

This Week's LEARN IT'S

Week Beginning		29.4.19
LEARN IT'S		$5 + 2 = 7$ $7 \times 5 = 35$
1	Remind	Remind your child of the goal of 'Learn It's (answer another Beat That question) better recall of number facts.
2	Show/Write	Show/Write the fact e.g. $3+4=7$
3	Model	Model the making the sum using objects or fingers
4	Read	Read the fact together, read it in a squeaky voice, giants voice, whisper etc.
5	Ask	Ask the question and your child says the answer in a funny voice, loud, whisper etc.
6	Beat the Parent	'Beat the Parent' – take it in turns to ask the number fact e.g the child asks "what is $3+4$?" and the parent answers "7" then the parent asks "what is $3+4$?" and the child answers "7". Who is the quickest?
7	Quick Shout Out	Leaving the entire fact for the child to see as they shout out the answer e.g. parent " $3+4=$ " Child "7".
8	Wipe and Repeat	Without the fact written for the child to see, repeat steps 5, 6 and 7 above.
9	Switcher	Write a new fact using the same numbers but in a new place e.g $4+3=7$ and repeat steps 3 - 8
10	Children Write	Child write the sum and reads it in a posh voice, squeaky voice, giants voice, whisper – check operation vocabulary.
11	Fast and Furious	Point to your child, you say the sum they say the answer.
12	Fact Family	Show/Write the fact family for the fact e.g. $3+4=7$, $4+3=7$, $7-4=3$, $7-3=4$ Use fingers or counters to show the calculation.
13	Quick Family	Ask fact family facts and children recall answer.
14	Quick Write	Ask the question and chn just write the answer, very fast; include all facts from the family.
