821

Color Rendering Index (CRI)

The best known parameter for Assessing spectrum richness is the colour rendering index (CRI). It measure the capacity of a source of light to return the colors and comes calculated on the average of eight colour samples well defined.

Commitment to Sustainability

Arcluce aligns with the guidelines of the 2030 Agenda for Sustainable Development, integrating principles of ecology and responsibility into every aspect of its activities. For the company, sustainability is not just an ethical value but a cornerstone of its business strategy, aimed at creating solutions that foster a brighter and more environmentally respectful future.

■ **Eco-friendly Materials:**

Arcluce products are designed with durable and recyclable materials, minimising environmental impact and promoting a low ecological footprint.

■ **Energy Efficiency:**

The company develops high-efficiency lighting systems that ensure superior performance while contributing to CO2 emissions reduction. These solutions are fully aligned with global goals to combat climate change.

■ **Responsible Manufacturing Processes:**

Arcluce's manufacturing processes are optimised to reduce waste and encourage material recycling, adhering to responsible consumption objectives.

Sustainable development

joint commitment.

■ **Urban Sustainability:**

Collaborating with architects and planners, Arcluce develops lighting solutions that comply with environmental regulations, contributing to the creation of sustainable spaces, both urban and natural.

■ **Sustainable Innovation:**

Investment in research and development enables the company to offer products that improve visual comfort, optimise energy efficiency, and respect the environment, combining innovation and sustainability.

With this integrated approach, Arcluce reaffirms itself as a responsible leader in the lighting sector, committed to achieving the highest standards of global sustainability.

GEO

UGR
<19

Recessed hole:

GEO is an **adjustable recessed** tiltable luminaire that combines aesthetics, efficiency and durability. Its even and soft light beam makes it ideal for highlighting showcases and exhibits, always ensuring maximum visual comfort. The glossy black (or white) optics and lens will not only ensure performance, but also add elegance, making it the right choice for a variety of environments. Refined and versatile, GEO is designed for those **looking for quality** and **visual comfort solutions**.

CHARACTERISTICS

- Die-cast aluminum body and frame.
- UV-stabilized anti-yellowing powder coating.
- LED lenses made of optical technopolymer.
- Luminaire built in accordance with EN 60598-1 and EN 60598-2-2

INSTALLATION

- Recessed installation.
- Steel wire spring fastening with technopolymer cover.

OPTIONAL WIRING: Available in version with **DALI (B)** wiring.

Also available
with white frame
or with black frame.

Available with reflector
in black or white
(glossy).

Small size in
a compact design,
versatile and elegant.

GEO is equipped with steel fixing springs and pre-wired drivers
with useful length wire for convenient placement in the
false ceiling.

LUMI-OR

LUMI-OR is a series of adjustable recessed ceiling spotlights that combine high performance with elegant design. The three sizes of luminaires are adapted to the **different lighting needs** of **commercial spaces**. Thanks to advanced optics and a unique design, the LUMI-OR series luminaires can provide optimal visual comfort when illuminating vertical surfaces without compromising light quality.

LUMI-OR1
hole 102mm

LUMI-OR2
hole 153mm

LUMI-OR3
hole 180mm

CHARACTERISTICS

- Die-cast aluminum body and frame.
- UV-stabilized anti-yellowing powder coating.
- LED lenses made of optical technopolymer.
- Long LED service life: >50000h with L80.
- Luminaire built in accordance with EN 60598-1 and EN 60598-2-2

INSTALLATION

- Recessed installation.
- Fastening with steel springs.

OPTIONAL WIRING: Available in version with **DALI (B)** wiring.

Solid and sturdy structure with steel springs for stable and secure anchoring to the suspended ceiling.

LUMI-OR1

LUMI-OR2

LUMI-OR3

The LUMI-OR series is equipped with pre-wired drivers with useful length wire for practical placement in the false ceiling.

MAXIMUM DISSIPATION
The aluminum body and the large number of fins, help maintain an optimal operating temperature, preventing overheating and preserving the life of the light source.

CHARACTERISTICS

- Die-cast aluminum body and frame.
- UV-stabilized anti-yellowing powder coating.
- High vacuum metallized polycarbonate reflector.
- Tempered glass screen.
- Long LED service life: >50000h with L80.
- Luminaire built in accordance with EN 60598-1 and EN 60598-2-2

INSTALLATION

- Recessed installation.
- Fastening with steel springs.

OPTIONAL WIRING: Available in version with **DALI (B)** wiring.
On request fully IP65 version (luminaire and driver).

Driver with Power selector

Side to be opened for selector setting power.

TANTUM210

(high power recessed)

TANTUM210 is a powerful recessed ceiling light, available in a color frame and two color temperatures, designed to meet lighting needs with high ceilings. Suitable for use in shopping malls, airports, halls, car showrooms. It is characterized by **excellent performance** and **uniform, high-quality lighting** and contributes to improving the architecture and functionality of the premises.

CHARACTERISTICS

- Die-cast aluminum body and frame.
- UV-stabilized anti-yellowing powder coating.
- Anodized specular anodized aluminum reflector antiridescent.
- Tempered glass or polycarbonate screen.
- High-quality LED sources characterized according to IES TM-30 methodology, with high color consistency <3SDCM and long service life >60000 hours with L80.
- Luminaire built in accordance with EN 60598-1 and EN 60598-2-2

INSTALLATION

- Recessed installation.
- Fixing by means of technopolymer brackets.

Also available in version with CCT: **3000K (-830/-930)**

OPTIONAL WIRING: Available in version with **DALI (B)** wiring.

INDOOR

QUANTUM210

(high power recessed)

QUANTUM210 is a powerful recessed square light, designed to ensure excellent and balanced lighting. The elegantly designed light is ideal for large rooms and spaces **with high ceilings, ensuring uniform, regulatory-compliant lighting**. A reliable solution for sustainable modern projects.

