Progress in reading

Progress scores are not directly comparable between years because of changes in the distribution of scores. This means we have to adjust the thresholds for the progress bandings each year. However, a change in a school's progress banding is indicative of a change in its performance. For example, a school that had a progress banding of 'average' in 2016 and 'above average' in 2017 is likely to have improved the progress made with its pupils. This measure was first recorded in 2016.
