

The Egg-Mobile Challenge

Your eggciting challenge is to design and build an eggstraordinary wheeled-machine to safely transport a **hardboiled egg**. The egg machine has to be made from junk/recyclable materials or commercial materials (such as Lego, K'nex, etc).

Each egg-mobile will be rolled down a ramp and watched by the eggtire (sorry) school. The winning egg mobile is the one that travels the furthest. Let's see if we can break the last record of the entire length of the school hall!

The egg that travels the furthest will receive a prize and entry into the school record books! The egg-mobile competition will take place on **Friday 12th April** so bring your egg in on that day. You may also bring in a decorated egg for judging too.
Good chuck!....sorry...luck!!