CHARACTERISTICS

- Die-cast aluminum body and frame.
- UV-stabilized anti-yellowing powder coating.
- Anodized specular anodized aluminum reflector antiridescent.
- High-quality LED sources characterized according to IES TM-30 methodology, with high color consistency <3SDCM and long service life >60000 hours with L80.
- Luminaire built in accordance with EN 60598-1 and EN 60598-2-2

INSTALLATION

- Recessed installation.
- Fixing by galvanized steel brackets.

Also available in version with CCT: **3000K (-830)**

OPTIONAL WIRING: Available in version with **DALI (B)** and **BLE (T)** wiring.

XENON

Universal light, designed for ceiling or wall mounting. Features a simple oval-shaped functional design. It is equipped with **advanced technologies**, including a **CCT selector**, **motion** and **twilight sensors**, ensuring smart and autonomous light control. Available in white and black body colors. There is an option to use a unidirectional accessory for partial light shielding.

XENON

Also available in black.

XENON

Version available with motion and twilight sensor.

CHARACTERISTICS

- Polycarbonate body and diffuser
- Integrated driver
- Long LED lifespan: >30,000 hours
- Fixture constructed in compliance with EN 60598-1 and EN 60598-2-1 standards

INSTALLATION

- Quick installation via bracket, without opening the ceiling light.
- Wall or ceiling installation.

XENON with CCT Selector

Thanks to the CCT Selector, XENON is much more versatile than other similar products.

This option allows you to:

- Reduce the storage space occupied by the same product in multiple variants by a third;
- Manage customer changes even after installation, by simply adjusting a setting;
- Significantly reduce stock levels, minimizing the purchase of numerous variants of the same product.

XENON CCT - Versions with CCT Selector for 3000K, 4000K, 5000K

CCT SELECTOR

Thanks to the CCT Selector, it is much more versatile than other similar products; in fact, this option allows you to customize the color temperature of the emitted light (with settings at 3000K, 4000K, and 6000K).

**INTEGRATED EMERGENCY KIT**

To compensate for unexpected power outages, it keeps the area illuminated with up to 1 hour of autonomy.

Available in the 280mm version.

NIGHT STAIRWAY LIGHT FUNCTION
 (can be activated by disabling the integrated light sensor and optionally used in combination with an external twilight sensor)

The power of the ceiling light is reduced to 15% until the presence sensor detects movement, bringing the power back to 100% for a selectable period. Once this period ends, the power returns to 15%.

PERFECT AS A SAFETY LIGHT FOR STAIRWELLS AND APARTMENT BUILDINGS.

When switched on, the ceiling light dims to stand-by level (15% intensity) in the absence of movement.

When motion is detected, the light increases to 100% power for a selectable period. After the set time expires, the light returns to stand-by level (15% intensity).

KORA

Universal square luminaire series, available in three sizes, perfect for wall or ceiling mounting. Equipped with **innovative technologies**, including **CCT selector** (3000K, 4000K, 6000K) and **motion** and **twilight sensors**. This provides adaptable and intelligent lighting solutions that optimize energy efficiency and increase visual comfort.

CHARACTERISTICS

- Body and diffuser made of polycarbonate.
- Driver integrated into the fixture.
- Long LED lifespan: >30,000 hours.
- Fixture designed in compliance with EN 60598-1 and EN 60598-2-1 standards.

INSTALLATION

- Quick installation via bracket, without opening the luminaire.
- Suitable for wall or ceiling installation.

NOTE: **KORA SNS is also available with CCT: **3000K (-930)**.

The infinite possibilities of KORA

The soft, tapered profile of KORA helps define spaces with uniform and pleasant lighting. The combinations are endless, allowing lighting designers to create geometric compositions by playing with the various available sizes.

SELENA

SELENA series, available in 3 sizes, for wall and ceiling mounting. It features **advanced technologies**, including a **power selector** (3 different powers) and a **CCT selector** (3000 K, 4000 K, 5000 K), allowing precise and individual control and adaptation of lighting to various environments.

Practical fixing

The SELENA series is equipped with a practical quick-release ring to simplify and reduce installation time.

First, install the bracket, then hook the fixture.

External wiring

Even the wiring is quick and easy. The external panel connector is practical and easily accessible, with no need to open the fixture.

The door opens with a simple press.

CHARACTERISTICS

- Body and diffuser made of polycarbonate.
- Silicone rubber seals with controlled hardness, stabilized against UV rays.
- Built-in driver.
- High-quality LED sources characterized according to IES TM-30 methodology, with high color consistency <3SDCM and a long lifespan >60,000 hours with L80.
- The fixture is constructed in compliance with EN 60598-1 and EN 60598-2-1 standards, complete with CE marking in accordance with EU directives.

INSTALLATION

- Quick installation via bracket, without opening the fixture.
- Wall or ceiling installation.
- Equipped with manual power and CCT selectors for optimal performance adjustment.

TRAC-LINE 220V

TRAC-line 220V is a **highly functional DALI spotlight power rail**, suitable for wall, ceiling or suspended mounting. The standard connection allows you to connect multiple spotlights, in several power lines and groups, ensuring secure mounting and proper power supply.

CHARACTERISTICS

- Extruded aluminum body.
- Wiring for three ignitions ON/OFF.
- Prepared for DALI.

INSTALLATION

- Ceiling and suspension installation.

NOTE: Also Available versions with Casambi and other modern control systems, for more information see "Light controls" section.
End caps and fixation accessories to be ordered separately.

INSTALLATION ACCESSORIES (LEGEND)

	SUSPENSION	WALL/CEILING
standard accessories	1 - 3 phase end feed	
	2 - 3 phase track	
	3 - 3-phase linear electric joint

ADVICES

HOW TO CUSTOMIZE THE TRACK

Electrified tracks are supplied with a standard length (1, 2 and 3 meters). When it is necessary to make custom measurements it is necessary to cut them with a hacksaw or circular saw suitable for aluminum. After cutting the rail you must shorten the contacts with the appropriate accessory (1099258X) for a length of at least 5mm.

color rendering.

