Term 5/6

PSHCE

Relationships: To be aware of different types of relationships e.g. friends and families

Religious Education

Year 5: Easter and the Ascension. Pentecost. The work of the Apostles. The sacrament of Marriage and Holy Orders.

Year 6's main body of work will be based around our sacramental learning on Celebrating Confirmation. The children will also be covering Unit I Easter, G Prayers, J Pentecost, K Belonging to the Church Community, and L Celebrating the life of Mary and the Saints.

Science

Forensic science (Y6): to make a series of scientific observations, comparisons and measurements in order to carry out an investigation

Forces: to learn about forces, including gravity

Music

Children will learn about, listen and respond to Chinese music.

Children will also learn songs for their end of year Production

History and Geography

The children will be learning about China, both modern and ancient (Shanghai Dynasty). They will develop an inquiry based approach to learning – deciding upon their own BIG questions, what they want to learn, experience and understand.

Children will work in teams where they will need to negotiate roles and responsibilities – including how they will present their learning.

Numeracy

Children will continue to learn core mathematical skills and apply their learning in maths investigations, puzzle and problem solving activities. They will then go on to design and create a maths board game.

Linked to our topic children will learn about the emergence of maths in China.

Year 6 will be completing a transition unit of work for secondary school
