

## **PE impact statement (infants)**

### **School Sports Partnership**

Through membership of the East Riding School Sports Partnership (West), All Saints' is part of a strong network of schools and partners which provides sporting opportunities for all. Additionally, through the network the partnership offers teachers a selection of training courses, whole school training, one to one support and guidance, school resources, and coaching in schools.

Impact of membership for All Saints':

### **Primary Steps in PE Scheme of Work**

The new PE Scheme of Work purchased by the school through the Sport Premium Funding has only been used by staff for 2 terms and feedback from staff has been positive. They have stated that the scheme is easy to follow and the videos provided support them to model specific skills when needed. Lesson plans are easy to use and provide a wide range of skills-based activities which enables the children to improve their skills and understanding of sport as a whole, ensuring that they have the fundamental skills and a base of knowledge which they can build on.

### **Events**

At All Saints' (infants) participation in sporting events outside of school have been limited therefore this year we are looking at how we can increase participation in sports and external events. Year 2 will be attending a GO Run For Fun event (25<sup>th</sup> April) to encourage them to participate in stay fit and healthy, this links closely with our half termly topic of 'Healthy Bodies'.

During the Spring half term Yorkshire Cricket came in and delivered sessions to the children in KS1 showing them the skills they would use for participating in cricket but also information on local cricket clubs. It is my aim to make links with local clubs to help with participation in sports outside of the school day.

### **Long term Plan**

Our long term plan at All Saints' is to encourage participation in sports both in and out of school by offering children more opportunities to engage in a wide variety of sports. Children will understand the need to stay active and healthy through our topic and the opportunities given. In order to support this and we would like to train our staff to ensure that we are maximising all opportunities to engage in sports and keeping healthy.