**Die-cast aluminum
body** and powder
coated anti-yellowing
UV-stabilized.

Practical and functional
ZOOM integrated into
the luminaire body
with smooth movement
and precise continuous
stroke.

MACROZOOM

220V track spotlight with a slim and compact design. The reduced thickness of the fixture gives to the rooms an innovative and modern look, to illuminate with refined sobriety. Equipped with a double joint, with rotation of 355° on the horizontal axis and 90° on the vertical axis, it allows complete adjustability. The ZOOM function integrated into the body is smooth, precise and continuous stroke, complete performance and offering total control of the light.

- The body is made of die-cast aluminum and painted with UV-stabilized anti-yellowing powder, also suitable for use in store windows exposed to direct sunlight.
- The high versatility of rotation (double joint), combined with the practical and functional ZOOM (continuous stroke), make it particularly suitable for display environments that need functional light management (also available in **DALI** and **CASAMBI** versions).
- Made with PMMA optical lenses and LED sources with high CRI 95 values, MACROZOOM offers the highest lighting quality, with beams that range from 16° to a maximum of 60° depending on the model.

Double joint allows for
complete swiveling of the light.

- Can be installed on 220V track, even in addition to other fixtures, to illuminate specific objects placed in areas that are normally unreachable.
- Recommended for display environments that require high lighting versatility, MACRO ZOOM is also suitable for typically residential settings, where an eye for aesthetic impact is required.
- The driver, built into the adapter, has **LOW-FLICKER** technology for high visual comfort.

APPLICATION CONTEXTS

Examples of installation in commercial (retail) and display environments, as well as residential settings, where the aesthetic impact and design are particularly sought after.

Residential with minimal installation on ceiling track.

Shop window (diffuse or spot lighting on details).

Exhibition spaces with high ceilings (high-power lighting).

Exhibition space with high lighting versatility.

MACROZOOM

MACRO ZOOM is a universal spotlight with a minimalist and compact design, designed to ensure high performance in **changing exposures** and **spaces**. Due to its low profile, rotatable housing and integrated variable light beam, this spotlight is particularly suitable for lighting **shop windows** and **shops**, ensuring maximum flexibility and high-quality accent lighting.

CHARACTERISTICS

- Die-cast aluminum body
- UV-stabilized anti-yellowing powder coating.
- Driver built into the adapter.
- PMMA lenses.
- Long LED service life: >50000h with L80.
- Luminaire built in accordance with EN 60598-1 and EN 60598-2-1 standards.

INSTALLATION

- Track installation.
- Electrified track adapter made in technopolymer.

NOTE: Also available in version with CCT: **4000K (-940)**;

OPTIONAL WIRING: also available in **DALI (B)** version
On request version with CASAMBI and other modern control systems.

REWO/REWOZOOM

REWO / REWO ZOOM – compact design spotlights, also available **with variable beam**. The frame with a scale allows easy adjustment of the beam from 20° to 55°, thus ensuring complete flexibility and the ability to adapt the light to different lighting needs, ensuring optimal precision and control of the beam.

CHARACTERISTICS

- Extruded aluminum body.
- UV-stabilized powder coating with anti-yellowing properties.
- Driver built into the adapter.
- High vacuum metallized polycarbonate reflector or PMMA lens.
- Long LED service life: >50000h with L80.
- Built in accordance with EN 60598-1 and EN 60598-2-1 standards.

INSTALLATION

- Track installation.
- Electrified track adapter made in technopolymer.

NOTE: Also available in version with CCT: **4000K (-940);**
OPTIONAL WIRING: also available in **DALI (B)** version
On request version with CASAMBI and other modern control systems

INDOOR

CORE

CORE series track spotlights are offered in three universal sizes, adapted to various applications. The “CORE2” and “CORE3” models have a “ZOOM” version and allow individual adjustment of the beam from 18° to 50° (CORE2) and from 20° to 56° (CORE3), ensuring **optimal flexibility** for each lighting situation.

CHARACTERISTICS

- Extruded aluminum body.
- UV-stabilized powder coating with anti-yellowing properties.
- High vacuum metallized polycarbonate reflector or PMMA lens.
- Long LED service life: >60000h with L80.
- Fixture built in accordance with EN 60598-1 and EN 60598-2-1 standards, complete with CE marking in compliance with EU directives.

INSTALLATION

- Track installation.
- Electrified track adapter made of technopolymer.
- Possibility of ceiling or recessed installation via the special technopolymer base accessory.

NOTE: Available versions with CCT **4000K (940)**

THETA

THETA ceiling or suspended universal luminaire, available in two lengths. Particularly suitable for lighting schools (classrooms, corridors, common areas) and offices, where high and functional lighting quality is required. Clean and concise design. THETA is classified according to **UGR<19** and **UGR<16**, therefore ensuring comfortable lighting and low glare.

THETA is equipped as standard with a **CCT Selector** (settable to **3000K** or **4000K**) and a **Power Selector** (see table above). The selectors, located inside the fixture, are easily accessible even after installation. The ceiling light is also equipped with a safety cord and hook to facilitate activities even after installation.

CHARACTERISTICS

- Extruded aluminum body.
- Technopolymer end caps.
- UV-stabilized powder coating with anti-yellowing properties.
- Technopolymer reflector.
- Optical technopolymer LED lenses.
- High-quality LED light sources characterized according to IES TM-30 methodology, with high color consistency <3SDCM and long lifespan >60,000 hours with L80.
- Fixture built in accordance with EN 60598-1 and EN 60598-2-1 standards, complete with CE marking in compliance with EU directives.

