

## SAFETY PROCEDURES IN SCHOOL

### A Fire Drill

A fire drill is a method of practicing how the school would be evacuated in the event of a fire. The school's existing fire alarm system is activated and the school is evacuated as if the emergency had occurred. All staff and children make their way to designated areas in the school playgrounds.

### Lockdown

Lockdown procedures are a sensible and proportionate response to any external or internal incident which has the potential to pose a threat to the safety of staff and children in school. Procedures will aim to minimise any disruption to the learning environment whilst ensuring the safety of all children and staff.

**We will regularly practice both of these important procedures to continue to improve our systems for keeping our children and staff safe.**
