

Single case of meningitis at the school: Information for parents and carers

We have been informed that a person at the school has been diagnosed with meningitis / septicaemia, caused by the meningococcal bacteria.

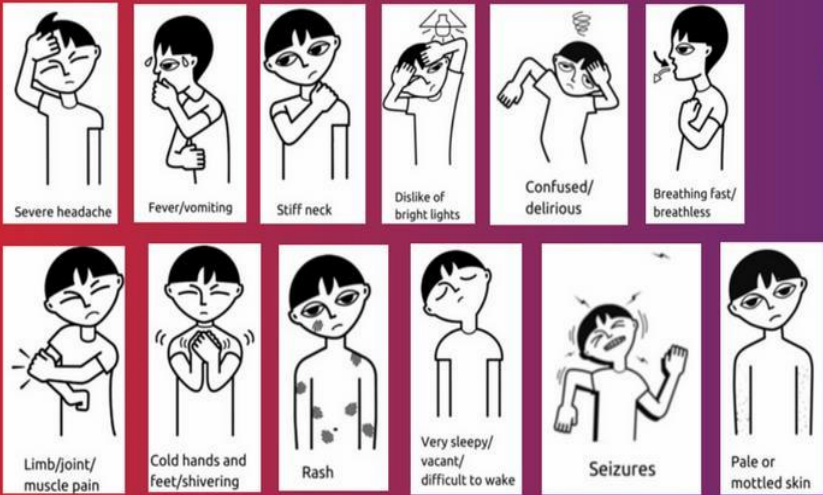

Please be reassured that the risk to others is very small. Public Health England has taken all action to reduce the risk of further cases and there is no reason to change the school routine or for children to be kept away from school.

While the risk to others is very small, it is important everyone is aware of the [signs and symptoms](#) of both meningitis and septicaemia. Get medical help immediately if you or your child experiences these symptoms - call NHS 111 for urgent advice, or 999 in a medical emergency.

Meningitis & Septicaemia

Symptoms can appear in any order. Not everyone gets all these symptoms.