INSTALLATION

- Ceiling or suspended installation.
- Double cable entry prepared for cascading connection.
- Suspension with 1.5m steel cable (accessory).

NOTE: Available versions with Casambi and other modern control systems.
OTHER MOUNTING ACCESSORIES TO BE ORDERED SEPARATELY.

Modularity and ease of installation

THETA structure is designed with mounting holes to allow luminaires to be installed in a single line. The luminaire has electrical inputs at both ends and is connected to the line by means of additional accessories.

 Suitable
 for use with visual
 display units

FLAT Illuminating plane with **microprismatic screen**, designed to ensure even light distribution and **optimal glare reduction (UGR<19)**. Available in rectangular format with CRI90, ensuring excellent color rendering. It is adapted to environments that require both high light output and better visual comfort. Suitable for both suspended ceilings and plasterboard and surface mounting (with accessories).

Frame made in 5 processing steps

Double-sided robotic welding for superior strength.

CHARACTERISTICS

- Stamped steel body.
- Extruded aluminum frame.
- UV-stabilized anti-yellowing powder coating.
- Transparent microprismatic visible screen, inner PMMA screen
- Long LED service life: >50000h with L80.
- Luminaire constructed in accordance with EN 60598-1 and EN 60598-2-2.

INSTALLATION

- Recessed installation.
- Possibility of ceiling or recessed installation in false ceilings plasterboard using appropriate accessories.

NOTA: Also available in versions with **DALI** wiring (B), **ON/OFF-E** (G), **DALI-E** (H).

ANYTHING BUT ORDINARY - THIS ISN'T JUST A PANEL!

The new LED panels OPTICAL and PHASE combine design and high lighting performance.

The optics created to optimize **visual comfort** and to **reduce glare**, make these devices particularly adapted for installation in schools, offices, and environments with video terminals as such as in hospitality facilities and commercial spaces.

Equipped with **CCT Selector 3000K, 4000K, and 5700K** are also available in DALI version. Possibility of installation on the ceiling or recessed using specific accessories.

OPTICAL: optical system designed to ensure high performance and **reduce glare**.

PHASE: optical system with differentiated microprismatization for high visual comfort and a **reduction of glare**.

DALI

Suitable
for use with visual
display units

OPTICAL is an LED panel that combines style and high efficiency (up to 150 lm/W). The pressed steel and powder-coated housing houses high-efficiency, long-lasting LEDs. The use of **technopolymer LED lenses** ensures uniform light distribution and **minimal glare**, making the product particularly suitable for environments with video terminals. Equipped with a CCT selector (3000K, 4000K and 5700K), it is also available with **DALI control**.

CHARACTERISTICS

- Stamped steel body.
- UV-stabilized anti-yellowing powder coating.
- Technopolymer lightbreaker.
- Opal microprismatic plastic screen.
- High quality LED sources characterized according to IES TM-30 methodology, with high color consistency <3SDCM and long life >60000 hours with L80.
- Luminaire built in accordance with EN 60598-1 and EN 60598-2-2, complete with CE marking in compliance with EU.

INSTALLATION

- Recessed installation.
- Possibility of ceiling or recessed installation in false ceilings.

OPTICAL WITH CCT SELECTOR

The CCT Selector allows you to customize the temperature of the light emitted (with settings at 3000K, 4000K, 5700K).

INDOOR

PHASE

PHASE is an LED panel designed to maximize visual comfort thanks to the combined **microprismatic optics** and **chrome reflector**. Balanced light distribution between the light emitting part and the central reflector strip. Designed for installation in offices and public spaces, it is also recommended for schools, receptions and commercial spaces. Integrated CCT 3000K, 4000K and 5700K selector, it is also available in DALI version. Can be mounted on the ceiling or recessed using special accessories.

CHARACTERISTICS

- Stamped steel body.
- Extruded aluminum frame.
- UV-stabilized anti-yellowing powder coating.
- External hardware in AISI 316 stainless steel.
- Technopolymer lightbreaker.
- Opal microprismatic plastic screen.
- High quality LED sources characterized according to IES TM-30 methodology, with high color consistency <3SDCM and long life >60000 hours with L80.
- Fixture built in accordance with EN 60598-1 and EN 60598-2-2, complete with CE marking in compliance with EU directives.

INSTALLATION

- Recessed installation.
- Possibility of ceiling installation or recessed installation in false ceilings plasterboard using special accessories.

WATERPROOF PRODUCTS FOR EVERY APPLICATION YOU NEED

Waterproof ceiling luminaires provide **high protection** against external factors such as dust, humidity and liquids, in environments with **high resistance to harsh conditions**, such as warehouses, production lines with dust or fumes, where there is humidity, temperature changes and there may be exposure to exhaust gases and aggressive and disinfectant fumes.

Compare models, choose the most suitable waterproof product for your project.

Mechanical Workshops and Garages

FLIPPER

FLIPPER waterproof luminaire has been designed for practicality and functionality, especially for environments that require reliable operation and durability of the luminaire. Thanks to its robust and discreet design, it easily integrates into any environment, while ensuring a **very competitive price-quality ratio**. It is a universal choice for lighting industrial, commercial and technical spaces, where efficiency and economy are combined.

CHARACTERISTICS

- Body and diffuser made of polycarbonate resistant to the incandescent filament test at 850°C.
- Opal diffuser stabilized against UV rays.
- Fixture built in accordance with EN 60598-1 and EN 60598-2-1 standards.
- Fixture with efficiency up to 110lm/W.
- Long LED lifespan: >50,000 hours.

INSTALLATION

- Ceiling or wall mounting using stainless steel brackets or suspension.
- Panel connector for quick wiring.
- M20 cable gland.

Rated Ta (max Ta):	ON/OFF	-20°C ÷ +25°C (45°)

NOVA

**POWER
SELECTOR**
on all versions

NOVA is a high-performance waterproof luminaire that combines innovation and durability to meet lighting needs in demanding environments. It features a practical integrated **power selector** that allows you to optimize energy consumption without compromising **energy efficiency**.

