

## Our Vision

At Alresford Primary School, we aim to provide a safe, happy and nurturing environment so our children can be the best they can, in all they do.

We strive to prepare our children with a skill set that enables them to contribute positively to both theirs and others lives. Our wish is that we prepare our children to achieve academically, socially and economically in their future.

Our talented and dedicated staff are determined to provide a curriculum that is designed to embed a love of learning in our staff, children and stakeholders so that we all share this value. We strive to deliver exciting, cross-curricular lessons that engage all learners and are purposeful. We aim to open up eyes to different areas of the curriculum and provide opportunities to unlock hidden passions and talents through enriched curriculum and risk taking. We will instil the importance of resilience and perseverance and the understanding that success comes from both these, and by embracing challenge.

We recognise the importance of community and the role the school plays in ours. We recognise the importance of respect and responsibility. As we grow, we will keep this moral close to our hearts to ensure that the school continues to serve the needs of the village, keeping our friendly, supportive family-like ethos as we do.

Our children are our future; we will endeavour to ensure our children and staff are challenged so they continue to grow and develop for the benefit of both themselves and others. We will provide real-life experiences and purpose to all we do, so that our children understand the value of what they are learning.
