

CLEVER CATERPILLARS AND BRAINY BEES

Curriculum News

Week Beginning 13th May

This week we will be focusing on snails and learning lots of new WOW describing words, such as gastropod. We will be learning lots of new snail facts, such as why they have a shell on their back and what they eat. We will be making clay snails, making a spiral obstacle course and doing lots of snail question writing. Alongside this, we are learning about our emotions. We will be focusing on the words 'happy' and 'worried' in particular and will introduce our emotions board for the children to use daily.

In Maths we will continue to solve capacity problems and will be making our own flavoured water in different measuring jugs. We will be carrying out lots of small group practical activities to find out how much water different jugs contain.

If you would like to support your child further at home, you could:

- Measure out your milk or water into a measuring cup. Can you count how many spoons of water can fit into your cup?
- Think of some WOW describing words for your favourite toy.
- Talk about emotions. Ask your child what makes them worried, what makes them angry and what makes them excited.

Thank you,

The Reception Team