CHARACTERISTICS

- Body and diffuser made of polycarbonate resistant to the incandescent filament test at 850°C.
- Semi-transparent diffuser stabilized against UV rays.
- All versions are equipped with a power selector for optimized management of energy consumption and lighting values.
- Stainless steel closure hooks.
- Fixture built in accordance with EN 60598-1 and EN 60598-2-1 standards.
- Fixture with efficiency up to 160lm/W.
- Long LED lifespan: >50,000 hours.

INSTALLATION

- Ceiling or wall mounting using stainless steel brackets with included hooks, or suspension with KIT to be ordered separately: Code 1099576X.
- M20 cable gland.

NOTE: Versions with 6500K LED.

Rated Ta (max Ta):	ON/OFF	-20°C ÷ +25°C (45°)

NEFF Series. Quality laid bare!

Simple design, incredible durability.

- 1 Injection-molded opal polycarbonate diffuser with high light transmittance, UV-stabilized. Smooth exterior finish for easy cleaning and ribbed interior for optimal light distribution. High resistance to mechanical impacts.
- 2 Equipped with an SMD2835 LG LED board arranged in two rows for uniform light distribution and improved heat dissipation.

- 3 LOW FLICKER driver with integrated color temperature selector. Power factor >0.9.
- 4 Injection-molded polycarbonate housing in RAL7035, UV-stabilized, with high mechanical impact resistance..
- 5 Internal clips for quick and secure LED board mounting..
- 6 Stainless steel closure clips.

Waterproof ceiling luminaire with **technopolymer fixtures**.
Also available with a 6500 K colour temperature.
High-quality design at a competitive price.

CHARACTERISTICS

- Body and diffuser made of polycarbonate resistant to the incandescent wire test at 850°C.
- UV-stabilized opal diffuser.
- Technopolymer closure clips.
- Fixture built in compliance with EN 60598-1 and EN 60598-2-1 standards.
- Fixture with efficiency up to 140lm/W.
- Long LED lifespan: >50,000 hours.

INSTALLATION

- Ceiling or wall mounting with stainless steel brackets or suspended installation.
- Panel connector for quick wiring.
- M20 cable gland.

CCT SELECTOR

NEFFPlus with CCT selector is much more versatile than other similar products. This option allows:

- Reduce storage space by a third, as the same product includes several product versions.
- The spectrum can be changed according to customer requirements even after installation, simply by adjusting the setting.
- By reducing the amount of stock in the warehouse, the need to buy multiple versions of the same product is also sustainably reduced.

PROMO DISPLAY

Waterproof Ceiling luminaire
in configurable KIT

The Waterproof Ceiling Light **PROMO DISPLAY** is the ideal solution for the dynamic management of this product category within retail spaces.

Made of sturdy cardboard and firmly anchored to the included wooden pallet, it features a practical honeycomb structure designed to keep the ceiling lights perfectly positioned, even when only one remains.

The **PROMO DISPLAY** is available in a customizable configuration for NEFF and E-GLOW Plus products.

Contact us for more details

The **PROMO DISPLAY** is delivered complete with a custom Arcluce-branded natural brown cardboard shell and transparent shrink film.

THERMA/THERMAEasy

Fino a
+50
-40

THERMA/ THERMAEasy) - a technical ceiling luminaire with a single housing, designed for **extreme temperature conditions**, reliably operates in environments with large fluctuations, ensuring optimal operation from -40 °C to +50 °C (THERMA) and from -25 °C to +25 °C (THERMAEasy). **Resistance class IP69K**.

CHARACTERISTICS

- Body and diffuser made of opal PMMA, resistant to aggressive acidic or highly alkaline agents.
- Stainless steel end caps and hooks.
- Anti-condensation valve.
- Dual M20 cable gland.
- Fixture built in compliance with EN 60598-1 and EN 60598-2-1 standards, with CE marking in accordance with EU directives.
- Fixture with efficiency up to 160lm/W.
- Long LED lifespan >50,000 hours.

INSTALLATION

- Ceiling or wall installation with stainless steel hooks.
- Dual panel connector for quick wiring, allowing for cascade connection.

NOTE: Do not install the fixtures on surfaces subject to strong vibrations.
Do not install the fixture outdoors exposed to direct sunlight.
For chemical resistance, please request the compatibility data sheet.

made of
304 stainless steel

NOXIA - a high-quality waterproof ceiling luminaire with a stainless steel housing, characterized by strength and durability. It is **made of stamped and painted 304 stainless steel**, with a tempered glass, impact-resistant diffuser, or a UV stabilized opal polycarbonate diffuser.

CHARACTERISTICS

- Body made of 304 stainless steel, stamped and painted.
- Stainless steel closure hook.
- UV-stabilized anti-yellowing powder coating.
- Silicone rubber seals.
- Tempered glass diffuser resistant to thermal shock or UV-stabilized opal polycarbonate. Resistant to the incandescent wire test at 850°C, self-extinguishing V0.
- High-quality LED sources characterized according to IES TM-30 methodology, with high color consistency <3SDCM and long lifespan >60,000 hours with L80.
- Fixture built in compliance with EN 60598-1 and EN 60598-2-1 standards, with CE marking in accordance with EU directives.

INSTALLATION

- Ceiling or wall installation.
- M20 steel cable gland.
- Mounting to ceiling or wall using stainless steel brackets with included hooks, or suspended installation with KIT available separately: Code 1099576X

NOTA: Also available with wiring **DALI (B)**

All codes are available in EMERGENCY version.

Replace the letter "A" in the code with the letter "G" (SE/SA) (3 hours).

UP TO 33 METERS
(1000W per
single line)

Complete with
an **integrated CCT Selector**
with selectable options at
3000K, 4000K, and 6500K.

