

Name: \_\_\_\_\_

Number of Questions: **60**

Testing: **2x, 3x, 4x, 5x, 6x, 7x, 8x, 9x, 10x, 11x, 12x, 13x** (with **inverse**)

$120 \div 10 = \underline{\quad}$       $3 \times 11 = \underline{\quad}$       $5 \times 11 = \underline{\quad}$       $4 \times 9 = \underline{\quad}$

$9 \times 12 = \underline{\quad}$       $96 \div 8 = \underline{\quad}$       $24 \div 4 = \underline{\quad}$       $12 \div 3 = \underline{\quad}$

$10 \times 6 = \underline{\quad}$       $3 \times 5 = \underline{\quad}$       $12 \times 7 = \underline{\quad}$       $70 \div 10 = \underline{\quad}$

$1 \times 13 = \underline{\quad}$       $25 \div 5 = \underline{\quad}$       $2 \times 5 = \underline{\quad}$       $5 \times 10 = \underline{\quad}$

$80 \div 8 = \underline{\quad}$       $20 \div 2 = \underline{\quad}$       $77 \div 7 = \underline{\quad}$       $12 \times 6 = \underline{\quad}$

$60 \div 5 = \underline{\quad}$       $4 \times 11 = \underline{\quad}$       $10 \times 8 = \underline{\quad}$       $6 \times 12 = \underline{\quad}$

$12 \div 2 = \underline{\quad}$       $12 \times 2 = \underline{\quad}$       $4 \times 9 = \underline{\quad}$       $11 \times 2 = \underline{\quad}$

$12 \div 12 = \underline{\quad}$       $36 \div 12 = \underline{\quad}$       $7 \times 2 = \underline{\quad}$       $3 \times 8 = \underline{\quad}$

$11 \times 8 = \underline{\quad}$       $9 \times 7 = \underline{\quad}$       $3 \times 6 = \underline{\quad}$       $143 \div 13 = \underline{\quad}$

$36 \div 3 = \underline{\quad}$       $110 \div 10 = \underline{\quad}$       $5 \div 5 = \underline{\quad}$       $6 \times 4 = \underline{\quad}$

$9 \times 13 = \underline{\quad}$       $4 \times 7 = \underline{\quad}$       $4 \times 6 = \underline{\quad}$       $4 \div 2 = \underline{\quad}$

$7 \times 13 = \underline{\quad}$       $2 \times 6 = \underline{\quad}$       $48 \div 6 = \underline{\quad}$       $8 \times 12 = \underline{\quad}$

$11 \times 1 = \underline{\quad}$       $40 \div 8 = \underline{\quad}$       $70 \div 7 = \underline{\quad}$       $45 \div 9 = \underline{\quad}$

$2 \times 7 = \underline{\quad}$       $5 \times 8 = \underline{\quad}$       $1 \times 5 = \underline{\quad}$       $9 \times 9 = \underline{\quad}$

$7 \times 6 = \underline{\quad}$       $7 \times 2 = \underline{\quad}$       $11 \times 7 = \underline{\quad}$       $42 \div 7 = \underline{\quad}$