Can be
installed both
surfacemounted
and **suspended.**

Through wiring,
two separate wirings
on the same line

E-GLOW^{Plus} SYSTEM

Thanks to the **selector** on the end cap, you can choose between warm light (3000K), neutral light (4000K), or cool white light (up to 6500K), adapting it to any commercial sector while keeping the same installed product. With its sleek, linear, and unobtrusive design, it is suitable not only for industrial environments but also for commercial display areas.

- The lighting modules are pre-wired with a dual push-in terminal, allowing for cascade connection up to 1000W per run.
- With the complete range of IP65 accessories, you can create various lighting layouts, ensuring uniform illumination of display areas without the need for additional exposed conduits.
- All accessories feature a quick-snap connection to the lighting module, eliminating the need for tools during installation.
- You can install it suspended using the included triangular steel brackets, allowing for the use of chains or cables of your choice.

4 practical connectors for endless lighting solutions.

- For a quick and practical surface-mount installation, use the quick-lock stainless steel brackets (included), which slide along the entire length of the lighting module, eliminating the need for fixed drilling points in the ceiling.
- The low-flicker driver ensures excellent visual comfort in workplaces, such as production lines with on-site personnel.

APPLICATION AREAS

*E-GLOW Plus is a lighting solution that can be installed either as a single unit or in a modular configuration. Installation examples based on the version: **SYSTEM** using practical connectors for flexible installations, **LINEAR** pre-wired for cascade connection.*

Supermarkets

Shopping centers

Technical workshops and Manufacturing labs

Warehouse and logistics

E-GLOWPlus

E-GLOW is a ready-to-connect ceiling light with **advanced technology**, designed to ensure maximum convenience and installation flexibility, with an integrated **CCT selector** that allows you to choose from a variety of light color temperatures (3000 K, 4000 K and 6500 K).

CHARACTERISTICS

- Body and diffuser made of polycarbonate, resistant to the incandescent wire test at 850°C.
- UV-stabilized opal diffuser.
- Fixture built in compliance with EN 60598-1 and EN 60598-2-1 standards.
- Fixture with efficiency up to 140lm/W.
- Long LED lifespan: >50,000 hours.

INSTALLATION

- Ceiling or wall mounting via stainless steel brackets or suspended installation.
- Panel connector for quick wiring.
- M20 cable gland (option for double cable gland for cascade connection).
- Pre-wired fixture for cascade connection.

Rated Ta (max Ta):	ON/OFF	-20°C ÷ +25°C (45°)
	ON/OFF-E	+5°C ÷ +25°C (40°)

E-GLOWPlus

✗ 

INSTALLATION IN 4 STEPS

Simple, no tools required!

Cable gland for standard electrical connection.

The opposite side is pre-wired with provisions for cascade connection and includes a CCT selector (cable gland accessory included in the package).

THE PACKAGE INCLUDES

Installations up to 1000W per single line.

THE WATERTIGHT MODULAR SYSTEM WITH CONVENIENT CCT SELECTOR

Thanks to the CCT selector, it is far more versatile than similar products, as this feature allows you to customise the light colour temperature (with settings at 3000K, 4000K, and 6500K).

LINEAR - For single installations or daisy-chain connections (version with end caps included).

INDUSTRY

LOFT/LOFTPlus

LOFT / LOFT PLUS Versatile and reliable industrial high bay light. Available in three versions: 100 W, 150 W and 200W, perfectly suited to various **industrial needs** and ensuring **high light output**. Complete with DIMM 1-10 V LED controllers.

CHARACTERISTICS

- Die-cast aluminum body.
- Tempered glass or polycarbonate screen.
- Fixture with efficiency up to 150lm/W.
- Long LED lifespan: >50,000h.
- Fixture built in accordance with EN 60598-1 and EN 60598-2-1 standards.

INSTALLATION

- DIMM 1-10V driver included.
- Driver with surge protection.
- Ceiling or suspended installation.
- Fixing via painted steel bracket (code 1099421X) or eye hook.

NOTE: Versions with 6500K LED.

URBAN LIGHTING

ECO is a new series of spotlights designed for **professional lighting** of large areas and streets, as well as for **architectural use** (both direct on facades and reflected light). Suitable for use in public spaces and residential environments. High energy efficiency, economy and reliability - a product designed and manufactured from easily recyclable materials such as aluminum, glass and steel. The laconic design and compact profile are the result of careful design aimed at ensuring a pleasant aesthetic impression and **optimal cooling of the housing**.

The ECO series is available in three sizes: ECO0, ECO1 and ECO2, in two versions: **floodlight** (with steel bracket) and **urban for pole mounting** (with adjustable pole bracket or Ø 60 mm reducer). Both high-performance and professional versions are available with a wide choice of optics and power supplies.

MAIN FEATURES

- Die-cast aluminum body (EN 47100).
- Polyester powder coating stabilized against UV rays, corrosion-resistant, and resistant to salt mist.
- Silicone rubber gaskets.
- External screws in AISI 316 stainless steel.
- Driver with protection against network overvoltage.
- Floodlight reflector in anodized anti-glare aluminum or optical polymer lenses.
- Urban (post-top): LED lenses in PMMA.
- 4mm thick tempered glass screen, resistant to thermal shocks.
- High-quality LED light sources characterized according to IES TM-30 methodology, with high color consistency <3SDCM and long service life >80,000 hours with L80.
- Compliant with EN 60598-1 and EN 60598-2-3 standards.

INSTALLATION (Floodlight)

- Galvanized and painted steel mounting bracket.
- M20 cable gland in technopolymer with anti-condensation valve.
- Supplied complete with 0.5m power cable.

INSTALLATION (Urban - Pole-top)

- Pole-top installation (reduction from Ø60mm).
- Adjustable orientation: Pole-top: -5° to +30°; Arm: -30° to +30°.
- M20 cable gland in technopolymer with anti-condensation valve.
- Supplied complete with cable and IP66 plug-and-socket connector with locking collar for cables from 9 to 12mm.

NOTE: Available also in CCT version: **3000K (-830)**.
On request, available with DALI wiring: **DALI (B)**.
Also available in **black 12 (-12)** and **dark gray 16 (-16)** color options.

Rated Ta:	ON/OFF	-20°C ÷ +25°C
-----------	--------	---------------

Perfect asymmetry for professional applications.

ECO is available with a **45° asymmetric optic**, along with a wide range of other optics.

Suitable for direct or indirect lighting

Product tested for indirect lighting (facing upwards), designed for professional illumination of ceilings and vaults in both indoor and outdoor environments.

ASYMMETRIC OPTIC 45° (APPLICATION EXAMPLE)

Lighting for large areas (SPORTS HALL 40x20M FOR 8M HEIGHT)

ECO2 - Floodlight (Power 200W)

EQOS [Series]

EQOS0 (40W up to 75W)

PERFORMANCE PROFESSIONAL

EQOS1 (75W up to 150W)

PERFORMANCE PROFESSIONAL

EQOS2 (160W up to 300W)

PERFORMANCE PROFESSIONAL

EQOS is the **latest generation of floodlights**, designed to provide optimal light output, wide versatility of use and energy efficiency. Modern, subtle and elegant design combines with cutting-edge technology to ensure high lighting performance, highlighting architectural elements. Durable materials ensure excellent resistance to corrosion and weathering.

The EQOS series is available in three sizes: EQOS0, EQOS1 and EQOS2, in 3 versions: **floodlight** (with steel bracket); **ceiling-mounted** (with galvanized and painted steel bracket) **and suspended** (with 4 eyelet fixings).

MAIN FEATURES

- Die-cast aluminium body (EN 47100).
- Double layer polyester powder paint resistant to corrosion and salt spray fog.
- Silicone rubber gaskets.
- AISI 316 stainless steel external screws.
- Wiring on removable galvanized steel tray.
- Driver protected against voltage surges up to 4kV.
- Reflector made of anodized aluminium with non-iridescent specular finishing or metallized polycarbonate in high-vacuum.
- Screen made of 4mm thermal-shock resistant tempered glass.
- Goniometer scale to aim light.
- It complies with standards EN 60598-1 and EN 60598-2-5.
- High quality LED sources characterized according to IES TM-30, with high color consistency <3SDCM and long useful life >60000 hours at L80.

INSTALLATION

- M20 cable gland in technopolymer.
- Support bracket in galvanized and painted steel.
- Suspension versions supplied with 4 eye bolt attachments..

NOTE: Also available with CCT: **3000K (-830)**
Also available with wiring: **DALI (B)** upon request
Also available in **black 12 (-12)** and **dark grey 16 (-16)**

Rated Ta:	ON/OFF	-20°C ÷ +25°C
-----------	--------	---------------

Perfect asymmetry for professional applications

EQOS2 is available with a 60° asymmetric optics and a wide range of beam angles.

Ceiling mount/Suspension

The high-performance **EQOS** Series is also available in ceiling and suspension versions.

EQOS2 plus
Up to **300W** e **38400lm**

Compact profile.

Wide rear fins
for optimal heat
dissipation in all
positions.

Graduated

EQOS [Series]

TORY

TORY is a series of **powerful modular floodlights** that provide an advanced and efficient solution for lighting category I, II and III sports facilities. Designed to provide uniform and high-quality lighting. A wide range of products is available, with different powers from 250 W to 1000 W.

CHARACTERISTICS

- Body and frame made of low-copper content aluminum alloy (EN 47100), die-cast.
- Powder-coated with UV-stabilized polyester paint, resistant to corrosion and salt mist.
- Silicone rubber gaskets with controlled hardness, UV-stabilized.
- External screws in stainless steel.
- Integrated LED driver with protection against overheating and network surges or voltage spikes, both common and differential mode.
- Replaceable surge protector for network spikes up to 10KV.
- Lenses made of PMMA.
- 4mm thick tempered glass lens, resistant to thermal shock.
- Graduated goniometer for aimin
- Laser pointer for long-distance alignment.
- Long LED lifespan >50,000 hours with L80.
- Fixture built in accordance with EN 60598-1 and EN 60598-2-5 standards, complete with CE marking in compliance with EU directives.

INSTALLATION

- Galvanized and painted steel bracket.

NOTA: The laser pointer for long-distance alignment is an accessory.

Rated Ta:	ON/OFF	-20°C ÷ +25°C
-----------	--------	---------------

1000W, 140000lm

TORY series – suitable for lighting SPORTS!

The highest quality of construction and lighting, designed to be installed even on very high mast towers for stadiums. Innovative materials, modular system and technical solutions designed to reduce or even eliminate failures without making maintenance easier.

CONVENIENT SPORTS LIGHTING AND MATERIALS THAT MAKE A DIFFERENCE.

Here are the main design features of the TORY series, designed to make installation and maintenance **in sports facilities as convenient as possible**, durable and maximize return on investment in the shortest possible time, while reducing energy consumption.

High-efficiency housing cooling.

In order to ensure maximum efficiency and durability of LED light sources and electronic components, a sophisticated high-efficiency fin design has been developed. This system optimally dissipates heat, ensuring the right operating temperature in all conditions.

Precise graduated tilt scale on the housing.

Each module is equipped with a precise graduated goniometer for precise module alignment. In addition, a laser pointer for long-distance direction finding is available as an accessory.

Specialized technical advice.

TORY is a series of **high-power modular floodlights**, particularly suitable for lighting in category I, II and III sports facilities.

To help you design your lighting properly, Arcluce offers professional expertise that will guide you **step by step** through the creation of your **lighting project**.

Consultations are **available** to all customers for small, medium and large installations, from 10 units to a larger number of luminaires.

■ Contact us at the number:
+39 02 981 0981

■ or write to:
project@arcluce.it

AREA

AREA series of **bollard lights for urban** and **street lighting**. Designed using advanced optical technologies, they provide efficient and uniform lighting. High-efficiency LED sources provide powerful lighting with low energy consumption, and the products are made of durable materials.

CHARACTERISTICS

- Die-cast low copper content aluminum body (EN 47100).
- Polyester powder coating stabilized against UV rays, resistant to corrosion and salt mist.
- Silicon rubber gaskets with controlled hardness, UV-stabilized.
- External screws made of stainless steel.
- Disconnecter that automatically disconnects the power line upon opening the body.
- Integrated LED driver with protection against overheating, voltage spikes, and surges, both common mode and differential.
- Additional replaceable surge protector against network spikes up to 10KV.
- Lenses made of PMMA.
- 4mm thick tempered glass screen resistant to thermal shocks.
- LED long lifespan >50,000 hours with L80.
- Manufactured in accordance with EN 60598-1 and EN 60598-2-3 standards, CE marked in compliance with EU directives.

INSTALLATION

- Pole-top installation, requires a reducing socket from Ø60mm to 100mm height. Available accessories for single or multiple mounting on arm.
- Supplied complete with cable (0.15m or, upon request, pole length) with IP66 plug-and-socket connector, locking nut for cables from 9 to 12mm.
- Fitted with a condensation valve.

Easy access to the wiring compartment via hooks, no tools required.

NOTA: All versions are **available with dual-power wiring (E)** featuring a switch for power reduction during nighttime hours.

Rated Ta (max Ta):	ON/OFF	-20°C ÷ +25°C (35°)
--------------------	--------	---------------------

The electrical compartment is **physically isolated** from the light source compartment for better control of the light source cooling.

AREA1 (42W up to 7100lm)

AREA2 (77W up to 13600lm))

AREA2 (102W up to 17400lm)

Pole-top installation at 90° – mounting with adjustable inclination via a fastening screw system.

AREA

Excellent lighting performance and low energy consumption, also thanks to the availability of **dual-power wiring (E)** with switching for **power reduction during nighttime hours**, available on all versions.

Lightweight, visually, functionally and with sustainable materials.

AREA is the result of a design that maximizes lighting performance using durable materials. The design features a wide and thin space for the light sources and a compact, well-insulated housing that houses and protects the electronic components from the elements. A universal, easy-to-adjust bracket.

The result is a light, functional, and sustainable design; a sleek line with a pleasant aesthetic impact that ensures **high durability over time**.

INSULATION CLASSES

Class I - Light fittings with all accessible metal parts connected to earth circuit.

Class II - Light fittings where all accessible metal parts are insulated from voltage in case of failure. The light fitting does not avail of earth device.

Class III - Light fittings working with very low voltage. The light fitting does not avail of earth device.

CLASSIFICATION

CE Mark (European Conformity).

Recessed Hole.

Degree of protection against external mechanical impacts.

Tolerable static load.

Technopolymer resistant to 850° glow wire test.

Can be driven over at a max speed of 20 Km/h.

Can be walked over.

Surface exposed to wind.

Beam Opening Adjustment.

High visual comfort.

Product suitable for use in rooms with video terminals.

Glare reduction.

Anti-flicker technologies for improved visual comfort.

Switch for settings: warm light, natural light, cold light.

Presence detection sensor.

Emergency batteries in case of power failure.

PROTECTION DEGREE

IP20	Protected against solid objects Ø > 12 mm.
IP23	Protected against solid objects Ø > 12 mm and rain-proof.
IP40	Protected against solid objects Ø > 1 mm.
IP43	Protected against solid objects Ø > 1 mm and rain-proof.

IP44	Protected against solid objects Ø > 1 mm and splash-proof.
IP54	Dust-proof and splash-proof.
IP55	Protection against dust and water jets.
IP65	Dust-tight and jet-proof.

IP66	Dust-tight and powerful water jet-proof.
------	--

IP67	Dust-tight and water-tight (immersible).
------	--

IP68	Dust-tight and sealed against submersion.
------	---

IP68 1m	Dust-tight and sealed against submersion at a max. depth of 1m.
---------	---

CONTROL

Intelligent lighting management for optimized energy consumption.

WAREHOUSES (max height = 16 m)

ON/OFF presence Sensor (for ceiling installation)

1099672X-11

1099673X-11

Description

ON/OFF presence sensor for ceiling installation. Features a single normally open zero-potential channel with a maximum load capacity of 2 kW (power factor 0.9). Detection area of 30x19 m, equipped with Master function. Integrated twilight sensor. Protection rating: IP20.

Code

1099672X-11

DALI-2 Presence and Light Sensor (for ceiling installation)

Description

Presence and light sensor with DALI-2 interface for ceiling installation. Detection area of 30x19 m, equipped with Master function. Integrated light sensor for automatic constant light regulation. Controls up to 40 DALI drivers. Protection rating: IP54. Programmable/controllable remotely via IR remote control (accessory 1099654X).

Code

1099673X-11

Application: Offices

Offices / Warehouses

Warehouses (high ceilings)

CHOOSE A RELIABLE PARTNER. CHOOSE ARCLUCE.

The brand that offers you professional LED products and solutions to create efficient and sustainable lighting projects, always guaranteeing products that are:

- **RELIABLE AND EFFICIENT**
- **DURABLE AND HIGH-QUALITY**
- **EASY TO INSTALL**
- **IMMEDIATELY AVAILABLE**
- **5-YEAR WARRANTY**

Don't settle for commercial solutions.

Discover the complete range of Arcluce products.

Ask your trusted dealer for the Catalogue

MAIN CATALOGUE

Over 700 pages of lighting products and solutions designed for architects, designers, installers, and professional distributors. A catalog enriched with technical information and recommendations.
